Wheat Suffers a Decline and Closes Slightly Below Saturday.

GENERAL DEPRESSION EVIDENT IN MARKETS

Corn Quiet. But Stendy-Speculative Trade in Onts Small-Provisions Open Firm on Light Hog Receipts.

CHICAGO. July 23.—Big world's ship-ments, large receipts and unresponsive ca-bles started a decline in wheat today and the close was 1½c under Saturday for the september option. September corn closed aniac and September oats %c down. At the close provisions were 5%c to 22½c de-gressed. september option. September oats ac down. At the close provisions were 5% to 22% depressed. Wheat was a very tame market today. Liverpool showed practically no response to the advance here Saturday and the world's shipments were large, showing I od increases from Russia and the Danian country. It was the sort of newstain country. It was the sort of newstain opening by to be under Satility and the particular opening by the le under Satility. There was some covering I shorts for profits, a little buy-1 by traders following this, and ptember railied to 75%. The raily which iders were playing for failed to materialize, because of outside apathy, and a reaction followed. Heavy receipts and avery siack cash business during the rest of the session held the market true to the downward course and the windup was lifeless and weak. September dropped to 75% and closed Use lower at 75% 57.5%. Clearances at the seaboard in wheat and flour were equal to 180,000 bu. Primary receipts aggregated I,185,000 bu. Primary receipts aggregated I,185,000 bu., compared with 983, 6 bu. last year. Minneapolis and Duluth reported 369 cars, against 27 last week and 5% a year ago. Receipts here were 230 cars, sixty-seven of contract grade. The domestic visible docreased 450,000 bu. and the English 1,221,000 bu. Reports from the 19 kotas were that hot winds had practically completed the destructive work of the drouth. Not much attention was paid to these reports, however.

Corn was quiet but steady, holding firmly against the weakness in wheat after thad made a small concession to the actifude assumed by the more important careals. Business in the pit was limited in volume and local in character. The supporting factors were light receipts—211 cars here—small country offerings, higher cables and a strong cash demand. September soid

cereals. Business in the pit was limited in volume and local in character. The supporting factors were light receipts—311 cars here—small country offerings, higher cables and a strong cash demand. September sold between 32-221222.

Cover September c. 1. f. Buffalo and 43-cover September for No. 2 white. Sales for shipment were placed at 250,000 bu., while New York reported thirty-five carloads taken for export.

The speculative trade in oats was small and largely confined to the operations of local scalpers. The depressing influence was to a degree counteracted by the steadiness of corn. Receipts were 190 cars. September sold between 23-2-325-c and 23-c 23-c and closed 3-c under Saturday at 23-c.

Provisions opened firm on light hog receipts and an advance at the yards. Trade was dull, however, hogs turned, easier, there was no export demand and the wheat weakness was depressing, all of which cost the hog product market its early gain and more, too. September pork sold between \$12.29 and \$11.90 and closed down 22-2 under Saturday at \$11.22-; September lard between \$1.052-1012, and \$8.20-2, with the close be depressed at \$6.57-2.

Estimated receipts tomorrow: Wheat, twenty cars; corn, 715 cars; oats, 200 cars; hogs, 16.000 head.

Professional Traders Seek to Interest the Outside Public.

NEW YORK, July 23.—The influential interests which have taken the leadership in the stock market continued their efforts today to make a rising market with the object of inviting public buying. They were not discouraged by the failure of outside interest to develop on account of last week's advance and they resumed their bullish manipulation from the opening this morning. There was not much difficulty apparent in advancing prices or if any obstruction appeared in the shape of offerings in largo volume than could be absorbed, the leaders defly turned their attention to stocks whose upward course was easier. As the long interest has not yet attained large proportions and as there still remains a considerable short interest, whose position grows daily more precarious, the technical Professional Traders Seek to Interest grows daily more precarious, the technica conditions favored the advance. grows daily more precarious, the technical conditions favored the advance.

There was some accession of outside buying as well which it is the ultimate object of the present buying to act as a reliance for absorbing stocks at a higher level. The appearance of this buying encouraged the professional buils to redoubled efforts, and the day's market as a result gave an appearance of greater activity and more strength than on any day last week. This was particularly true after Sugar had been checked in its first reactionary tendency and was found to move upwards easily on moderate buying. This stock continued to have a marked influence on the whole market and its reaction late in the day precipitated a movement to take profits elsewhere, so that the closing was easy at considerable recessions from the best.

best.

The distinguishing feature of the market The distinguishing feature of the market was its unevenness, as might be expected from its professional and manipulated character. A few stocks were active and strong, a large number showed sharp advances after lying dormant for some time, so that very meager transactions were sufficient to move them. But the majority of the list was only moderately active and continued very sluggish, small net gains being the rule in sympathy with the strength in special stocks. There was a disposition to pick some leading stock from each group of securities in which the interests or conditions were allied and advance the leaders for effect on their particular groups, thus permeating pretty much the whole list with a show of strength.
