HOTEL GUEST ASPHYXIATED

Mrs. Amanda B. French Blows Out the Gas in Her Room.

WAS A RESIDENT OF TEKAMAH, NEBRASKA

Found by Night Clerk in Dying Condition and Perished Before Physician Could Arrive.

Mrs. Amanda B. French, 65 years old, blew out the gas in her room at the Drexel hotel Friday night and when found at 8 o'clock yesterday was unconscious. She died before the doctor arrived. The body was taken to the undertaking rooms of the coroner, where an inquest will be held. A sea-in-law of the deceased will arrive today from Tekamah, Neb., where the body will be sent for interment.

Mrs. French arrived in Omaha from the east Friday night and about 8 o'clock

called at the Drexel hotel, Sixteenth and Webster streets, and asked for a room. She signed the register, "Mrs. Amanda B. French, Tekamah, Neb.," and was assigned to room 12. A half hour later, in response to a call for a chambermaid, the hotel manager's wife reported at Mrs. French's room and made some arrangements for her personal comfort. The guest said she wanted to get up early to catch a 6 o'clock train for Tekamah, so left a call for 5 o'clock. This was the last seen of her until that hour yesterday morning.

Shortly before 5 o'clock the night clerk knocked at the door of room 12, but there was no response and repeated rappings failed to arouse the occupant. He then forced the door. A great volume of gas-charged air rushed out into the hall, nearly stifling him. In the dim light he could see the body of the woman stretched upon the floor.

He hastily turned off the gas, which was on full force, and opened the window and transom, both of which had been closed. He then sent for a physician, but it was evident that the patient was past recovery. She gasped a few times and died.

He has been unable to find any of the men named in them and no arrests have been made. Several men assert, on the contrary, that the sheriff's deputies, or men purporting to be deputies, have visited their places of residence and threatened them with arrest if they appeared at the polls to vote.

One of the warrants in Sheriff Power's possession is for the arrest of Clay Elgin, 214 North Thirtieth street. Deputy Neve says he was unable to find Elgin. Elgin asserts that a deputy came to him at the residence mentioned and without asking his identity told him he had a warrant for a man named Elgin, that he did not intend to arrest the man unless he tried to cast his ballot next Tuesday. Elgin says he discovered later that he had been pointed out to the deputy by the landlady at his boarding house as he stood on the front walk and that the threats of Sheriff Power's assistant were uttered only to scare him out of voting.

EDUCATIONAL NOTES.
 Prof. R. H. Childeren, director of the Sheffield Scientific school at Yale, has been made professor of physiology in the Yale Medical school.

BOTH PARTIES CLAIM STATE

Chairman Lindsay Reaffirms His Estimate of a Few Days Ago.

HALL MAKES A SLIGHT REDUCTION
 Secretary Jordan of the Republican County Committee Claims Douglas County for His Party by Twenty-Five Hundred Majority.

The state and county committees of the two political parties have completed their campaigns, compiled their polls and are now sitting to await the reward, as they believe, of duty well done. The final official forecasts given below were issued yesterday, the first statement being signed by Chairman H. C. Lindsay of the republican state committee.

Democrats Make a Few Claims.
 Chairman R. L. Hall of the democratic state committee was recently quoted as claiming Nebraska by a plurality of from 18,900 to 20,000. His present belief, however, is that Bryan will win by a plurality of from 16,000 to 18,000. "There is no joint ballot, insuring the election of two republican United States senators."

FALLON WILL LOSE HIS VOTE

First Vote Barred from Polls on Legal Point that Stepfather is Not in Reality a Father.

Twenty-one years ago J. M. Fallon was born in England. When he was a few months old his father died. His mother married an Englishman a few months afterward and came to the United States, leaving her son in England. When the boy was about 4 years old his mother brought him to America, where he has lived ever since. Before he became of age his stepfather took out naturalization papers. Supposing that he was a citizen of the United States, Fallon tried to register in the Fourth ward, but was refused by the registrars, who were unable to decide upon his citizenship and referred the man to City Attorney Council.

After looking up the constitutional provisions regarding naturalization Mr. Council decided that a stepfather is not a parent in the sense intended in the constitution and that the action of the stepfather had no effect whatever upon the citizenship of Fallon, who is still a British subject in spite of his long residence in the United States. The constitution provides that minor children of persons who are naturalized become citizens without

QUAINT FEATURES OF LIFE.

A farmer in southern Missouri recently received some garden seeds from the Department of Agriculture in an official envelope, on the outside of which was printed the usual warning: "Penalty for private use, \$300." He immediately sent them back, with a letter to the effect that he had not used one of them and was not subject to any fine.

The passion for foot ball saved an entire class at West Point from doing penance for five months. The second class had been punished by being ordered to do constant guard duty. Then the officers discovered that the foot ball team would be a failure without three big members of that class. So the whole class was pardoned that these three might play on the team.

A man who recently visited a pie factory in Chicago thus describes it: "The day we were there a special run was being made on pumpkin pies, and I looked in vain for any signs of pumpkin rinds. One of the foremen refused to tell me, in strict confidence, that real pumpkin was never used in pumpkin pies at present, except possibly in a few remote and very primitive New England villages. The substitute was a mixture of sweet potatoes, apples and cheap flour, flavored with chemical extract. I tasted some of the stuff and was satisfied he was telling me the truth. Cranberry pie contains only enough cranberries to 'make a showing,' after the manner of the oyster in the church fair stew. The rest is apple jelly, colored red and flavored. I have forgotten the other substitutes employed, but these will give you a general idea of the morality of the business. The average output of the foundry was one a second, or about 36,000 pies for a working day. The manager told me they were shipped all over the pie belt in specially prepared crates."

"77"

A swollen face, the characteristic epidemic symptom of Cold or GRIP

Tic-doloureux—Swelled Face.
 The doctors say this year that epidemic Grip has taken on a new phase, the first symptom being a puffing up of one side of the face, extending even to the conjunctive palms and by most of the old well known symptoms of Influenza, Catarrh, pains and soreness in the Head and Chest, Cough and Sore Throat, General Prostration and Fever.

"77" meets the epidemic condition and cures it short promptly. If it should not yield at once, alternate with Specific No. 8. At drugists, 25c.
 Dr. Humphrey's Manual on the cure and treatment of the sick in all ailments, (especially children) mailed free.
 Humphrey's Homeopathic Medicine Co., Cor. William and John Sts., New York.
