"Imitation is the Most Sincere Flattery."

Oh, yes! You see Nicoll's prices all around town, but there's a decided difference in the meaning—when Nicoll's name is there to back them up.

Who's Your Tailor?

Does he Satisfy you in Price, Quality, Style, Fit and Workmanship? Does he offer you a generous variety to select from?

The price alone has no meaning; it's necessary to compare the quality of the material, the trimmings, the tailoring, the style and fitting.

It is customary, when ordering garments, to feel of the cloth in a knowing way in order to judge of its quality. That's all right! Some cloths are better in texture than others—in finish, in wearing quality and durability of dyes.

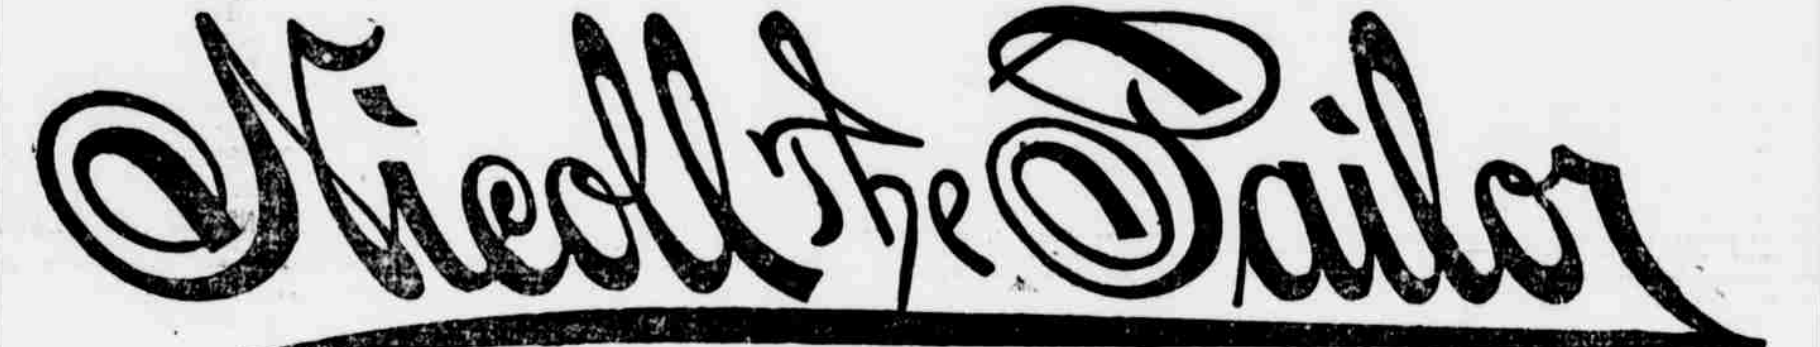

But the cost of that cloth, however good, is considerably less than the cost of labor and linings. It is in what is called the TAILORING that the real quality of a garment lies—the sewing of the seams, the pocket points, the edges, the shaping and the finishing.

These are the points that add cost and give quality to properly made garments, and they are the particulars of which the average buyer knows the least. If you understand all these points, as well as it is our business to know them, you would appreciate more fully why garments made by Nicoll The Tailor are far superior to the ordinary kind.

Nicoll's cash methods, wide assortment and extensive business have placed moderate priced tailoring foremost in the clothing world.

Trousers, \$5, \$6, \$7, \$8, \$9, \$10. Suits, \$20, \$25, \$30, \$35, \$40

KEYSTONE HAS A BOOM.

KEYSTONE, S. D., Oct. 14.—(Special.)—Keystone has taken on new life since the settlement of the famous lawsuit between the Holy Terror Mining company and P. B. McCarty of Rapid City. During the trial discouraging reports were placed in circulation about the mine and the town became dead. Only a portion of the stamps were used and most of the men were let out. Now the announcement has been made that the ore on the 1,100-foot level is found to be richer than expected. A shaft is being sunk an additional 100 feet, which will make it the deepest shaft in the Black Hills. The company expects to start up fifteen more stamps, making thirty in all. Regular dividends will be resumed in a short time. The mine has paid nearly \$200,000 in dividends, besides paying for the development of the property, its mills and original cost of the mine. A Milwaukee company is erecting a forty-stamp mill near town, which will be commissioned soon. The Keystone district is located on the southern end of the Homestake ore belt.
