Yee mans has bought for \$34,500 the Ashton nursery and farm of 560 acres, which contains the original claim of Isaac Ashton the third settler of Monons county, who located on it in December, 1851.

CURSE OF THE COCAINE HABIT.

Characterized as One of the Three Great Scourges of the World.

In a lecture before the New York School of Clinical Medicine Dr. Thomas D. Crothers of Hartford, Conn., characterized cocalnism as one of the three great scourges of the world, alcoholism and morphinism being the other two.

of cocainism is spreading alarmingly among the poor as well as the rich, as the drug is becoming cheaper all the time. A oneounce package, which less than five years ago cost \$6, can now be purchased for 75

One result of this cheapening is that the cocaine habit is becoming common among tramps and paupers as well as business and professional men. It is no longer an aristocratic vice, if it ever was. In New Orleans and other parts of the south and west the drug is freely bought in 5-cent pack-

ages. Dr. Crothers regards the use of the drug. even as a local anesthetic for surgical purposes, as exceedingly dangerous, especially in cases where the subsequent reaction is characterized by headache, lassitude and depression. Yet its use in surgery is becoming very common. The lecturer also deprecated the fact that many popular proprietary remedies contain cocaine in large quantities. It is almost a specific for catarrhal

troubles and though using it as a remedial with its speedy and delightful results, become addicted to it habitually and finally become slaves to its use.

Its first effects in small doses are to create a feeling of elation, of greatly increased mental and physical superiority and morphinist finds in it a substitute to relieve the sense of depression following the use charmed with 'ts effects, as his depression yields to a sense of clation and abnormal The procession returned in the same order exaltation.

But in the use of cocaine there follows a sure reaction. In a short time there are formally notified by the grand master of the developed characteristic symptoms of the ceremonies of the baptism of his daughter habitual cocainist. If he be a lawyer, a and he then rejoined his party. A solemn writer or a clergyman he shows marvelous mass was celebrated by the metropolitan fluency and prolixity of speech. He has a of St. Petersburg. While the psalm, "Imrare fecundity of words, but they betray pleatur vos Meum Laudem" was being a tendency toward circumfocution and irrelevancy. In letter writing he betrays his secret vice by his diffuseness without direct-

"There are novels which are highly popular today," said the lecturer, "which show almost conclusive evidence of having been written under the influence of cocaine, and several poems characterized by marvelous rhythm and smoothness have had their in-

spiration in this drug. 'Habitual use of it impairs the judgment and results in the grandlose ideas often asthe coming compaign, consisting of Spence, authority told me that he knew of three of cretive, selfish and dishonest. A Wall street the most reckless operators of recent years | factory now there is a chemist, whose bust whose losses of fortunes are directly due to impairment of their judgment through the

"After the abnormal sense of elation and power come delusions. The victim fears sudden attack. He sits up at night watching for burglars. He is fearful of accident and abnormally suspicious of imaginary persecutors. Most victims in this stage

carry revolvers. "One of them once came to me in this condition. He was a physician, who had lost his wife and family in the Johnstown flood, and had taken to cocaine to soothe him in his great affliction. He had two revolvers when he told me of the secret. He was rational enough in most matters, but thought he had hidden enemies. I finally persuaded him to surrender his firearms and the first night he compromised on a stout pase ball bat under his pillow. He

finally conquered the appelite, but it required years of hard struggling." Dr. Crothers narrated many similar instances, especially among brain workers. He recommended as the best curative method complete abstinence from the drug, combined with Turkish and electric baths, mineral waters and tonics, judicious restraint, careful and abstemious diet and a

cure of the habit. NAMING THE CZAR'S DAUGHTER.

Royal Summer Palace the Scene of an Imposing Event.

Peterhof, the sumptuous summer palace of the czar of Russia, which owes its origin to a caprice of the great Empress Catherine, a royal abode which for over a century has been the scene of so many imposing events, was ablaze last Sunday with the utmost splendor and pageantry, says the Chicago Inter Ocean. A solemn function took place on that day, very different from the ordinary gala scenes for which the palace has been noted throughout the world, but resembling them otherwise in the pump and ceremonial which distinguish the court of the autocrat of the Russias. The brilliancy of the spectacle was in great contrast to the simplicity and almost de mestic nature of the ceremony by which the baby daughter of Nicholas II was christened Anastasia Nicolasia-a very popular Russian name. This ceremony will take place once more out of deference to the wishes of the young czarina, who was very anxious to be present, but the physicians would not allow of it. Even so august a sovereign as the czarina of Russia cannot gratify all her wishes.

Reasons of state accelerated the baptism of the little archduchess, and inflexible Russian tradition made it imperative that her christening should take place on Sun day. Czar Nicholas was also anxious to proceed forthwith to the summer military maneuvers at Krasnoe-Szelo, which will last a few weeks.

For so gorgeous an affair as the baptism of a daughter of Russia no more enchanting spot could have been chosen than beauti ful Peterbof, the Versailles of Russia. The church of Peterhof, which is almost hidden amidst shrubbery and foliage, is a marve of beauty. One traverses the whole length of the gardens to reach it, through a mass of brilliant flower beds, and from every point of view glitters the gilded dome of the little Byzantine temple, a gem of beauty. Within the walls everything that meets the eyes is of the most ornate and delicate workmanship.

and glitter of the fete which marked the

Dyspepsia Cure

eating means to stop living, and we can hardly call that to stop eating means to stop living, and we can hardly call that a cure.

But since Kodol Dyspepsia Cure has become known the whole method of treating indigestion has been changed. It digests what you eat and permits you to eat all the good food you need and gives the stomach perfect rest; and its use constitutes a plain common sense method of curing dyspepsia and indigestion.

People used to think that the only way to overcome indigestion was to stop eating and many think so still. But the only trouble in that kind of treatment is the fact that to stop

fant archduchess with the same. A grand banquet and ball at the imperial palace wound up the evening.

NOTHING GOES TO WASTE.

hemistry Has Found Uses for What Were Once Refuse Products. There is no such thing as waste product n the industries of the present day. Everything is wheat that comes to the mill of the manufacturers. In every big ness it is to find out what can be done with the refuse. In the packing house every particle of grease is extracted from it and sent to the soap factory. The residue is converted into a fertilizer and sold to the farmer. Buttons and knifehandles are made from the horns and bones and the scraps are ground into bonemeal for feeding poultry. Glue and gelatine come from

the hoofs and the bristles and hair are

used in making brushes and for putting into mortar. The hide, of course, is tanned and made into leather. In making coal gas, ammonia, carbolic acid, acetic acid, coal tar and various nitrogen compounds are also produced. From coal tar many fine dyes are made. From crude petroleum are made kerosene, gasoline, naphtha, paraffin and vaseline, still heavier oil, left as a residue, is used for axle grease and the carbon is turned into sticks for electric lights. The sulphuric acid used for purifying the products of petroleum is recovered and turned into fertilizer for farms where there is too much phosphate rock, which is thus dissolved. Cream of tartar is made from the residue of wine factories. Cotton seeds are stripped of lint for making paper. They are then crushed for the oil and the meal is pressed long rest. He knows of no specific for the fuel. If the cakes are burned the ashes into cakes for feeding stock or burning as are so rich in potash that they are used for fertilizing tobacco plants. From the oil comes a good quality of salad oil. Combined with beef suet it makes cottolene, which is used as a substitute for lard. The crudest part of the oil goes to the soap fac-
