How to Secure Funds.

One serious question that has arisen is how to secure the necessary funds for the construction of new buildings. The constitutional 5-mill levy limit would not permit an appropriation large enough for the work and the necessary material. To obviate this difficulty it has been suggested that the state issue bonds for the amount of money required and that these bonds be purchased by the state with the permanent ducational funds, of which there is now about \$180,000 uninvested. This plan is favored by many, not only as the mospracticable method of raising the money for the building, but also as affording a safe and reliable investment for the permanent funds, of which there is always more than \$100,000 uninvested.

LINCOLN, March 1 .- (Special.) - Careful and conservative estimates, based on present values of building property and made after a thorough examination of the ruins, place the damage by fire at the penitentiary at between \$150,000 and \$200,000. This is slightly less than the early estimates. which were based on the cost of the building rather than on its actual value. Experts say that the property destroyed by the flames was worth about half its original cost, this being due principally to the decrease in the value of building material and labor. As none of the property was insured the destruction and damage is a complete loss to the state. Some estimates of the loss run as low as \$75,-000, others go up to over a quarter of a million, but the state authorities are united in the opinion that the destroyed preperty can be replaced for not much over \$150,-

This morning the charred remains of George Pflueger, serving a life sentence for killing his wife, were found in a cell, covered over with debris, but still reccounty in 1893 and when sentence was pronounced he told the trial judge that no person would ever hear his voice again. National Good Roads Association Promotes a Plan for Series of Practical Demonstrations.

CHICAGO, March L.-Through the efforts of the National Good Roads association arrangements have been made for the giving of a series of practical demonstrations in the building of good country roads along the lines of the Illinois Central, between Chicago and New Orleans. During the present month a special train carrying a commissary coach and flatcars bearing modern road-making machinery will, be run out of New Orleans and at twenty or more points on the way to Chicago the train will be sidetracked while experienced men give instructions in road-making. At each point about a mile of roadway will be built. The train will be preceded by advance agents who will endeavor to interest farmers in the work at the points agreed upon. The farmers will be expected to provide

the material for the demonstration. ITCHES TO SWING A HATCHET
