DOES NOT AFFECT BUSINESS

Machinist Strike Hardly Enough Enough to Interrupt Trade.

CONFIDENCE IN STEEL MANUFACTURERS

Immense Shipment of Footwear from the East—Textile Fabrics Exhibit Least Animation—Winter Wheat Outlook Better.

NEW YORK, May 24.—R. G. Dun & Co's

Review of Trade tomorrow will say: The labor situation is the cloud hovering over the business of the country. It is not sufficiently widespread at present to seriously interrupt the progress of manufacture and distribution. Some settlements of strikes have been effected during the week, but the general situation is not yet settled. The steel industry is well employed and crop advice are satisfactory.

NEW YORK, May 24.—R. G. Dun & Co's

OMAHA LIVE STOCK MARKET

Cattle Held a Trifle Uneven, but About Steady on the Average.

HOGS BROUGHT A NICKEL MORE TODAY

There Were No Good Sheep on Sale Today and the Few Cars of Lambs Offered Sold Just About Steady with Yesterday.

BRADSTREET'S FINANCIAL REVIEW.

Public Shaken Out of Speculation and Not Inclined to Come In.

NEW YORK, May 24.—Bradstreet's Financial Review tomorrow will say: Legislation has apparently run its course and the stock market is inclined to be dull. The shrinkage of the transaction at the close of the week is a reflection of the fact that speculation is not inclined to come in again at present. This is borne out by a general feeling of conservatism which has taken hold of the market. The volume of business for a stock that would move easily, falling prices, has been very small. The technical conditions were responsible for the movement of stocks so far as any legislation has apparently run its course. The days gain registered for American Tobacco Co. points and for Continental Tobacco Co. was due to this movement and to the fact that the market was shaken out of speculation which had shown signs of firmness and strength earlier in the day. The week's movement was a reaction from the losses, which were at one time very general, were either wiped out or greatly reduced. The Erie, the Wabash, Missouri Pacific and one or two months advance. The Erie was a notable influence on the whole market. The movement of Union Pacific in the early weeks of the year, and its rally at the close largely relieving the market of a very large share of the bank statement, promising a recuperation in cash by the banks of nearly \$5,000,000. The Erie's gain was due to the fact that the bank of the open market, which had been in the open market, was the signal that the bank of the open market had been relaxed. The Erie's gain was due to the fact that the bank of the open market had been relaxed. The Erie's gain was due to the fact that the bank of the open market had been relaxed.
