

BRYAN SHY ON INVITATIONS

Holds to David Bennett: Hill Worn Out Five Years Ago.

NOT VERY ANXIOUS FOR SPEAKING MATE

Jacksonian Club Will Send Direct and Personal Invitation to Hill—Meaning While It Invites Douglas County Democracy Into Back Yard.

That kind of oratory dealt in exclusively by David Bennett Hill of Wolfert's Roost, New York state, is not likely to be on tap as the forthcoming session of the Jacksonian club.

The original plan of the Jacksonian committee was to invite Bryan first and then have him address and subscribe to the invitation to Hill. This plan, argued the simple Jacksonians, had in it the personal pull of a two-times presidential candidate and it would certainly get the wily New Yorker into the plans for a second time.

And all of this is said to show the reason why William Hill of the county committee is so anxious to get the wily New Yorker into the plans for a second time. It is whispered that all the invitations to D. B. Hill that he ever had about his person were worn out in or about the year of 1896. He had none left in stock.

Something else in the line of invitation work is doing among the Jacksonians. They have just determined to invite their friends of the Douglas County Democracy into the party in a way that will be a fair dispute. Said an officer of the Jacksonians yesterday:

"We have determined to settle, once and for all, any dispute there may be as to the relative strength of the two democratic organizations in this county. For a long time the Douglas county boys have been blowing about their power to do this and to do that, but they have never done anything without our aid and consent. Just because we have been generous enough to allow them to name a candidate or two and to take about half of the county committee they have swelled up to realities altogether unbecoming to reality. Their importance is chiefly in their wind."

"Now, at the coming primaries, we are going to carry eight wards out of the nine in Omaha and then with our people from South Omaha and the country we are going to take back all that we ever gave to the Douglas County Democracy. This will take the wind out of the sails of the Douglas County Democracy, leaving them only the realizing score, that they haven't enough power to nominate a constable."

There is no particular fight between the two organizations as to candidates this fall, but the contest at the primaries will be for control of the county committee upon which the representation is now about equal.

There may be fusion in Douglas county this fall, but to the unsuspecting it will not have the color of fusion. The coalition is already set. The one candidate for constable for nomination on the democratic county ticket are dumped. They cannot rely on democrats helping to elect one of their numbers on a fusion ticket and that their best chance at the public crib is through the darker door, the populists have "seen" all of the prominent democratic candidates and examed from their positions in this event of success at the polls.

The scheme is to have the democrats to take all the places on the ticket and for the populists to adorn their convention without having made nominations. Then, if any of the democratic candidates are elected, the populists will cash in the promises.

WILL BE REALISTIC DRAMA

Taking of Filipino Block House to Be Represented by Militiamen in Omaha.

KNIGHTS OF THE GRIP TO ORGANIZE

Some Queer Exhibits by the Concessioneers—Dolls with Caricature Noses, Hatchets and Pins with Human Faces.

The first dress parade of the members of the Thurston Guards and the Omaha Guards, who are to put on a representation of the capture of block house No. 7 Tuesday, Wednesday and Thursday of this week, occurred at Union Street park yesterday. For a week or more there have been rehearsals, but this time part of the performers were in costume and much of the scenery was in shape.

From present indications the taking of the block house will be a realistic and will present many of the features of the actual occurrence. Many of the performers were at the fall of the Filipino stronghold and they insist upon preserving the unities to an extent which drives the stage manager frantic. He realizes that he really cannot give the entire affair as it happened upon the limited field of the park.

The American forces have been drilled in their part and the maneuvers given will be those that actually occurred. The drama will be presented by a detachment which advances to the breastworks, firing volleys until the first line of defense is reached. Firing at will, the men pour over the breastworks and the Filipino detachment is broken and the block house taken. The entire American force, which at this time is brought to support the first line, participating. The Filipinos stand for a moment behind trees and huts and then re-form to take the block house.

The taking of the block house comes in the second part of the evening's entertainment. The first part shows a camp scene, in which the American forces go through drills and the ordinary routine of camp life, ending with a hurried packing of tents for the march.

HALF A CROP IN COLFAX

Corn Will Yield Much Better Than Was Thought Three Weeks Ago.

J. O. Berkeley of the Schuyler Sun says that very nearly half a crop of grain will be harvested in Colfax county this year. That crop is turning out far better there, he maintains, than was expected, and people are not feeling blue over the situation.

Mr. and Mrs. E. H. Crady of Boone county, a little farther west, brings cheering news from his locality as well. That county was supposed to be one of the hard hit upper Platte districts, with nothing left, but Mr. Crady says corn will yield from four to six bushels per acre and wheat and rye and in large tracks as high as twenty bushels.

A. R. Bass of Morganston, Ind., had to get up ten or twelve times in the night and had severe backache and pains in the kidneys. Was cured by Foley's Kidney Cure. It's guaranteed.

Sealed pills will be received at the office of W. R. Bennett Building Co., 15th and Capitol avenue, up to Wednesday noon. After that date, only by order of Dr. J. C. Joseph of Omaha.

MILWAUKEE PUSHES WESTWARD

New Line is Projected to Tap Montana Field.

The Chicago, Milwaukee & St. Paul is said to be preparing to build from its present terminus at Evans, S. D., through Wyoming and into Montana. A surveying party has been over the proposed line and completed its work.

PERSONAL PARAGRAPHS.

Edward McNally of St. Louis is in Omaha, G. S. Hamilton of Gillette, Wyo., is in Omaha.

J. W. Vealton of Ogallala, Neb., is at Merchants.

Mr. and Mrs. H. T. Lee of Minneapolis are in the city.

Mr. and Mrs. Milton Cohen of St. Louis are in Omaha.

W. E. Cullon of Cedar Rapids, Ia., is at Merchants.

A. C. T. Martinez of Deadwood is stopping at the Henshaw.

Mrs. W. H. Dickson of Salt Lake City is visiting in Omaha.

Mr. and Mrs. E. Ernest Cramer of St. Louis are in Omaha.

Mr. and Mrs. J. H. Chambers of Nebraska, are at the Henshaw.

Mrs. M. M. Bartlett of Avoca, Neb., is in the city for a few days.

E. Locke of Worcester, Mass., is visiting from Omaha.

Mr. and Mrs. D. C. Hall, Jr., of Villisca, Ia., are at the Ber Grand.

Charles Moneypenny of Valley is in Omaha for a few days.

H. W. Gannett has been successfully operated upon for appendicitis at St. Joseph's hospital.

Woman's Christian Association. The August meeting of the board of directors of the W. C. A. of this city will be Tuesday, August 20, at 10 a. m. in the Young Men's Christian association parlors.

GOING TO LAWYERS' MEETING

President of General Council of American Bar Association Passes Through the City.

NEW YORK MINE PROSPECT IS BOUGHT BY A CHICAGO CAPITALIST.

Experts Turn Their Attention to Tin-Bearing Ores—Belgium Syndicate Takes Up Sully Cavanaugh.

DEADWOOD, S. D., Aug. 18.—(Special.)—The famous New York mica mine, owned by C. A. Dow of Sioux City, has been purchased for cash by B. H. Sullivan of Chicago for a reported consideration of \$50,000. The mine is located eight miles west of Custer and it is considered to be one of the greatest mica mines in the world.

The ledge of mica-bearing quartz is over forty feet wide and the blocks that are taken out are enormous. The mine has been thoroughly developed and there is enough mica to last many years. Regular shipments have been made for some time to New York City, where it has been utilized for electrical purposes by one of the largest mica purchasing companies in the world.

The mica is free from iron and is especially well adapted to electrical uses. There is sure to be a mica boom in the Black Hills as a result of this purchase. There are hundreds of undeveloped mica prospects, especially in Custer county.

B. H. Sullivan proposes to continue the shipments of mica east.

Tin-Bearing Properties. R. O. Hall of Denver, an expert, has been in the Harney Peak tin district in Punington and Custer counties for several days, getting together a large amount of tin-bearing properties for the old Glendale Tin Mining company of London.

The company is now being reorganized and active work is being done on the tin district.

Old Sully Cavanaugh Revived. At Sully, not far from the Glendale company's properties, about 400 acres of ground has been taken up by a wealthy syndicate, whose headquarters are in Berkeley. It is expected to arrive this week to make plans for the opening of the property.

It is the old Sully Cavanaugh mine, which has the world's record for having the richest tin ore. There was recently organized a company to operate in the Bear Gulch tin district.

A big ledge of pyrite ore has been struck just outside of the city limits of Deadwood by J. T. Gilmore and associates. The ore runs well in gold, copper and iron and it may be one of the best of the Deadwood field. The ledge of ore is over forty feet wide. Across the gulch about ninety tons of this same character of ore are being shipped daily to the Golden Reward smelter for a flux. The Elkhorn Railway company has put its mine to this mine.

A big company is about to be organized to work several properties located in the Garden City district northwest of this city. A number of tests have been made on the ore and it is found to be amenable to the cyanide process.

At Ranged Top the Deadwood Standard Mining company of Colorado City, Colo., is building a camp and as soon as the machinery arrives for the 200-ton cyanide plant on that will commence work. Two hundred parties are putting in several cyanide tanks to operate on ores in the Labrador group.

Cleopatra Shoots Higher. The Cleopatra Mining company, whose stock has recently gone to \$150 per share, which is 20 cents above the par value, is making preparations to sink a shaft to lower quartzite. It is expected to sink a shaft to a depth of 150 feet has been at the upper ore contacts. It is believed that on the lower ore level, which will be something like 200 feet below the creek, ore shoots will be found just the same as in the producing districts farther south.

The old dumps at the Iron Hill mine, on the Carbonate district, are being worked to get the silver values. The mine was worked when the price of silver was high and only the best grade of ore was milled. Some of the ore runs \$5 to \$8 per ton in silver and it yields its value easily to the cyanide process.

The Titanic Mining company of this city is making plans to resume sinking to lower quartzite. The company has a large number of stockholders in the eastern part of this state. A tract of 100 acres of ground has been bought and patented.

The new cyanide plant that has been under course of construction by the Dakota Mining company for several months past in this city is now nearly completed. A delay has been caused on account of the steel strike.

Hidden Fortune is Busy. The Hidden Fortune company of Denver is working thirty men on the two tunnel and the shaft. The Baltic tunnel, which is being run with the formation, is now in about 225 feet, with a gain of eight feet per day. The shaft is down about seventy-five feet, the work being done with a horse shaft. A depth of 150 feet has been at the upper ore contacts. It is believed that on the lower ore level, which will be something like 200 feet below the creek, ore shoots will be found just the same as in the producing districts farther south.

The Carbonate district, are being worked to get the silver values. The mine was worked when the price of silver was high and only the best grade of ore was milled. Some of the ore runs \$5 to \$8 per ton in silver and it yields its value easily to the cyanide process.

The Titanic Mining company of this city is making plans to resume sinking to lower quartzite. The company has a large number of stockholders in the eastern part of this state. A tract of 100 acres of ground has been bought and patented.

The new cyanide plant that has been under course of construction by the Dakota Mining company for several months past in this city is now nearly completed. A delay has been caused on account of the steel strike.

Wasp Yields Honey. One of the best paying mines in the Hills is the Wasp No. 2, located in the Yellow Creek district, south of this city. The mine is outcropping about fifty tons of quartzite ore per day, which averages in value about \$10 per ton gold. A dividend of nearly \$4,000 per month is being paid. The mine is owned by Deadwood and Lead people.

The Gold Coin Mining company of Lead, Ill., is doing considerable development work on a property in the Bear Gulch district. A shaft is to be sunk to the lower quartzite level and drifting will then be done east and west to find the ore shoots. A good many placer diggings have been worked this summer in this district and wages have been earned as high as \$25 per day. The great tin-bearing belt is coming into especial prominence at present.

Clara Bell Phenomenally Rich. A cleanup was made this week from the Clara Bell mine, near Oreville, amounting to \$300,000. This was the first time that a two-stamp Tremaine mill. The ore in this mine is phenomenally rich. The shaft is widening out and the ore is just as rich at the 150-foot level as it was at the surface.

MINING IN THE BLACK HILLS

Experts Turn Their Attention to Tin-Bearing Ores—Belgium Syndicate Takes Up Sully Cavanaugh.

DEADWOOD, S. D., Aug. 18.—(Special.)

The famous New York mica mine, owned by C. A. Dow of Sioux City, has been purchased for cash by B. H. Sullivan of Chicago for a reported consideration of \$50,000.

The ledge of mica-bearing quartz is over forty feet wide and the blocks that are taken out are enormous. The mine has been thoroughly developed and there is enough mica to last many years. THE BEER THAT CAUSES BILIOUSNESS IS "GREEN BEER"

—insufficiently aged. It is hurried from the brewery to the market before it is half fermented.

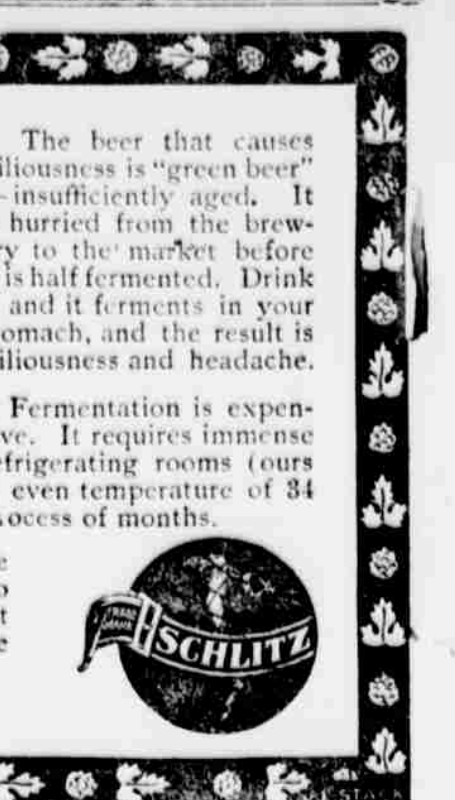

Drink it and it ferments in your stomach, and the result is biliousness and headache.

Fermentation is expensive. It requires immense refrigerating rooms (ours are even temperature of 34 degrees). Fermentation is a process of months.

No green beer ever leaves the Schlitz brewery. If you wish to be certain of an aged beer, get Schlitz, the beer that made Milwaukee famous.

Hold 265,000 barrels and an even temperature of 34 degrees. Fermentation is a process of months.

"Bottled at the Brewery Only. Never Sold in Bulk."

BROTHERS IN OPPRESSION

Thus Speaks Kruger to the Irish Through William Redmond.

RIDICULES GREAT BRITAIN'S PROMISES

Says John Bull Seeks to Put a Rope Around the Boers' Necks and Call that Freedom.

LONDON, Aug. 18.—The Freeman's Journal of Dublin publishes an interview between Paul Kruger and William Redmond at Hilversom, Holland, in which the former president of the South African republic, after expressing gratitude for Irish support, says he regards the Irish as "brothers in oppression" and urged the nationalist members of the British Parliament to continue their efforts to secure justice and truth.

When asked concerning the effect of Lord Kitchener's recent proclamation and of Mr. Chamberlain's speech, Kruger replied: "My people are not to be frightened by such proclamations of speeches which will only encourage them to continue fighting. The British have used armed troops against the burghers from the beginning, but we have not used armed kaffirs. It has always been against our principles to use the black man against the white."

Mr. Kruger emphatically denied the existence of a Dutch conspiracy against British influence in South Africa.

When asked regarding Great Britain's promises as to the treatment of the Boers after surrender, he said:

"I know Great Britain's promises. You in Ireland ought also to know them. The British promise to lend us money to put things right. If it was not for that, our land would be taken. They ask us to allow a rope to be put around our necks and to call that freedom. We should be slaves."

After expressing his firm conviction that God, in good time, would give the Boers deliverance, he remarked:

"Even now we could rebuild our country, but to do so we must have full independence to the cyanide process."

"Why do they fight women and children? There are our own men to fight against. I do not believe the British people know what is being done in their name. If they did know, they would stop it."

Mr. Kruger said nothing had been settled on the subject of a visit to the United States. According to Mr. Redmond, his appearance before the House of Commons would be either mentally or physically.

Re-No-May powder brings relief to tender feet.

Had the Proof with Him. A man came into the water works office the other day, relates the Cleveland Plain Dealer, and said he wanted to make a complaint. He was an excited man, who breathed hard and seemed to be anxious to have his case attended to at once.

"Say," he remarked, as he passed a large colored handkerchief around his generous expanse of neck, "I want to complain of a woman who wastes the city water and I want you to right up there and shut it off."

"The clerk at once scented a neighborhood quarrel, with an incidental desire for a petty revenge.

"How do you know she wastes the water?" he asked.

"The complainant's face grew dark.

"To cut this water off for a child 6 years of age, 24 yards of material 27 inches wide, 34 yards 32 inches wide or 24 yards 44 inches wide will be required.

The pattern 3888 is cut in sizes for children, 2, 4, 6 and 8 years of age.

For the accommodation of The Bee readers these patterns, which usually retail at from 25 to 50 cents, will be furnished at a nominal price, 10 cents, which covers all expense. In order to get any pattern enclosed in a paper, give number and name of pattern wanted and date measure. Allow about ten days from date of your letter before beginning to look for the pattern. Address, Pattern Department, Omaha Bee.

Buy a little Fels-Naptha soap—10 bars if you like.

You shall have the soap and the money too, if not worth 25c a bar.

Fels & Co., makers, Philadelphia.

Seasonable Fashions

Wm. Fin of Lima, O., obtained excellent results from the use of Foley's Kidney Cure. "It relieved my backache and pains over the hips. It toned my system and gave me new vim and energy. It is an honest and reliable remedy, a sure cure for all kidney diseases."

3888 Child's Wrapper, 2 to 8 yrs.

Child's Wrapper. No. 3888—Simple wrappers that can be slipped on when the room is cool or during convalescence are essential to the comfort and well being of the children as they are to that of their elders. This pretty little model can be made in both robe when made from suitable material.

The original is of dotted dimity, in blue and white, but Scotch and French flannellette, lawn and various fabrics are appropriate.

The back is seamless and laid in four tucks that give a yoke effect and provide allness below. The fronts also are tuckled, but open at the center for their entire length, being closed by means of buttons and button holes when desired.

The sleeves are in blouse style and a simple roll-over collar finishes the neck.

To cut this wrapper for a child 6 years of age, 24 yards of material 27 inches wide, 34 yards 32 inches wide or 24 yards 44 inches wide will be required.

TRIBUTE TO THE BUG. What This Nation Suffers in Damage Every Year from Insect Appetite. (Copyright, 1901, by Dr. L. O. Howard.) It is true that the honey bee and the silk worm of commerce are the basis of great industries, and while it is true that many insects, through their functions as scavengers, as cross-fertilizers of plants, and as parasites of destructive species, do an enormous amount of good to the human race, the insect, from the standpoint of human beings, the actual loss brought about by the work of other insects, mainly to the farmer, the fruit grower and the stock raiser, goes far toward offsetting the benefits derived from insects, if it does not, in fact, completely overbalance them. Many estimates have been made of the losses produced by insects in their destruction of certain crops. These losses, when expressed in dollars and cents, are more or less misleading, because, for example, in a year when the chinchbug wipes out a corn crop or a wheat crop in restricted portions of the country the price of wheat or corn is sure to go up, which restores the money value of the crop as a whole. Nevertheless, this increased price bears upon the entire country, and there is a distinct and enormous economic loss through the work of the insects. According to the calculations of conservative investigators the amount of destruction caused by the jaws of the various species of insects, many of which are so small that the average man would hardly note their existence, is more than \$200,000,000 a year. In other terms, if for three years the destructive insects would institute a fast the amount saved in grain, timber, cereals, fruit, sun-dried and domestic animals would pay the national debt.
