and retailers are now on the eve of one to closed, the closed, the of the best seasons ever experienced in this CATS Receipts 44.800 bu.; experts, 2.935 OATS Receipts, 2.95bc; No. 2, 25bc; No. 2, 25bc city. With the month of September the rush of fall business sets in and is well maintained until the holidays. Last year was, of course, an exceptionally busy season, but present indications are that trade will be heavier than ever before. Omaha as a jobbing center is in better favor than ever before, owing in a large extent to the ever before, owing in a large extent to the ever before, owing in a large extent to the Improvement in the market itself. Jobbers are carrying better and larger assortments 189 than in previous years, their traveling men are more numerous and covering a larger territory and the number of houses locatcutions for local jobbers is very en-

couraging indeed.

Another promising feature is the interest being analyzed in the coming full feativities. Merchants by the thousands are preparing to be in Omaha during the Ak-Sar-Ben carnival and make their fail purchases at the same time. The fact that they can have their railread fare paid provided they do buy their goods here is bound to be a drawing card and consequently jobbers are preparing for a heavy house trade. Retailers will of course also come in for nt toward good, strong markets for some

#### Sharp Advance in Sugar.

The principal feature to the wholesale grocery market hast week was the advance in all grades of sugar, amounting to be per hundred. The market is very firm at the higher quotations and another advance in the near future would not be surprising. Befinerine all over the country are well sold up and are taking orders to be well sold up and are taking orders to be filled in turn, as they anticipate a still greater increase in the volume of trade in the next few weeks. Joshers at this point state that the demand is something enormous for this season of the year and much heavier than in several years past.

The canned goods situation shows but little change since hast report. The only fluctuation of any importance is the advance on tomatoes of Plance, owing to the reports of light pack in the west, which have given eastern packers an opportunity to raise their prices. Choese is still going up and present indications are that prices will be still higher in the near future. The long continued drouths in Wisconsin have dried up the pastures to such an extent that the production of choose has been greatly diminished. At the same time home consumption has been increasing and the demand from abroad is also unusually heavy for this season, so a shortage has been developed.

heavy for this season, so a shortage has been developed.

The market on dried fruits is also in a very strong position. This is particularly true of apricots. It is thought that the prices on the new crop of prunes will shortly be announced and the general opinion is that while the small sizes may be quoted a little lower the large sizes will be higher than they were a year ago.

There has not been much change in the coffee market since a week ago. The demand at the present time is very light and prices are weak although an attempt was made to spring the market \( \frac{1}{2} \). It was nearly a failure, however, and did not increase the amount of buying to an appreciable extent. Roasted coffee is still quoted the same as it was a week ago. The association in control of the Call-fornia almond situation announced its opening prices last week. It is claimed that the crop of imported almonds is smaller than usual and for that reason the this year. The association on that ac-count has advanced its prices 3%4c over last year's figures. Other lines remain just about where they were a week ago.

Bo far as price fluctuations are concerned the hardware market has been quiet during the past week. There have been no changes of enough importance to be worthy of mention and jobbers are not anticipating any for the immediate future. As a general thing they are looking for a good healthy market as a result of the big demand that is expected all over the country. Everything at the present time seems to point toward a better feeling among the iron and steel manufacturers and unless they misjudge the situation they will have plenty of business during the coming season. Hardware Market Quiet. season.

Locally jobbers seem to find nothing to complain of. Trade is moving along in nice shape and preparations are being made for a good lively fall demand. In a short time now the advance orders will begin to move out at a rapid rate, as it is not long before cold weather goods will be strictly seasonable. Collections are in good shape and in fact everything is in a most satisfactory condition.

## Dry Goods Market Firm.

The local dry goods market is still char-cterized by the same activity that has revailed throughout the senson. Orders or fall goods are coming in at a good. rapid rate, and traveling men are greatly pleased over the outlook for future busi-ness. They say merchants are in elegant shape and are all counting on a big fall shape and are all counting on a big fall demand.

The market is in good shape, taking everything into consideration, and the cotton goods market is particularly strong. The situation is, of course, very unsettled as yet, for no one can tell what the price of cotton will be. Manufacturers are basing their calculations on the 8-cent cotton, but whether that is where it will land or not is still a matter of speculation. A representative of a local house, in speaking of the situation, said that he would not be surprised if cotton did not go down to the 8-cent mark, and in that event there would be some lively hustling for goods. The prices that are being quoted now are 121-2 per cent higher than they were a year ago, but last year was, of course rather low. Underwoor, hosiery and such lines are being held at very firm prices and good stocks are hard to find.

There has been no special feature to the boot and shoe trade during the past week. Orders are still being received in good numbers and the number of buyers coming on the market is steadily increasing. Traveling men find a great deal to feel encouraged over and prophesy that before the season is at an end the records will compare very favorably with those of any previous fall. Advance shipments are being pushed out, particularly to the far west and mountainous regions, where they need winter goods early in the fall.

Rubber goods are also sciling well and fully as much business is being transacted as could be expected. Rubber coothing is selling in good shape, and especially is that true of mackintoshes.

Fruit and Produce. Good Demand for Boots and Shoes.

## Fruit and Produce.

Fruit and Produce.

Fruit and produce men reported another week of good trade. The local domand has been in unusually good shape for several weeks past, taking into consideration the hot weather. Shipping orders are also coming in freely. California fruits have been in big demand, but prices hold just about steady. Grapes, both home grown and California stock, are plentifed, and are meeting with renuy sale. Tokays are quoted at \$2 and Concords at 22,226. There is nothing particularly new in the vegetable line.

the egg market is still firming up and tations are now placed at 134 File, and recling is firm at that The supply tinues rather light, while the demand heavy Poultry remains just about dy at last week's prices. Butter is also syster season is once more on and dealers report the quality of the stock received so far as exceptionally gool for the epening of the season. The quotations will be found in another column.

COMMERCIAL AND FINANCIAL

Trade is Quiet on Account of Prospect of Holiday Monday.

Bearish Feeling Prevails with Oats -Provisions Are Quiet and Steady, Helped by Light Hog Receipts,

CORN IS FIRM, BUT THERE IS LITTLE DOING

transactions very sparingly, Trade was chiefly for the local account. October, now the active deal, opened at 751597514c, sold between 75@75%c and closed steady, %c over yesterday at 75%c. The chief help came from higher Liverpool and Paris cacame from higher Liverpool and Paris ca-bles and the small deliveries on September contracts. Less than a million changed hands during the ferencon. The pit was half deserted most of the session. New York reported 20 loads taken for export. Clearances in wheat and flour were equal to 586 bu. Primary receipts were 1.11a.000 bu., compared with \$55.500 bu last year. Minneapolis and Duluth reported 446 cars, against 391 last week and 638 a year ago. Local receipts were 427 cars, 27 of contract

Local receipts were 427 cars, 27 or contract grade.

Corn was firm, but trade was on a moderate scale. The tone was sustained by higher cables, hot weather west, light country offerings and the fact that there were no deliveries on September contracts. October sold between 250,300 cand closed 140 cars. Oats opened firm, but turned heavy, as there seemed to be a bearish feeling prevalent, despite the corn firmness. The receipts, 545 cars, and a heavy estimate for Monday were the depressing factors. October sold between 254,421 cc, closing 140 cd down at 21 cc.

Provisions were quiet but steady, helped by light hog receipts, small delivery and decreasing stocks. Deliveries on September contracts were as follows: Pork, 1,000 bbis, lard, 4,000 terces; ribs, 550,000 lbs. There was a fair cash demand. October pork sold between \$11,00 iii 120 cm lbs. There was a fair cash demand. October pork sold between \$11,00 iii 120 cm lbs. There was a fair cash demand. October 1,000 bbis, lard, 4,000 terces; ribs, 550,000 lbs. There was a fair cash demand. October 1,000 bbis, lard, 4,000 terces; ribs 550,000 lbs. There was a fair cash demand. October 1,000 bbis, lard, 4,000 terces; ribs, 550,000 lbs. There will be no session of the board Monday—Labor Day.

CONDITION OF ENGLISH MARKET.

Weather is a Depressing Influence, but Much Money Changes Hands. LONDON, Sept. 1.—Much money changed hands in the market today. New issues of capital, aggregating nearly £2,000,000, had to be met, besides £2,500,000 interest and

dividends distributed.

The attendance on the Stock exchange was small and there was an absence of business, generally dull weather proving depressing. Home rallways were practically at a standstill. Northwesteras were easier and the distributes on the historian and and the disturbances in the shipping and other trades at Glasgow, consequent on the

and the disturbances in the shipping and other trades at Glasgow, consequent on the probability of quarantine regulations tending to affect Scotch railroads by causing a falling off in traffic receipts for a few weeks. The continuance of continental inquiry for Chinese properties resulted in a general advance of from ½ to 1 point, reflecting the improved opinion of operators on the latest developments in the far east.

There was much irregularity in Americans. At the opening they were duil and below parity, but grew firmer and closed quiet. The indisposition to do business was owing to the fact that the New York Stock exchange was closed. Southern Pacifics were especially firm. Atchisons were in renewed demand on increased profits in place of the expected decrease. Copper and Kaffirs were steady.

The financial authorities insist that the £24,000,000 Bank of England reserve is none too large and that to prevent an outflow of gold to New York or Paris it is essential to No. 2 red, cash, clevater, 72c; track, 38g 334c; September, 72c; October, 73c; December, 73c; October, 73c; December, 73c; October, 73c; Octob

CATTLE—As is generally the case on Saturday there were practically no cattle on sale today, only a few odds and ends being offered, for which there was little demand, neither packers or yard traders wanting supplies on Saturday.

The cattle market has been in good shape all the week. The supply has been just about normal, varying but little from last week's receipts or from the corresponding week of last year. The demand was good for all kinds of cattle, with the possible exception of common grades of cows, and prices paid were very natisfactory. The bulk of the receipts all the week were made up of western cattle and were bought largely by yard traders to be sent back into the country as feeders. Packers were looking for killers, but found comparatively coloring for kill

looking for killers, but found comparatively few that were suitable for that purpose.

Cornfed steers have not been in very heavy supply the past week. The demant, however, was good for the better grades and the market on most days was in good shape. For the week it is safe to call it strong to 10c or 15c higher in some cases. The medium grades, such at come in competition with the westerns, have not moved so readily, and are probably no more than is stendy for the week.

The cow market has been the one bad feature of this market and of others as well. The supply was liberal and the tendency was in the direction of lower prices on all grades. Even the best kinds are steady to a dime lower, and from that the market shades down to 10025c lower on the common stuff. It takes good cows now to bring \$3 or over, and commission men are advising their shippers not to sent in too much cow stuff at the present time and give the market a chance to recover. Canners are not so much different than they were at the close of last week, though they are a little lower.

Bulls have sold fairly well all the week, though the course heavy kinds are a little are a little lower. Bulls have sold fairly well all the week.

Bulls have sold fairly well all the week, though the coarse heavy kinds are a little lower than they were a week ago. The good stock bulls, however, have brought good strong prices all the week. In spite of the fact that the bulk of the ecceipts this week were on the feeder order the market is higher than it was at the close of last week. The good heavyweights or yearlings of good quality are legisleclose of last week. The good heavyweights or yearlings of good quality are 106/15c higher for the week. The common kinds, however, are not any better, prices remaining just about steady. Stock heifers have also advanced about the same amount, but cows have not shown much improvement. Western grass cattle were in good supply all the week. The few bunches that were good enough for killers brought just about steady prices. Texas cattle also arrived in good numbers and may be called steady for the week. Cows are all the way from nearly steady on the best kinds to 103/15c lower on the common stuff. Feeders are

lower on the common stuff. Feeders are legisc higher on the good, heavy cattle for the week, while the common stuff is about steady. Representative sales: BEEF STEERS Av. 17.

BIG INCREASE IN BANK NOTES Total for the Year Amounts to \$82,-152,018-Increase for August,

84,208,454. WASHINGTON, Sept. 1 .- The monthly irculation statement issued by the comptroller of the currency shows that at the close of business August 31, 1900, the total circulation of national bank notes was \$324,223,810, an increase for the year of \$82,152,018 and an increase for the month of \$4,208,454. The circulation based on United States bonds was \$290,641,356, an increase for the year of \$84,468,007 and an increase for the month of \$4,193,922.

The circulation secured by lawful money amounted to \$33,582,540, a decrese for the year of \$2,315,989 and an increase for the month of \$14,522. The amount of United States bonds on

deposit to secure circulating notes was \$285,790,280, and to secure public debt, \$88,840,280.

CREATE NEW CATHOLIC SEES Father Carroll of Dubuque Likely to

Be First Bishop of Sionx City. WASHINGTON, Sept. 1.-It is learned from an official source that by reason of Archbishop Ryan's petition to Rome, supplemented with that of the Philadelphia suffragan bishops, the new see of Altoons probably will be created this month. It is believed that Very Rev. J. P. Garvey, D. D. president of the St. Charles college at Overbrook, Pa., will be the first incumbent of

the diocese. It is understood that nothing definite concerning the creation of Sioux City, la., as a diocese will be done until after Archbishop Keane's return from Europe. Father John Carroll of Dubuque, however, is said to be Its probable appointee.

President Stays in Washington. WASHINGTON, Sept. 1.—The date of President McKinley's departure for Canon has not been fixed. He had hoped to se able to leave this week, largely on account of the condition of Mrs. McKinley's health, but the important character of the Chinese negotiations necessitated his presence here at least until the present crisis is passed. At the White House everything is in readiness for the president's departure, but it is now believed that he and Mrs. McKinley will not get

away until the middle of next week Denies Ill-Treatment of Crenshaw. WASHINGTON, Sept. 1.-The War department has received a telegram from General Shafter at San Francisco saying that he has carefully investigated the statements that have been made relative to the treatment accorded the late Captain Cren-

shaw of the Twenty-ninth infantry. The general says:

There is not the slightest foundation of fact in the newspaper articles in which it is claimed he had not received proper treatment while on board ship and at the hospital at the Presidio. It is shown, on the contrary, that his case received special

#### care and attention. Report by mail today. SHIPBUILDING FOR A YEAR Record for 1899 in Many Respects

Exceeds that of Any of Its

Predecessors.

WASHINGTON, Sept. 1 - Complete offi-cial returns for the fiscal year ended June 30, 1900, show that 1.446 vessels of 392,168 gross tons were built and documented in the United States. Since 1853 this record has been exceeded only twice-in 1861, when 415,740 gross tons were built, and in 1874, when 432,735 gross tons were built.

The construction may be classed according to the following types Schooners. schooner barges and sloops, 499, of 109,605 gross tons; great lake steam vessels, 25, of 7,847 gross tons; canal boats and barges. 523, of 74,860 gross tons, ocean screw steamships, 20, of 60,369 gross tons, of

KANSAS CITY. Mo. Sept. 1—CATTLE—
Receipts this week. 29,400 head; corresponding week instream to the second manufacture of the second manufacture of

pigs. 34.5025.00.

SHEEP AND LAMBS Receipts this week, 11.000 head; for corresponding weak last year, 18.000 head; trade active all the week and prices ruled a trifle higher, lambs, 84.25025.00; multions, 81.25025.00; western multions, 81.25025.00; feeders, 81.00074.25; culls, 82.50025.00.

phia.

The total tonnage built and documented on the great lakes during the year, 125 vessels of 130,611 gross tons, is the largest in the history of that region. The total for the middle Atlantic and gulf coasts, 805 vessels of 135,473 tons, exceeds any record since 1872. The total for the New England coast, 199 vessels of 72,179 gross tons, has not been equaled since 1891, while the product of the Pacific coast, 200 vessels of 40,396 tons, is surpassed only by the returns of 1898 and 1899. Construction on Mississippi river and tributaries, 217 vessels of 14,509 tons, is 9,000 less than 1899. The foregoing figures do not cover yachta or government vessels.

Strikers and Employers Arbitrate.

rush was made for the door. A plate glass window was demolished and several persons were severely hurt by falling glass. Others were knocked down and hadly briused. A detail of police finally restored order. No one was seriously injured and nearly all were cared for at a nearby drug store.
