There is still manifested, however, an indisposition to comply with the demands submitted by the powers and which they insist must be complied with. The Chinese government wants the ministers to leave Pekin, but it offers no guaranty for their safety if they should do so. Now if the government is able to carry out its proposed agreement for a cessation of hostilities it must be able to secure the safe removal of the ministers and other foreigners from Pekin. Were it to do that very little if any difficulty would be found in securing peace, for it would .27,700 attest the ability of the Chinese government to fulfill whatever agreement it should make with the powers. The French minister of foreign affairs puts the matter pointedly in saying that if the Chinese government has great difficulty in defending the ministers and in defending itself against rebels, it should order its troops to stand aside before the allied forces, thereby opening the road to the capital. M. Deleasse also said: "The Chinese government should understand that the only means of proving the sincerity of its designs and of limiting its responsi-

bilities is a cessation in the placing of obstacles in the way of such an arrangement." This expresses the feeling of all the powers.

The United States government will insist upon the demands it has made. which are entirely fair and reasonable. The Chinese government must certainly understand that there is no unfriendly feeling toward it here, that our government desires to do nothing that will injure China, but on the contrary is most anxious to avert war and to aid the Chinese government, so far as practicable, in restoring order. The United ago that no prosperity could come to States has given every assurance of this and had it taken a different position at the outset of the trouble it is highly probable that there would now be actual war with China, instead of military operations simply with a view to rescuing the legations in Pekin. From the broader viewpoint this kind of growth is more substantial than that displayed in the erection of palatial residences for the households of the wealthiest citizens, because the backbone of a community consists of the people who live in comfortable dwellings owned by themselves in which are reared families that promise future usefulness to the city.

It is gratifying to know that Omaha has a constantly enlarging number of inhabitants who belong to this desirable class and in this respect it need fear no comparison with other cities of the west which are competing with it for supremacy.

Prosperity, everywhere in evidence, cannot be talked down. It may not be due to McKinley, but it is possible under the policy for which McKinley stands."

Money certainly is plentiful in Nebraska. The last quarterly report of the state banking department shows that in the last three months there has been an increase of \$3,000,-000 in deposits, although only a small fraction of this year's fine grain crop has been state banks aggregate \$25,250,000, while these in the national banks of the state amount to \$32,000,000. The demand for money is not urgent and every bank has a surplus which it is unable to loan. The Nebraska farmers are laying up money

Magnifying Glasses

There is nothing so injurious to the eyes as glasses which greatly magnify. They are invariably too strong It is not natural for the eyes to see objects too large or too small. The object of glasses is to make everything clear and distinct, but not en larged. To place the eyes under per feetly natural conditions and to re lieve all overwork and strain. It is to this kind of work that the optician is especially trained. He must take a careful measurement of every curve and muscle of the eye. He must be able to select glasses that will neutralize and correct every defect. They must be of the right focus and the right strength and must be it correct position before the eyes. If you ought to have glasses, or believe you ought, we will be glad tomake an examination and tell you just wha you need. We make no charge for
