which the bears were able to effect. With the wiping out of margins stocks were thrown on the market to protect brokers and commission houses which were carry-ing them for the customers. The call loan rate went to 2½ per cent during the day, but dropped back to 2 per cent, partly due to the receipt of a \$500,000 credit by one of the banks for Australian gold arrived at San Francisco. There is no expectation, however, that closer conditions on the money market will be escaped in the near future. Bankers continued to express confi-dence that there will be no actual strin-gency, but such large requirements for credits due to the heavy financial transac-tions in progress remain still to be met that sentiment over the money outlook is nervous.
