Sales of Wool Are Large and Prices Reported Strong—Outlook for Cotton is Bright—Failures Again Show Falling Off.

NEW YORK, May 19.—R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow: While the buying of 200,000 tons of Bessemer pig at Pittsburgh gave reason for the advance in prices to \$16.50, with grey froge quoted at \$15.50, it is not quite as clear as it might be that the output, which was 255,000 tons weekly, according to the Pittsburgh record, and has since been largely increased by the addition of many furnaces, will continue to fall below the demand, for the requirements in various departments for manufactured products, it must be recognized, are scarcely measured and do not seem as much diminished as might be expected by higher prices and long delay in delivery. In plates, for instance, the demand covers many thousand tons for delivery at Chicago and at Pittsburgh, and a Philadelphia concern accepted several thousand tons and afterwards was obliged to refuse more, one other concern in the same city refusing over 12,000 tons.
