Nature's Most Mysterious Force.

Few there be who understand the mysterious powers and possibilities of electricity. Since the days of Benjamin Franklin men have tested and experimented with varying degrees of success, but never with a thorough understanding of this subtle force.

Of late years many new truths have been discovered and among these perhaps the most important is that the proper application of electricity is a permanent specific for many ills. Along this line the new Restroom System, Inc. company has experiments for several years and the results finally obtained and put into practical form and effect by means of the Restroom treatment have been a revelation to scientists and physicians. That mysterious force is in connection with hygiene and massage and the application is entirely different from the old-fashioned shocks or strong currents administered through belts or from batteries. Under the new plan a gentle glow is felt in all parts of the body, every nerve, tissue, muscle and organ, and the system being permeated with new life and vigor.

Rheumatism and nervous troubles are quickly and permanently cured, a new health circulation is induced and a lease of new vitality is imparted. For reducing excessive weight or developing the figure, for clearing the complexion and eliminating the lines of worry or ill health, this treatment is unequalled.

The Restroom company uses no drugs or patent nostrums, faith cure or magnetic healing, only the remedy of nature applied to nature's worn or tired forces—and the results are marvelous. Youth can be retained and health restored. Visitors are welcome at the Ladies' Bathery, second floor, Bee building, Empire Hotel, every day, try it.

BUILDING TRADES PROSPER

Mechanics Have Plenty of Work and Are Paid Good Wages.

FIGURES FOR YEAR SHOW UP WELL

Value of Improvements Under Way and Completed in Excess of That of Previous Years with One Exception.

While little stir is being made in the building trades of Omaha that branch of industry is responding to the prosperous conditions of the city, state and country in common with all other lines of business.

Improvement in this industry means more for the city this year than it has ever meant before, for a larger part of the money spent goes into the pockets of the mechanics of the city. Wages in all of the building trades have been advanced in the last two years and many of the workmen have received advances this spring.

The figures are taken from the record of the building inspector of the city and do not show many improvements now under way being reported. Neither do they include the cost of the federal building annex, costing \$340,000. The totals for the seven and one-half months of the last six years are as follows: 1895, \$72,162; 1896, \$205,147; 1897, \$40,822; 1898, \$382,557; 1899, \$208,561; 1900, \$41,186, or, including the federal building annex, \$1,181,186.

The comparative figures issued by the secretary of the Builders' and Traders' Exchange for the years mentioned, show:

Table with columns for years (1895-1900) and values for various months (January-December).

The increase in the value of the building permits issued so far this year, compared with the corresponding period of 1899, is \$291,632, or 31.91 per cent. The number issued in this term was 1895, 153; 1896, 486; showing that the class of buildings being constructed and the repairs being made are of greater value in each permit than those of one year ago.

WET MAIL REACHES OMAHA

Three Thousand Water Soaked Letters Now Drying at the Postoffice.

Three thousand water-soaked letters for Omaha and South Omaha were received at the Omaha postoffice yesterday afternoon. The packages of mail were untied and the letters were spread out in the office of the superintendent of mail and will be distributed as soon as they are dry enough to handle. Most of the letters are from New York and Boston and were mailed in these cities August 15. A wreck east of Chicago is responsible for their condition.

The damaged pouch contained many business letters, a large amount of railroad correspondence being ruined. Nearly every firm in Omaha is represented in the mass of soggy letters. There were several packages of foreign letters, but these were tied together so tightly that they were but little damaged beyond losing their stamps and being soaked open. The addresses are legible on all but a few pieces of the mail. No damaged second-class mail has been received as yet, but the postmaster thinks it is likely that pouches of soaked papers will arrive on later trains.

MANDAMUS CASE POSTPONED

Fair Association Suit Against County Commissioners Goes Over Until Next Week.

The action brought by the Douglas County Fair association to compel the county commissioners to make an appropriation for the fair to be held next month came up before Judge Keyser yesterday.

In his defense the Board of County Commissioners County Attorney Shields asserted that no fairs had been held in 1898 or in 1899 and that no accounting of the appropriation for those years had been made by the fair association. In order to allow an amendment of the petitions to bring in all the facts in the case a postponement was granted until Wednesday.
