KILAUEA IS ALSO SMOKING FREELY

An Immense Lava Flow Filling Up the Table Lands-Dense Smoke Prevails Far Out at Sea.

HONOLULU, July 21 .- (Via San Francisco, July 28.)-The volcante eruption of Mauna Loa is still in full blast. The lava flow is apparently filling up the table land, near the Humuula sheep ranch. Hilo and the whole island of Hawaii are enveloped in smoke. Vessels encounter dense clouds of smoke hundreds of miles out at sea, and navigators are seriously inconvenienced. Kilauca is also smoking freely and the indications are that this volcano will soon be in active eruption.

Frank Davey has returned from a visit t the volcano. He says there is a series of eight craters. Five of them were dead, but appeared to have been active quite recently. One of the others was belching forth smoke and fire and molten rocks of great size. According to Davey the rocks were as big as horses and went so high that they cooled before falling to the ground.

It took Davey and his party fifteen hours to ascend the mountain from the active crater to the summit, where their horses were left. Two men became delirious on the way for want of water. The trip is described as a terrible one in the extreme. All around the top of the mountain it was cold. At the crater it was very hot. The

J. S. Pratt was caught on a knoll high upon Mauna Loa, on two sides of which the lava was flowing. The sun was pearly down. He did not know which way to go and spent the night there as a desperate chance, as he thought, of life. He sat up all night and watched the lava flow. When the fumes were blown his way he would have to lie down on his face to keep from suffocating. Next morning he found his way out by following back down between the
