California has large trees, but those of Montana are peculiar unto themselves. Three Montana trees in particular have noted individualities, reports the Butte Miner. One is in Alder gulch, where gold was first discovered in Montana and where the Vigilante Society for Mutual Protection was organized with ex-United States Senator W. F. Sanders as chairman. Prior to that year courts were of an uncertain quantity in Montana, yet no man met his fate on this tree without a public trial, at which the evidence of guilt was incontrovertible, and from the time of the discovery of gold in Last Chance guich in 1864, until 1870, from one to two men annually suffered death by hanging on this tree, from which uncanny events it derived
