There is nobody in the senate nowadays with whiskers to equal Peffer's. Senator Stewart has a luxuriant growth, but compared to Peffer's hirsute adornment Stewart's chin is like a stubble field alongside an acre of waving grain. When Peffer was in the senate his whiskers were a better inbarometer. On cold and damp days Peffer would tuck his beard under his coat and use it as a chest protector. On fine days he allowed it to fly freely, until each sepa-

Latest Plan to Relieve Pressure on

Plans of ambitious architects for an aristic reconstruction of the White House at Washington have been put forward more or less insistently ever since the Cleveland incumbency and the subsequent Harrison installation made it clear that the executive mansion had been outgrown. Many a time and oft has it been demonstrated by experts with the pencil and T-square that nothing but the lack of a fat appropriation by congress prevented them from making of the White House a palage for officialism, a paradise for domesticity and a noble exemplar of the house beautiful for genera-

With the Roesevelt family, domiciled in this classic little structure, artistic and academic discussion must be suspended for a reason. No American gentleman with half a dozen growing children could find the comforts of home in a building so devoted to official purposes as is the present executive mansion. But the relief desired by Mr. Rocsevelt is not in line with current architectural schemes for transforming the historic White House into an unrecognized single block in a vast mosaic of modera construction. His notion is to keep the White House intact and unchanged and to construct a new executive building on land adjacent to the splendid structure devoted to the Treasury department. Here might ceptions arranged at the instance of the president, and here also the official and clerical work of the executive office might be carried on in its entirety. The old White House would then, after due interior remodeling and refurnishing, serve admirably for many years yet to come as a private domicile for any citizen intrusted with executive authority.

A bill to provide for the proposed new executive structure has aiready been introduced in the senate, at the request of the president, and it is quite possible, in these days of lightning-like construction, that Mr. Roosevelt in his own person may derive official and individual advantage and satisfaction from the finished edifice. There is no good reason why the executive business office should be in the president's house, contrary to prevailing practice in every other official quarter. Should Mr. tice, while retaining intact and unmutilated the time-honored home of so many American presidents, the grateful appreciation of the nation would be his to command. family; executive business is but a lusty
