INEW BOOKS FOR THE LIBRARY

Volumes Recently Ordered Arrive and Are Being Numbered for the Shelves.

WORKS TO SUIT ALL KINDS OF READERS

Popular Demand for Fiction is Well Supplied by a Varied and Attractive List-Some of the Titles.

The new books, recently ordered by the ustees of the Public library, have arrived and, after being numbered and arranged on the shelves by Mrs. Dailey, the librarian, and her assistants, will be at the disposal of the patrons of the popular institution. The list comprises in the neghborhood of 100 volumes, including many of the latest books, which at present are of particular waived and stated that he would send a interest and have consequently caught the public fancy. The list is a varied one and the trustees in making their selection have given careful consideration to the different tastes of the patrons of the library.

The majority of the patrons of the library prefer light works of fiction and consequently the list under this heading is the largest. Among what popularly are termed "novels" will be found many of the latest books on the market, in the number being Robert Barr's "The Strong Arm," Francis Baylor's "The Ladder of Fortune," Clara L. Burnham's "A West Point Wooing;" 'Strong Hearts," by George W. Cable; "The Cougar Tamer," by F. W. Calkins, "Those Dale Girls," by Francis Carruth; "Richard Carvel," by Winston Churchill; "The Eye of a God," by W. A. Fraser; "Agatha commander-in-chief with the rank of Webb," by Anna K. Green, which has appeared in serial form in the Sunday issue of The Omaha Bee; Beatrice Harraden's "The Fowler;" "A Triple Entanglement," by that delightful writer, Mrs. Burton Harmake a report on its condition and needs to rison; Robert Herrick's "Love's Dilemmas;" "Young Wives," by Richard Le Gallienne; "The Short-Line War," by Merwin Webster; "The Jamesons," by Mary E. Wilkins, and this list, but are picked out to show the diversity of reading material contained in

Among the more notable books on history will be found "The Rough Riders," by Governor Roosevelt, and it is safe to say that Bereford's "The Break-Up of China," a work of peculiar interest to those who are watch-ing the course of events in the Orient; Rene Bazin's "The Italians of Today;" "America in the East," by W. Griffs, and R. W. Cham-

"Three Studies in Literature," by Lewis E Gates; "Literary Likings," by Richard Burton, and F. J. Snell's "European Literature in the Fourteenth Century."

John Fiske's "Through Nature to God" and "Aspects of Religious and Scientific Thought" will appeal to the students of theology. For the student of natural science a notable book among the new list is Darwin's "The Tides and Kindred Phenomena in the Solar System.

Stranger Makes an Unsuccessful Play to Secure Some Cash. The authorities of this city and Omaha are looking for a supposed traveling man who a few days ago attempted to secure a sum of money from Lyon & Healy, the Chicago music house. The man's name is said to be J. Drayton and he was a guest at one of the leading hotels in Omaha, Last Tuesday he came to Council Bluffs and dispatched a telegram to the firm of Lyon & Healy, asking for a telegraphic

transfer of \$75. The name he attached to the message was that of a well known traveling man in the employ of the house. In the message he asked that identification be letter of explanation. No reply to the telegram came and the

disappointed when the money failed to arrive. Nothing has been seen of him since. The day following, the traveling man in whose name the fellow had telegraphed, appeared. He had been in Omaha and had received a telegram from his house, making inquiries about the message. It appeared that on receipt of the telegram Lyon & Healy at once ordered the \$75 sent, but recalled the transfer before it had been sent, as it was suspected something was wrong. An examination of the telegram supposed to be signed by the firm's representative showed that the house had been addressed as "Lyons & Healy," instead of "Lyon & Healy." The firm also were surprised at their representative wiring for a telegraphic transfer, as he always carried which he used when in need of funds. For these reasons they recalled the

The man who forged the firm's name to the telegram is supposed to be the person who registered in Omaha at one of the leading hotels as J. Drayton, and who claimed to be the agent of a New York Automobile company. Drayton met Lyon & Healy's traveler while in Omaha and being supposedly short of cash decided on using the latter's name to replenish it. He probably would have succeeded but for the small mistake in adding an "S" to the firm's name.

On account of the recent heavy rains and wind storms, necessitating re-shocking and rushing the work to save from blight, all hands have had to turn into the fields. It is the wettest harvest since 1888, Since cutting began a week ago Monday three tornadoes have swept this entire section, and rain has fallen in torrents at least once in fellow, who was well dressed, appeared to every forty-eight hours. When the harvesters went into the fields the splendid stand of grain promised one of the biggest small grain crops ever produced. Now the farmers will be glad to save half a crop.

The most sanguine estimate for wheat is ten bushels to the acre. In some sections rot and half-filled ears are complained of, but the greatest loss is entailed by the lodging of the stalks. Whole fields are matted and beaten into the ground beyond recovery. Corn has been loosened in sections where the storms have been most violent, but on the whole it still promises a splendid yield. Harvesting of the small grain is half over and will be finished by August 10.

Mexican Minister Does Not Believe

There is a Combination in South America Against Uncle Sam. MANCHESTER, Mass., Aug. 4.-Senor

Aspiroz, the Mexican minister to the United States, who is spending the summer here, was much interested in last night's news dispatches, which reported the departure of President Roca of the Argentine Republic with the minister of foreign affairs and thirty senators from Buenos Ayres for Brazil. Senor Aspiroz said he had not learned of such a movement. He gave it as his opinion that there could be no foundation in fact for the report that an alliance was contemplated between the South American republics against the United States and to pear him out in his opinion he referred to the movement started by Brazil with a contribution of \$250,000 for the purpose of esablishing a steamer line between that counry and the United States. Nicaragua and Hondurae, he asserted, intend to contract an alliance between themselves, but the ambassador holds that to be insignificant.

ers to Get Into the Field. The machinery in use in the French paper mills is chiefly of Belgian and German make, the Belgians obtaining a slight prefer ence, says Paper. Thus, in 1897, of the total amount of paper mill machinery imported into France, Belgium supplied the equivalent of \$75,000 worth, Germany \$44,000 worth igan Central road came in thirteen sections, Great Britain \$15,700 worth, while other countries furnished \$6,000 worth. It will be seen from these figures that American man ufacturers of paper mill appliances have made little, if any, effort to obtain a foot

hold in the French republic.

The attention of the trade should be drawn to the fact that France is becoming a developing market for paper mill ma-chinery. The French trade is making persistent efforts to make its wares known abroad, and in not a few markets the French makers have succeeded in displac be, by increased trade, will naturally cal for a larger consumption and the most im proved methods of manufacture, as well increased mill capacity. It may also be ex-pected that the French makers will attemp themselves to fill some part at least of the enormous requirements which are now ob-tained abroad, for while the French exports of paper amounted in 1897 to a value of \$2,878,779, the imports reached a total of \$1,349,499.

The magnitude of the French paper in dustry may be gauged from the fact that in 1896 there were some 569 paper mills in operation, employing about 40,000 persons and producing paper to the value of \$45. 600,000
