According to the Grocery World the pickle crop is short and prices \$1.50 to \$2 higher than last year. Conservative estimates place it at 50 per cent of last year, making t the smallest crop in twenty years. Pickle obbers will be paying \$8 per barrel of 1,209 sickles, which means another dollar advance, Last year at this time the price was \$6, and a little later \$5. Still the present price is reasonable, compared with some previous years. Last year the retailer paid \$8, and a few years before \$9. The cause of crop shortage is a peculiar blight, for which as

inder disadvantages is related by an English paper, which says that an intelligent Irish farmer has discovered that by planting onions and potatoes in the same field in alternate rows the onions become so strong that they bring tears to the eyes of the potatoes in such volume that the roots are kept moist, and a big crop is raised in spite of the drouth.
