That shows the opinion my workmen have of me.

I am president of a street railway company in Cleveland which employs 1,800 men. The men of another street car company struck and it was rumored that the strike was about to extend to our line. I did nat believe it, because our mon were all union men and did not have the grievance which caused trouble on the other line. I was about to leave home, but decided that I could not go until I found out what the men would do. I asked my foreman to lay the situation before the men and ask them what they expected to do. He did so and the men who represented the various employes notified me that I could leave with safety and that the men would protect the property in my absence.

industries which employ many men. I have always had much to do with laboring men and I have slaws's been their friend. (Several hoodlums who stood near the door hissed and hooted when Senator Hanna made this remark and attempted to stoy the speech. The speaker was not in the least disconcerted by the interruption and remarked. "That's not the kind of men I employ." The audience was theroughly in sympathy with Mr. Hanna and his retort squelched the disturbers so effectively that there were no further interruptions.

Four years ago Mr. Bryan remarked while in Chicago that he was going over to Chapin, Mich. to speak to Hanna's men. I am president of a large coal company which has mines at that piace and I telegraphed the superintendent of the works to give the men a half holiday that they went to his meeting. He began to abuse me and the men got up and left the half. That shows the opinion my workmen have of me.

Recognizes Union Labor.

It was my privilege to be the first employe of labor in Ohio to recognize union labor. In 1811 the bituminous coal workers organized and asked that the operators form an organization. We agreed to this and a strike which threatened a little later was averted by a consultation of the two organizations. I immediately became convinced that the operators had found the proper way of dealing with labor and that the laborers had found the proper way of dealing with labor and that the laborers had found the proper way of dealing with their employers.

There is no reason for pitting class against class. Labor and expital have gone hand in hand in building up our country. The two great forces have accomplished wonders by uniting and working harmoniously. When both gides recognize the rights of others and are willing to deal fairly there will be no strikes. That time is rapidly coming. (Applause.)

As a business man let me warn you that just as soon as anything occurs to disturb the political conditions of the United States the prosperity we now have will vanish and we will have worse times than we had in 1893 and 1894. 'sn't it better to let well enough alone? We know we are better off than we were four years ago. Every day of my life I am working for the interests of laboring men. When I make this statement I want you to believe it until the contrary is proven.

You remember that four years ago the part of the meeting. He spoke on the variassage of the Wilson bill broke the protection on American labor and resulted in the work shops shutting down to a considerable extent. Many men were discharged and the manufactories were idle for nearly two years. The people learned a lesson from that and just as soon as they had an apportunity to get to the rolls they. had an opportunity to get to the polis the chose the man of all others who had been the friend of the workingman. William Mc-Kinley. (Prolonged applause.) Everyone knows who knows anything about public affairs that from the day William McKinley returned from the four years' service he devoted to his country's cause and began his public career as a congressman he devoted his whole time to that great economic question, protection. He was the one man of all others in congress to whom the workingmen went when they wanted anything from congress.

United States. What did he do? Just as soon as he was inaugurated and had taken the oath of office he called congress in special session in order that the Wilson-Gorman bill might be repealed and a bill substituted along the lines of that great measure of protection which he had originally fathered. In less than thirty days after the Wilson bill had been killed and the Dingley bill had become a law fires weer lighted in the furnaces, the wheels of commerce began to turn, work was offered

SAVE YOUR SKIN

How to Preserve Purify and Beautify the Skin and Complexion.

To preserve, purify, and beautify the skin, and prevent pimples, blotches, blackheads, redness, roughness, yellow, oily, mothy skin, chapping, and many other forms of skin blemishes, no other skin or complexion soap is for a moment to be compared with CUTICURA SOAP, because no other soap reaches the cause, viz., the clogged, irritated, or inflamed condition of the Porce

Humors and Dandruff.

Cleanse the scalp and hair thoroughly with a warm shampoo of Cuti-cura Soap, rinse with warm water, dry carefully, and apply a light dressing of CUTICURA, purest of emollients, gently rubbed into the scalp. This simple, refreshing, and inexpensive treatment will clear the scalp of crusts, scales, and dandruff, soothe irritated, itching surfaces, stimulate the hair follicles, supply the roots with energy and nourishment, and make the hair grow upon a sweet, wholesome, and healthy scalp, when all else fails.

How to Make the Hands Soft and White in a Single Night.

Bathe and soak the hands on retiring in a strong, hot lather of CUTICURA Soar. Dry thoroughly and anoint freely with CUTICURA Ointment, the great skin cure and purest of emollients. Wear during the night old, loose kid gloves with the finger ends cut off. For red, rough, chapped hands, dry, fissured, itching, feverish palms, shapeless nalls, with painful finger ends, this one night treatment is simply wonderful and a blessing to all afflicted with sore, chapped, rough, or tender hands.

about the present condition of prosperity in which everybody is a partaker.

The one question that should interest you in this campaign is, Do you want a change from the present conditions? Do you want to go back to the times of 1831 to 1857 or do you prefer that present conditions continue? If you do all you have got to do is to vote for the party that has made times good. Vote for the man who has always been the Friend of the workingman, President McKiniey. You haven't any special interest in the political ambitions of any man seeking the high office of president except in what such election will do for you.

Response for Mr. Bryan.

Today no laboring man who desires work Today no laboring man who desires work and will work need be without employment if he is industrious and sober. Every factory and industry is in motion. The reason is because of the confidence of the American people in the stability of our government. They are not alarmed for fear of the dollar they work for depreciating in value. Under the administration of William McKinley the dollar you earn is of the same value today, tomorrow and for all time. Four years ago we were told that there was not enough gold in the country to carry on business affairs. We were told that wages would go down and that employment would be reduced. All these predictions have failed. There is an abundance of money. If you haven't got it, it ance of money. If you haven't got it, it isn't because it can't be obtained on good security. The government is now borrowing money at 2 per cent, instead of 4 and 5 per cent, and instead of being a debtor nation we are now a creditor mation, having tion we are now a creditor nation, having leaned money to Germany, England and France.

The opposition says that the trusts have closed some factories. That's true, but

The opposition says that the trusts have closed some factories. That's true, but they have opened others ten times as large. Bryan predicted in congress that the Mc-Kinley tariff would be disastrous for the country. He said that timplate never would be manufactured in this country. But since the operation of the McKinley tariff the timplate industry has become a great factor in this country and today employs 140,000 men.

Bryan poses as antagonistic to trusts of all descriptions and yet during his four years in congress he never introduced a bill directed against a trust or monopoly. He never helped any one who had such a bill. We have before us two men running for the presidency. McKinley has proven himself a friend of the laboring man by making it possible for American factories to flourish. What has Bryan's record been with the laboring men?

The aisles were full and behind the outer rows of seats were banks of spectators standing, etxending beyond the curains of the tent and out in the rain and darkness. The traveling men announced their presence by a series of fraternal yells. Senator Thurston's arrival upon the platform was acknowledged by liberal applause.

There was absolutely not a foot of room to spare when R. W. Richardson called the meeting to order and introduced Hon. Charles J. Greene, who in turn presetned Senator William P. Frye of Maine. The strike in the coal regions of Pennsylvania was inaugurated by the action of the National Coal Miners association, and I say that from the beginning of the strike I have had the confidence of every officer in that union. I have done more than any other man in the United States to bring about a settlement in favor of the miners. Now, listen to me. I am going to tell you the truth. (A voice: "How about the powder?")
