May Corn Breaks Crop's Price Record and Closes One-Eighth Higher.

PHILLIPS BUYS MILLION BUSHELS OF JULY

Liverpool Fails to Support When: Advance and May Tumbles Back Into Pit-Liquidation in Provisions Causes Market to Decline.

CHICAGO, April 23.—May corn broke the crop price record again today and closed ac higher. Wheat broke under iquidation, closing Pac lower. Oats closed ac clown and provisions 21,055c to 125c de-tressed.

liquidation, closing Hge lower. Oats closed are down and provisions 25,055c to 125c depressed.

The corn market clung firmly to its strong position, and, while today's trade was probably loss than yesterday's, in point of quantities changing hands, it was nevertheless quite active. The motive for speculative acts was that of yesterday, namely, the concentration of long May corn in the hands of George H. Phillips and his following. The desire for profits, which is always a factor, was gratined to a limited extent, but the basic strength of the market was not impaired. At the opening longs offered liberally, but so sharp was the demand that in the conclusion sales were made simultaneously from 45c to 485c, compared with yesterday's close at 485c. Offerings, both of May and July, the latter being also in excellent demand, suddenly ceased and both shot upward, May touching 17c, making a new high record for the crop. Realizing sent May back to 48c, but this was followed by another rally to 47c. During the closing hour of the session, the wheat weakness caused some increase in the offerings by longs and May worked down to 46%c, but the close was strong and 18c over yesterday at 46%c. July sold between 44%r441sc and 454c, closing 19c, Phillips was credited with buying 1,00,000 bushels of July. His purchases of May, already approximated at 5,000,000 to 10,000,000 bushels, were much buying 1,000,000 bushels of July. His pur-chases of May, already approximated at 8,000,000 to 10,000,000 bushels, were much loss. Receipts were 182 cars, thirty-eight of contract grade. A report of a bullish situation in the country created consider-

Much wheat with which buils loaded themselves yesterday, was dumped back into the pit today because Liverpool falled to follow the advance on this side. May opened by the combined influences of the corn strength, heavy seaboard clearances and confirmation of very unfavorable crop prospects in Prussla to get the market up to 72 to Domes'ic crop reports were as glowing as ever, and longs sought to take profit and in so doing broke May to 71 to 12 t

Casts opened steady and advanced early, a sympathy with corn, and, although the sulge was lost on profit-taking, the close was steady. The general trade was scattered. A feature of the session was the theral scale on which a local operator ought May and sold July, the latter being the local operator of the session was the state. Resembly were bought May and sold July, the latter being at 12c discount at the close. Receipts were the cars. May sold between 26%c and closed 15c lower at 25% 25%c.

Profit-taking sales coming on a dull market, caused the provisions list to ease off. July pork closed 12%c lower at \$14.65. July lard 22% 6c down at \$7.57% 48.00 and July ribs 22% 6c depressed at \$7.57% 48.00. Astimated receipts tomorrow: Wheat, 70 cars; corn, 65 cars; oats, 145 cars; hogs, 27.600 head. cars; corn, 65 cars; cats, 145 cars; hog 2,000 head. keyr, Sc. Dressed, quiet; turkeys, 10@10%c METALS-There was a slight reaction METALS—There was a slight reaction in the in London today, due, it was stated, to a renewal of speculative interest, despite the fact that the statistical outlook is as bearish as ever. The close abroad was steady, with spot quoted at £117 28-61 and futures at £11 15s. The local situation was a featureless affair and prices did not vary throughout the session, closing on the somewhat nominal basis of £5, with demand dormant. Copper in London was a shade easter under liquidation and closed at £70 7s set for spot and £70 7s set for futures. While holding quite steady the local market was slow at \$17 for spot, Lake Superior and \$16.62 % for casting and electrolytic. Lead was inactive but nominally at unchanged prices, while in London a decline of £2 is was noted to £112 6s. Trading in both markets was slow. Speiter remains dull and without important feature either here or abroad at unchanged prices, which were at £1.5595.15. Domestic iron markets ruled rather quiet, but about steady at old prices. Glasgow warrants, 54s 6d, and Middlesborough, 45s 14d.

MOVEMENTS OF STOCKS AND BONDS. Market Changes from Buoyant Elation

Market Changes from Buoyant Elatton and Almost Collapses.

NEW YORK, April 23.—Today's stock market presented even more variety than that of yesterday, although the high record of transactions established yesterday was not disturbed by today's business. Dealings were on a smaller scale than yesterday. In fact it was not until the argent selling movement of the last hour had gained full headway that the market presented anything like the animation which characterized it yesterday. Speculative sentiment ran over pretty much the whole gamut of emotions from that of buoyant elation during the morning to something like collapse in the afternoon.

Although the market closed at net declines throughout, extending in some cases to 3 or 4 points, or even more, there was a time during the morning when the level of prices was materially higher than yesterday and the market had the appearance of a full resumption of the buil speculation. The high-priced milicoal stocks continued to be the principal subject in the speculation. Southern Pacific Atchison preferred moved upward and there were points of strength among the southwesterns. Burlington and Northern Pacific were strong and held better than the average of stocks in the late break. Among the specialties Amalagimated Copper recovered quite vigorousity from yesterday's depression and United States Steel stocks made a show of strength for the first time in several days. These were the principal centers of the early strength in the market, but their influence was radiated pretty generally through the list. It would be somewhat difficult to assign cause for the early strength or the late weakness, as it seemed to depend little on news of the day. The motives of the frars or suspicions of what others were doing.

Powerful support and violent manipulation were resorted to in the early dealings.

traders were confined for the most part to fears or suspicions of what others were doing.

Powerful support and violent manipulation were resorted to in the early dealings and the success of these measures in turning prices upward caused a heavy covering movement among the large short interest which was formed yesterday. There were intimations during the morning that an official statement regarding the Burlington deal would be given out later in the day and a rumor was current that it would be found to provide an exchange of bonds to the value of 180 per cent and a cash payment of \$20 per share, together with a cash payment of \$20 per share, together with a cash payment of \$20 per share for the next dividend. The report that the price of steel rails was to be advanced to \$28 per ton was the cause of the advance in United States Steel, although professional manipulation was much in evidence, as it was in all parts of the markets. The announcement over night of an engagement of \$1,000,000 in gold for export seemed to have litle effect on sentiment and reports were set affoat that large blocks of government bonds were held ready to offer for redemption, which provided gold for any export demand without affecting the money market. The source of this available supply of government bonds were held ready to offer for redemption, which provided gold for any export demand without affecting the money market. The source of this available supply of government bonds were held ready to offer for redemption, which provided gold for any export demand without affecting the money market. The source of this available supply of government bonds was not disclosed. Sterling exchange also leadwood Horn Silve it and the gold shipment. Probably its recovery later in the day was a large influence in the renewed uneasiness manifest over the money outlook.

The sub-treasury is again taking money

later in the day was a large influence in the renewed uneasiness manifest over the money outlook.

The sub-treasury is again taking money from the market and New York exchange in the interior has fallen back to a discount, indicating a cessation of the supply of funds, from that source. The adjournment of the Burlington directors without offering official announcement was a disappointment. Success of the buils getting prices up was offset by the very heavy offerings to realize attracted by the advance. This was especially so in the United States Steel stocks, owing to the suspicion prevalent in Wall street that heavy liquidation is going on in these stocks on the part of former large interests in the individual companies absorbed by the combination and who are retiring. Bear selling also became very bold and extensive when the futility of the buil efforts to sustain the market began to be seen. The closing was weak at the lowest and showed such violent declines from the top level as 5½ in Sugar, 4½ in St. Paul, 4½ in Brooklyn Transit, 4 in Consolidated Gas, 4½ in Rock Island and from 1 to over 3 points in a long list of important stocks.

The bond market was active and irregu-

CATTLE—There was a liberal run of cat-tle here today, but the demand on the part of packers was in good shape and the market ruled active and fully steady on the market ruled active and fully steady on the more desirable grades.

The bulk of the receipts were again composed of beef steers, for which there was an active demand. The better bunches were picked up early in the morning at fully yesterday's prices, and the general run of cattle also sold readily at just about steady prices. It was a good, active market from start to finish, and everything was out of first hands in good season.

There were very few cows and heifers on sale this morning, and the market could be quoted generally steady. The better grades sold without difficulty at fully steady prices, but the trade on the common kinds was a little uneven, but in most cases prices looked steady.

HOGS-There was the heaviest run of hogs today that has arrived in some time and packers took advantage of the opportunity to pound the market a little. The market started out weak to 2½c lower, but only a few hogs changed hands on the start. Packers finally raised their bids so that the market was about steady with yesterday and the hogs began moving toward the scales at a rapid rate. The long string sold at \$5.80, with the prime hogs going from \$5.82½ to \$5.20, and the light mixed hogs from \$5.77½ down. The bulk of the hogs changed hands in good season, but on the close the feeling was not quite as good, particularly on the light hogs, and the close was much like the opening. The general market was only a shade lower than yesterday, with the range about the same. Representative sales:

No. 66... 34... 75... 73...

that the market as a whole could be quoted steady.

Feeders have of course felt the effects of the decline on fat stuff to a greater or less extent, but still the demand is large enough to take what is coming at very satisfactory prices.
