# Scrofula

the children of blood poisoned parentage must accept, with all its humiliating consequences. It is an inheritance that makes one poorer; that brings wretchedness and disease instead of health and riches, for the child whose ancestral blood is tainted with Scrofula or the loathsome virus of Contagious Blood Poison is unfitted for the arduous duties of life so long as any of the transmitted poison remains

in its veins. Scrofula manifests itself in various forms; swollen glands about the neck and throat, catarrh of the head, weak eyes, hip bone disease, white swelling and offensive sores and abscesses are familiar symptoms, attended usually with loss of strength, poor digestion and pale or bloodless complexion. The skin is sometimes most dreadfully affected, eruptions breaking out on all parts of the body. Scrofula destroys bone, tissue and flesh; no part of the human system escapes its withering, benumbing touch.

When nineteen years old, and about one year after the birth of my first child, the glands on the left side of my neck began to swell. Four of the places were lanced and became open running sores; risings came under my left arm, and the discharge was simply awful. The doctors said I had the worst case of Scrofula they had ever seen. I took iodide of potassium, but this nor the other drugs given for this disease brought relief. When the physicians advised me to have the glands removed, I decided to try S. S. S. A few bottles cured me completely; no signs of the terrible disease are left.

MRS. RICHARD WASSON,
Golden Corners, Ohio.

Parents whose blood is pois-oned by their own misdeeds, suffering for the sins of some remote ancestor, must restore their own blood to its normal purity and strength, or they cannot expect healthy, robust children. S. S. S. cures Scrofula, like other diseases of a deep-seated constitutional charac-

purity to the profoundly poisoned blood, and the rich, strong blood that is carried to the swollen and diseased glands absorbs and destroys the tuberculous deposits, and the painful, disfiguring sores and other evidences of Scrofula disappear. S. S. S. should be begun immediately upon the appearance of the first symptoms, or where there is a known predisposition to Scrofula. Our medical department will be found of great help to those who are struggling with this wasting disease of heredity or any other blood trouble, and we invite you to write us. Should you or any member of your family need advice, our physicians will cheerfully give the information you desire, for which we make no charge. Book on
