PLANS FOR HIS MEETINGS OUTLINED they're pushing it for the third oil.

Effort to Give More Life to the Religious Side of the Association Will Be Made in Omnha.

One of the most pleasant functions given by the local Young Men's Christian associa. tion was the banquet given Thursday evening by the board of directors to the min- man. isters of the city and the chairmen of committees in honor of Fred B. Smith of New York, international secretary of the society

Mr. Smith arrived in Omaha Thursday evening and will remain until after Sunday, holding a meeting with the members alone with the man from Broken Bow, he of the association this evening, and will hold a men's meeting, open to the public, at Washington hall, Sunday afternoon.

lease W. Carpenter, chairman of the board of directors, presided at the banquet and at the conclusion of the feast made a short address, in which he dwelt upon the difficulty, but great necessity, of personal religious effort in the society. Mr. Smith is here to increase this effort.

The Religious Work of the Association from the Standpoint of the Board of Directors," was the theme assigned Dr. W. O. Henry. In part he said: "The first object of the association was to make men Christians. Today the society has grown along material lines so rapidly and extensively that often it forgets its prime object-that of developing Christian character in young men. The board of directors should have a high ideal of the work. It is not a club or gymnasium, but is vastly more. It is church, but it is the strong arm of the church to bring men to Christ, There are 20,000 young men in Omaha and 1 do not believe that 20 per cent atters church. The culmination of our work should be to bring men to Christ."

#### Some Other Suggestions.

"The Religious Work of the Association From the Standpoint of the State Committee" was responded to by J. P. Bailey, state secretary. He told of visiting people in the various parts of the state where he has been questioned as to the work. He said that in many cases he finds that the gymnasium is more prominent than the religlous work, and that the state committee looks to the association to bring out more prominently the religious work. The gymnasium, the boys' department, the educational department, each has its director and the speaker hoped to see the day that the religious department will have its spe-

cial director Dr. A. C. Hirst spoke on "The Religious Work From the Standpoint of the Church," saying that at his church he was carrying on a campaign, for six Sunday evenings, to young men. The departments in Omaha hear a subdued conversation, and then an are well organized. The general secretary other selection would be played. is well equipped for the work. The best method to reach young men is by personal contact.

The guest of the evening, Fred B. Smith, was then introduced. Taking as his theme the religious work of the association, he ical questions discussed during the last ten years you will find that the religious work of the association is more important than If we save our young men to the church of God the country is safe. ## Work and Not a Hollday.

"If you are going to be a worker in this cause, you are not going on a half holi-The worker among men must understand it is going to be a long, tedious pullone that will strain every effort of life The man that is good in a long pull is the man that wins in the work among men. The uncertain, wavering man never wins victory. The man who looks for a jubilee, a hurrah, a hallelujah, has no place in the work. When you put a legitimate part of your life into the work there can be no question what the result is going to be.

Mr. Smith told of the work now being accomplished by the Indian branch, the railroad branch and the army and navy branch of the association, and spoke of the extension of the work to the prisons and reformatories. He prophesied great things for the organization and closed by saying: "Tomorrow night will be organization

night-the most important of all the nights in the series of meetings. Tonight we talked of principles; tomorow night we will set the stakes for the work. If you are going to see a campaign organized in this city, you must resolve that you will put your own life into it. In the old days, with small membership, the association devoted grown to large numbers, we must have ASK FOR THE EXTRA SESSION itself to religious work. My Electric Bell is entirely differ nt from the many worthless contrivances being affered the public as electric belts and must not be confused with them. Every article of merit calls forth many worthless imitations, therefore, if you desire electrical treatment for your allments, do not accept the first thing offered you as an electric bell but first compare them with mine.

Two features of my Electric Belt alone will appeal to any one's good judgment and as a reward for my discovery of these features the Inited States government has given to me the exclusive use of my method of applying Electricity. These features are: My Belt has soft silken, chamois-covered spong electrodes, which prevent that horrible burning and blistering caused by other makes of belts which have bare metal electrodes. My Belt can be renewed when burned out for only 75c; when others burn out they are worthless. My Electrical Suspensory for the perfect cure of Nervous Ailments of men frevio each male patient.

If you have an old-style belt which burns or blisters or is burned out and cannot be renewed, send it to me as half payment of

one of mine. My Electrical Appliances will cure Varicocele, Spermatorrhora and Al Nervous Weaknesses in either sex, restore Lost Vigor and Vitality; cure Kidney, Liver and Bladder Troubles, Rheumatism in all its forms, Constipation, Stomach Disorders, all Female Weakhesses, etc.
