Corn Pit the Attraction on Board of Trade.

APPRECIABLE ADVANCE

Wheat Opens Weak, but Rallies Afterwards-Oats Quiet and Stendy, with Little Change Later On-Provisions Active.

CHICAGO, Aug. 27.-The corn plt was the center of attraction on the Board of Trade today and prices on that cereal made an appreciable advance, December closing 1%01%c higher. December wheat closed tec higher, oats were the higher, but provisions closed unchanged to The

closing 1% 11% c higher. December wheat closed 19c higher, oats were 13c higher, but provisions closed unchanged to 7½c lower.

Lower cables, combined with bearish reports of the enormous Russian crop, caused a weak opening in wheat. A rush of selling orders during the first few minutes of the trading carried prices below yeaterday's closing figures, but the sharp advance in corn helped bring about a raily. The market was dull after the opening pressure to sell was over, which fact was partly responsible for the advance. December opened unchanged to 1½c lower at 715471½c and under the heavy selling prices dropped to 71%c, but quickly railled, the high point being reached at 72½c. The close was strong and ½c higher at 72½c. Bradstreet's visible supply statement showed an increase of 1,200,000 bushols. Scaboard clearances of wheat and flour were equal to 820,000 bushels. Receipts at Minneapolis and Doluth were fit cars, against 321 last week and 34 a year ago, while local receipts were 323 cars, with 10 of contract grade.

Corn opened somewhat easier, but strong local buying set in and the market advanced rapidly and sharply. Hot weather in the southwest caused some apprehension and was partly responsible for the advance. Fair buying orders from outsiders were also factors in frightening shorts and the result was one of the best buying markets witnessed for more than a week past. December opened 15461c, but when general buying set in the advance was profit, top figures being reached at 57%c. The close was slightly below the high mark at 57%g. Oats opened quiet and steady. Buying by outsiders early in the day cansed misgivings to shorts, who hastily took to cover and a raily set in which carried prices from ½c to lo higher. The advance in corn, however, was the main buil factor. Prices were well maintained throughout the entire seasion, although trading was rather quiet during the latter part of the day. December ranged between 415.70 and 5154c, closing with a loss of 1½c at the low point. Lard ranged between 18.8 The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS. Prices Toppled Over and Recent Bull

Prices Toppied Over and Recent Bull

Movement Ends.

NEW YORK. Aug. 27.—Prices of stock were toppied over today and the recently prevailing bull movement apparently came to an end. The nesitating tone which developed yesterday continued this morning. After the first recession in prices strenuous efforts were made to check the reaction, which met with a degree of success. The character of the buying in St. Paul was a large influence in the temporary upturn of the market. Very large amounts of this stock were taken by brokers supposed to act for the group of financiers, which has been foremost in forwarding projects for the community of interest in railroad ownership. Operations toward supporting the market elsewhere were attributed to the most conspicuous operators in the street and the apparent confidence with which they were conducted served to intimidate the professional operators of a smaller class, who were inclined to take a bearish view of the market. But when this latter class detected the diminution of the outside buying through commission houses and some evidence of profit-taking by the longs they offered prices down boidly and by uncovering stop-loss orders dislodged very heavy offerings, under which the market broke badly. With the downward tendency established the traders gave a pessimistic twist to the current news, as is their wont. There was, however, little news to account for the course of the market. The inference clearly justified that the buying and bidding up of stocks for two weeks past represented an experiment by stock market operators who hoped to attract a sufficient outside interest by this means to make an active buil speculation.

Yesterday's moderate demand from outside sources chilled the expectation of the buils and what long lines had not been sold to realize profits were forced to sale more urgently today with the still further diminution in the outside demand. Naturally the stocks which have been re-antly builed the most were the weakest on an eraction, the Pacifics. Atchison, Movement Ends.

ever, such as come in competition with the western grass cattle, were rather hard to dispose of, and sellers in some cases found it difficult to get steady prices. The market, however, shows but little change as compared with yesterday, and a fairly early clearance was made.

There were about thirty-five cars of cows and heifers on sale this morning, and the market ruled active and steady to strong on ranything at all desirable. Canners also sold at just about steady prices, and so did the medium grades. There was no particular change noticeable in the prices paid for buils, stags and veal calves.

The demand for stockers and feeders this morning was limited. Yard traders have a good many on hand and the demand from the country being rather light, they were slow to take hold of fresh offerings. Some of the choicest bunches sold at fully steady prices, but aside from that prices were generally a shade lower, and anything on the commonish order was very hard to dispose of and sellers had to take considerably less than the same kind sold for yesterday.

Packers were all anxious this morning for the

bly less than the same kind sold for yes-terday.

Packers were all anxious this morning for the better grades of western beef cattle and anything at all desirable brought just about yesterday's quotations. The commoner kinds were, of course, more or less neg-lected and in some instances feeder buyers outbid the backers. Cows were in good de-mand at steady to strong prices and the pens were cleared in good season of all the better grades. pens were cleared in good season of all the better grades.

Bulls, calves and stags brought steady prices, but stockers and feeders were lower and slow unless they were extra choice. Representative sales:

HOGS—There was rather a light run of hogs here today and the market opened atrong to Schigher on the better grades of heavyweights. Packers were willing on the start to pay \$6.02½ and \$6.05 for good hogs and the choice loads sold from \$6.05 to \$6.20.

For the lighter weights they were bidding from \$6.00 down, but not many of them changed hands on the opening market. Packers, in fact, did not seem very anxious for hogs this morning and as a result the market was slow and draggy and it was rather late before the bulk of the offerings was out of first hands.

The close of the market was very slow, the advance of the morning being fully lost. Hogs sold mostly from \$5.97½ to \$6.02½, which makes the bulk of all the sales from \$5.97½ to \$6.05. Late in the foremon there were still several loads unsold, for which packers were offering only \$5.95.

SHEEP-There was rather a light run of sheep here today, and as packers were all liberal buyers the market on good stuff sheep here today, and as packers were all liberal buyers the market on good stuff was active and steady to strong. Wethers sold today as high as \$3.55, which were the same as sold yesterday at \$1.50, Good to choice wethers were also in good demand and sold from \$3.00 to \$3.10.

The demand for lambs, on the contrary, was hardly as active as that for sheep, and the market could be quoted steady to a shade easier. Common stuff, in particular, in both sheep and lambs, was neglected, as packers seemed to want only the good stuff.

There were only a few feeders off red today, and they sold without difficulty at fully steady prices.
