CAN'T ASSESS SO FAR BACK

Treasurer is Limited to Last Three Years for the Purpose of Ferreting Out Taxes.

In the case of August Beresheim. gether they started eastward, reaching guardian of J. B. Keeline, in the district reach Denver this morning. The greater court, Judge Wheeler yesterday morning rendered a decision in part favorable to spent in Denver, the party leaving there treasurer in assessing property omitted from assessments from 1896 to 1900, inclusive, and the holding of the court is that the treasurer may make the assessment for the years beginning with 1898, by authority conferred by a section of the code of 1897, but that he may not make it for the years prior to that time, for the reason that the act conferring the authority must be held not to be retroactive, else ft must be held to be unconstitutional. The amount of taxes involved in this case Mrs. A. B. Shaw is the president, reaching for the reason that there are several similar cases pending and in addition to this all of the assessments by the treasurer as the result of the work of the total amount at stake being a great many thousand dollars. All of the work of years, the presumption being at the outset that he and the treasurer might reach liam Arnd, was appointed to raise the funds back that far into the past. But as the law under which the treasurer acts was passed only three years back and as the court holds that it was not intended to be and could not be retroactive, assessturn the proceeds over to Mr. Treynor of ments back of that time cannot be made. The court holds that the sole question in the case is as to the authority of the treasurer to make the assessment. Prior to Paving Question in the Fourth Ward the adoption of the present code there was

no statute conferring or attempting to confer upon the treasurer authority to aspaving question in the Fourth ward by or- sess personal property. In the preparation dering the following streets and avenues of the code of 1897, however, the tax laws were revised and an entirely new section was inserted. This action provides that when property subject to taxaavenue, from Main to Eighth street; Sixth tion is withheld, overlooked, or for any other cause is not listed and assessed, the treasurer shall when apprised county thereof, at any time within five years from the date at which time the assessment should have been made, demand of owner of the property the amount of the tax, together with 6 per cent interest thereon, from the time the taxes would have become due and payable had the other thing, but Aldermen Boyer, Clark, property been listed and assessed, and upon failure to pay the sum within thirty days, with all accrued interest, he shall cause suit to be brought in the name of the treasurer for the use of the proper county, to be prosecuted by the county attorney or such other person as the board of supervisors may appoint, and when such property has been fraudulently withheld from assessment there shall be added to the sum found to be due a penalty of

50 per cent on the amount, which shall be included in the judgment. The first question considered by the court was whether or not this section of the code confers upon the treasurer authority to make an assessment. He says that it is perhaps true that such authority in express language is not conferred. If this statute is to be subjected to a strict construction and confined to the exact letter of the law it may be that such power is not conferred, but the court holds that the language ought to be so construed as to give effect to the bylous intention and meaning of the legislature, rather than to defeat that intention by a too strict adherence to the letter. He holds that the statute in question does not impose a tax on the property, but that that burden is imposed by other statutes. From the language of the section the court finds that the legislature intended to impose upon the treasurer a duty. It makes it his duty to demand the payment of the amount due upon the property. All laws necessarily bear with them all the powers or incidents necessary to fully carry out their intention. It is clear that the treasurer carnot make demands of the amount the property should i have been taxed without first ascertaining and fixing as the basis of such demand the value of the omitted property. This means that he must assess the omitted property, for an assessment is nothing more or less than determining the taxable value of property. This section means this or it means

nothing, is the declaration of the court. Relative to the constitutionality of the law, which was called into question because no method of giving notice of the assessment is provided, the court says that it conceded that an opportunity for hearing is essential to the validity of an assessment, but it is not essential that such opportunity be provided prior to the making the assessment. It is sufficient if given at some stage of the proceedings and before the assessment becomes a fixed charge against the property. With reference to the charge that the The Sunday Bee, May 5.

Turley's subdivision of outlot 7 of Jackson's | law is unconstitutional on the ground tha addition; Twelfth street, Second avenue the treasurer is interested in the amount of taxes to be collected, as that in a Acting City Attorney Paul C. Aylesworth | measure fixes the amount of his compensagave to the council his opinion on the tion, the court held that so long as the right of appeal existed this theory could not hold. If this were true scarcely a be paved before the improvement is made. citizen would be competent under the law to perform the duties of assessor, as his burden would be lessened in proportion as that of other property owners was increased

under the assessment fixed by him. The court also passed on the constituionality of the law with reference to its being class legislation. It has been contended that it provided for entering a judgment against the taxpayer which might not only take the property in this state, but property in other states not subject to taxation in this. The court holds that it he is left to the "doom" of the treasurer and the court.

In conclusion the court held that the act of 1897 was not retroactive and that the assessment could not be made back of that time.
