# CRY FOR YOUNG MEN.

## Tendency of Modern Industry is Retire at an Early Age. **Gunton's Magazine**

The Chicago Chronicle has become some what alarmed at what it calls the "Cry for Young Men." by which it means the coming habit of substituting young men for the middle-aged and old men in productive enterprises. Despite the disposition of such journals as the Washington Post to pochpooh this alarm, the Chicago Chronicle raises a very important question. It is true that the tendency of modern industry is to retire workmen at a relatively early age and fill their places with young men. One great cause of this is the constant introduction of revolutionizing methods and machinery. When a man has worked at any industry forty years, he is not so alert in adapting himself to new machinery as is a young man. The inevitable tendency is to drop

him out, and when once out it is doubly difficult for him to be re-employed except at some more simple and lower-paid occu-

This is one of the hard phuses of a rapidly progressive industrial era, but the remedy s not to stop the progress or to insist that laborers shall be retained after they have ceased to be useful. The real remedy is a system of insurance, the payment of which shall be a part of regular cost of produc tion. It should begin when the employe

commences work, at whatever age, and when he reaches a certain point of "diminishing returns" or declining economic efficiency, say at the age of 60, enable him to retire on at least three-quarter wages. This would eliminate all element of charity, dispel the fear of humiliating dependence in old age, and relieve the employers from the odlum of heartlessly discharging aged and faithful

The merit of the declaration of the lowa republicans on this subject is that it required courage to make it. The specious arguments of the cheap silver dollar advocates caught the farmers of the states west of the Mississippi to a greater degree than in any other section except in the south Kansas, Nebraska and Missouri were swept by the free coinage craze, and Minnesota was only held in line by the sturdy honesty of its Scandinavian population. In the face of this wave of popular sentiment the Iowa republicans a year ago made the declaration quoted above, and reiterated it at the state convention which met in Des Moines Wednesday. They are willing to declare the

This warm weather is a boon to us. We were reducing prices on spring goods because we had too many of them. And now along comes a warm wave and mid-summer weights are in great demand.

But we are glad enough to have this guickened impulse to trade.

Ane, what is more to the point, we are very ready for it.
