CHICAGO, Aug. 29.-Wheat averaged weak today, but closed at substantially unchanged prices. Expectations of increased orthwest receipts were still affecting the bulls, but shorts were disposed to take profits. Other markets were uninteresting. Corn closed 14c lower for September and unchanged for December. Oats declined the in September, but closed a shade higher for December, Provisions closed unchanged to 214c lower.

Weakness was shown by wheat at the opening of trading. Liverpool reported a decline of %d, while the northwest advices told of perfect weather for harvesting operations and also said that new wheat would move freely from now on. Longs were the principal sellers. They were apwere the principal sellers. They were apparently afraid of their position under the unfavorable crop conditions and liquidation from that source forced prices down slightly from the opening decline. The break in prices was taken advantage of by shorts, who covered quite freely, and a slow recovery in prices ensued, the advance bringing both the September and December options back fairly within yesterday's closing prices. An interval of extreme duliness followed and prices for an hour or more varied but little. The general tendency was in the main downward, the speculative market being influenced to a certain degree by the early slack cash demand. The weakness became more pronounced in the afternoon, though the declines were small on account of the lack of trading either way. The northwest was weaker than the local market and some selling came from that direction. Late in the session the market was influenced by the Hungarian minister's estimate on the world's wheat crop, which put the amount at nearly 90,000,000 bu, under theoretical requirements. A fair amount of buying followed this announcement and best prices of the day were reached. There were plenty of holders willing to part with their wheat at the advance and the close found the market steady, but on a slight downward turn. Bradstreet's estimated the world's visible decrease at 1,982,000 bu, about what was expected. Minneapolls and Duluth receipts were 581 cars, against 306 cars last week and \$59 cars a year ago. Chicago receipts were 581 cars, against 306 cars last week and \$50 cars a year ago. Chicago receipts were 581 cars, against 306 cars last week and \$50 cars a year ago. Atlantic port clearances of wheat and flour am parently afraid of their position under the unfavorable crop conditions and liquidation

Dats in the main followed corn. Septem-Oats in the main followed corn. September was weak early, but recovered partly and closed fairly steady. Country offerings were freer and the cash demand not so good during the morning. Elevator people sold. Cash business improved later and 209,000 bu, were reported worked. Trading was mostly in the way of changing. Receipts were 77 cars, September ranged from 19% to 19% and closed % lower at 19% 200. December closed a shade higher at 19% 11%.

rovisions were steady most of the day.

NEW YORK, Aug. 29.—COTTON—The speculative movement in cotton today was quite steady and the course of the market quite variable. At the opening there was a decline of 296 points. The early weakness was due to unsatisfactory cables and claims of showers in Texas. Later, however, some places in Texas reported clear warm weather. Crop damage reports were renewed and the market rallied quite sharply. The weekly government crop report added to the firmer feeling. The upward movement was arrested, however, by continued heavy receipts at the ports in contrast with the small sales of spot cotton at Liverpool, while private cables reported an unsettled feeling on the part of the English cotton trade, owing to contradictory advices from the state of the contradictory advices from trade, owing to contradictory advices from this side. During the afternoon the market was quite nervous and gave way under a bear raid before the close, finishing barely stendy at 7@8 points decline.

The market on sheep was strong and active and the offerings of muttons changed hands early.

It was noted yesterday that the lamb market was lower, but it was no easy matter to say how much, as no lambs were sold to establish quotations. Today, however, preity good western lambs sold at \$5, showing that the market is fully 25c lower than last week. last week.

The demand for feeders continues very good, while the supply is light, and anything at all desirable in the way of feeder wethers can be depended upon to sell quickly.

RECORD OF FIRST NEBRASKA

(Continued from Ninth Page.)

quiry, it was reported to me that the natives had set fire to it themselves.

I have the honor to state that our party did nothing to provoke any attack, and did not fire until fired upon; also that at least (of about two hundred advancing upon us from three sides) one hundred were all in

white; also that a great many shots were

fired out of houses along the western edge

of the village. Very respectfully, (Signed) H. B. MULFORD Major 1st Neb. Infty. U. S. V.

Col. Stotsenburg says that "Village" mentioned throughout report, refere to the village of native huts at south edge of Martquina. I. H. Crossroads, San Juan del Monte,

February 24, 1899. Major P. G. Eastwick, jr., Commdg. 3rd Battin, 2nd Or. Vol. Inf.,

I beg to report as follows: Received verbal orders from Major Eastwick to re-port with one Hotchkiss gun and 5 men to Camp Barber in command of detachment. Gun to be pulled by ten prisoners. Left crossroads at 1:30, proceeded to point on Mariquina road about 21/2 miles, when on order of Capt. Barber gun was put into action, firing at native houses, where the enemy was stationed. Enemy's fire ceased. Hotchkiss shells penetrated houses, but failed to explode. After firing 10 or 15 shots the gunner reported that the gun was disabled; on examination I found that the swivel plate, controlling elevation gear, was broken. I took the plate off and turned it in such a manner that the gun could be used (with care). I was compelled to work under great difficulties, on account of not having the tools that belonged to the gun. The gun having been prepared, Capt. Barber ordered me to place gun at a point one-quarter mile from road to the left, and shell a rocky ridge where there was a body of insurgents in force. Opened fire at 1,500 yards, shells landing in the midst of them and exploding with the effect that they were driven from their position after some resistance. (Note, Shells exploded by striking rocks-would not explode by striking bamboo houses or ordinary soil.) After firing 100 or more shots cleaned the gun, and shortly afterwards a shell struck, and Capt. Barber ordered me to the road, where I found firing pin bent, which I hammered in shape and removed broken shell from gun. Proceeded on up road per order Capt. Barber, and opened fire on hedge row, from which the enemy were pouring in a hot fire; after firing 2 shots the gun again fammed, and we succeeded in withdrawing the shell under a severe fire. I then reported to Capt. Barber, who ordered me to report to Capt. of Neb. Company, who sent me back to Capt. Barber (after I had made a verbal report to him of the condition of the gun), with orders for him to withdraw his skirmish line to the road, and advance to his position. Also for me to bring up the gun to his position. On arrival at his posi-

gun and could be rammed against the explosive shell without touching the cap, thereby removing the jammed shell from the gun. I carry this tool on the gun now, and it can be used in the field in case of future trouble. I also repaired plate on elevation gear by using heavy iron washers and new machine bolts. Finished repairs 11:30 p. m., with gun in much better and stronger condition than when we left camp. I received telegraphic orders from Col. Stotsenburg at 7:40 p. m. to proceed to
