DEFENDANTS ARE ARRAIGNED

Some Plend Not Guilty to Indictments and Others Ask for Time to Think Over Their Cases.

Defendants against whom indictments have been returned by the grand jury were arraigned before Judge Macy in the district court yesterday. With the exception of who took time to plead, all denied being guilty as charged. Counsel was pro-vided by the court for those unable to pay for the services of an attorney.

Hoard, when asked by the court if he had means to employ an attorney, stated that he had some property which was in the hands of the sheriff. Ir reply to questions of the judge, De Armond said that the property consisted of some clothing and jewelry. Further questioning brought out the fact that the jewelry consisted of sixteen collar buttons, which De Armond, in answer to a question as to their value, said were worth more to him than anybody else, as he could sell them if at liberty. The court told him he would securing counsel, and that for the present he would make no order in his case in this

Union (Afton)—Rain, 20!; this materially helps pastures and puts ground in condition for fall plowing and seeding; corn is well along out of the way of frost; we may class our potato crop among the fall-ures; after giving cornfields the best examination my judgment is 25 bushels per acre the average for Union county.

Lucas (Charlton)—Rain, 1.58; no more rain needed to make corn; pastures much improved; plowing progressing finely.

Lucas ((Warren Township)—Rain, 1.10; many cutting and binding corn; no surface water; some stock being fed.

Monroe sAlbia)—Rain, 1.57; week has been cooler and wet and highly beneficial to growing crops; plowing can be pushed now.

Decutur (Van Wert)—A great amount of corn being cut; most of it about out of the way of frost.

Ringgold (Mount Ayr)—Rain, 2.48; drouth broken; pastures starting nicely; corn cutting well under way.

When people lose their capital they set to work to regain it.

When we lose our nerve force we ought to seek a means of getting it back. There is a way, certain and scientific.
