Only Paris News Prevents Chicago Wheat Account Posin-Dull; strained, common to good, from Showing a Decline.

CORN, OATS AND PROVISIONS CLOSE LOWER

Increase in the European Visible and Big Russian Stocks Affects Wheat In a Bearish Way.

CHICAGO, Sept. 9.-The verdict in the Dreyfus case and consequent excitement in Paris saved wheat from a decline today, the market closing unchanged for September and only a shade lower for December. Domestic and European statistics tended toward lower prices early in the day. Corn continued to decline and closed we lower. Oats declined be for September and unchanged for December, Provisions closed

about Plac lower. Wheat opened weak at a decline of about Lune for December and September. Receipts of wheat in the northwest were much heavier than a week ago and Liverpool was lower. The general trend of the market has been downward for several days and this sort of news easily put the balance of trading on the selling side. The selling pressure at noon was heavy, but the demand was so light that princes declined steadily, weakness being especially marked in the deferred futures. The market soon got under puts and at that point became steady under fair buying against those privileges but did not show signs of any reaction until late in the session, when the report of the verdict in the Dreyfus case was posted and fears of excitement in Paris caused some covering by shorts. The buying, however, was only sufficient to bring prices back to about yesterday's closing point. The market was affected in a bearish way by the increase of 150,000 bu, in the European visible for August, compared with a decrease last year of 7,800,000 bu. The big Russian stock, 8,890,000 bu, also came as a surprise to traders and was responsible for some liquidation. September, after the first seiling, showed considerable stead/ness. Elevator people continued to buy and this kept prices close to yesterday's closing point. Northwest receipts were 915 cars against 538 last week, and 1,129 a year ago. Chicago receipts were 189 cars, 9 of contract grade. Total primary receipts were 1,183,000 bu, compared with 1 254,000 bu, a year ago. New York reported a fair export demand with about 20 loads engaged. Toward the close the market was practically at a standstill. Bear'sh statistics were expected Monday and with this belief traders were d'sinclined to do much. December opened 1,000,000 bu, and heavy. General commission house llouidation was the feature and prices declined about &c all around. The market cat to both daily and weekly puts and had some support on that account. The breaking of the drought and continued large receipts were the factors. Receipts were fairly active and irregular, Early in the session there was a marked from 284c to 284c and closed 4c lower at 284c. days and this sort of news easily put the balance of trading on the selling side. The

Dats were fairly active and irregular, Early in the session there was a marked disposition to realize by longs and prices declined. The liquidaton of Sentember was declined The liquidaton of September was especially heavy. Later a firm feeling developed, partity on the continued excellent cash demand and the close was steady. Receipts were 426 cars. December ranged from 20% to 20% to 20% and closed unchanged at 20% 20% particles. September closed We lower at 21%. Provisions still showed the effects of the yellow fever news and ruled slightly lower all round. Liquidation took place in all products but the good cash demand for men's caused some raily late in the session. At the close October nork was 25% lower at \$5.05. October lard, 25% lower at \$5.05. October lard, 25% lower at \$5.05. October lard, 25% lower at \$5.25% and October ribs a shade lower at \$5.25%. Estimated receivis Monday: Wheat, 190 cars: corn. 650 cars; oats, 300 cars; hogs, 28,000 head.

Chicago, Milwaukee & St. Paul railrad sbares, which are practically unchanged. Money is tight and rates are firm—until Monday 2@2½ per cent, for a week 2% @3 and on three months' bills 3½@3% per cent.
