

MINING IN THE BLACK HILLS

Judge Kimball Sells the Tigerville to Pittsburg Parties.

WAS ONCE A RICH DISTRICT

Owners of Wyoming Claims Are Now Looking Up Titles to Properties Which They Had Abandoned.

KEYSTONE S. D., AUG. 2.—(Special)—Pittsburg (Pa.) people

have purchased what is known as the Kimball property in the Tigerville, and the chances are that the district will again come to the front as a mining center. About twenty years ago the Tigerville district was famous as a producer of rich ore, the King Solomon mine, especially, being one of the show mines of the southern hills. It was very rich near the surface and some of the specimens taken from it were surpassing rich, literally covered with free gold.

Kimball Stayed by It.

One of those whose faith in the district could not be shaken was Judge Kimball, who during the years had been actively engaged in prospecting, and has succeeded in getting title to a large acreage of ground, every claim of which has received more or less development, and on many good surface indications of rich ore are present. This property, which had been transferred to the Pittsburg company, which will begin extensive development work upon it at once. Like all the ore of the district, that exposed in the workings made on the various veins is free-milling near the surface, carrying free gold specimens. These will be opened up by cuts and tunnels, and where thought best shafts will be sunk. When the ground has been opened up and in condition to furnish a steady ore supply a treatment plant will be built, probably on Newton's Fork, one which will be capable not only of handling the free-milling ores, but also of concentrating those which have grown rebellious with depth. Water and timber abound on the property, and all the advantages for mining and millinery are present. Parties who years ago owned and worked ground in the district, since the consummation of the Judge Kimball's deal, are now busy looking up title to the former possessions, which they abandoned at the time the camp went down, and there is quite a little stir in the district. Judge Kimball received a good offer for his property, but not more money than it is worth, and he now contemplates him for the years of labor he has put in on the ground.

Extreme Mill Goes Up.

CUSTER CITY, S. D., Aug. 2.—(Special).—Nearly all of the machinery for the ten-stamp mill to be erected for the Extreme Mining company on its London group of claims near this city is on the ground and ready to be placed in position. Work is still going on upon the mill building, and it is expected to have it ready for the machinery in a few weeks. In the mine drifting has been started from the sixty-foot level of the main working shaft, running toward the east. On this level the ore body is an extensive one, and the value of the ore is possible that mining and milling operations will shortly be resumed on the North Star. Samples of the ore were some time ago sent to Swansea, Wales, and there tested in an effort to determine the proper method of treating the ore. From these samples have been received and the result will be made public, and then the mill will be rearranged to accord to the treatment suggested from Swansea. The North Star is a property containing a large ore body, from which rich assays have been received, but difficulty has been experienced in ascertaining the proper method of treating the ore.

Galena Entering a Boom.

GALENA, S. D., Aug. 2.—(Special).—From present appearances it looks as though Galena was about to enter into the prosperity which has for so long a time been promised the camp. Since the transfer of the Union Hill property to the new company composed of Chicago and New York men, work on the different claims has been progressing and the development has proven very satisfactory. The old forty-stamp mill is being moved into the new mill building and tanks are being placed in the old building to store water. About 200 tons of pulp daily, and it is expected to have the changes made in a month or so. The various workings are being prepared for taking out ore, a branch of the Burlington narrow gauge railroad is being run to the Union Hill mine and other big openings, and it looks as though a big force of miners and other workmen will find employment with the company before the winter begins. The work is being done under the direction of James B. Hardin, a miner of experience in the district, and one who is familiar with every foot of the Union Hill company's holdings.

Golden Crest's Surprise.

One of the sensational finds of the season is that which few days ago on the property of the Golden Crest company. Ore which is going higher than \$30 a ton has been found and it evidently is not a little pocket, for the shoot which has been uncovered assays high for its entire width. It is porous, ore and lies close to the surface, which will facilitate its being run through the mill after it has been screened in order to remove the roots and grime. It is a big shoot and its richness shows no sign of decreasing with the work which has been put upon it. The richest of the ore is being hand sorted and stored. It is said to equal anything found in former years in the famous Gilt Edge property, which lies close to it. Work on the addition to the treatment has progressed to such an extent that within a few weeks the company will be treating 100 tons of ore daily. A large boarding house for the accommodation of the miners and other employees of the company has been completed and the Golden Crest is now well fixed for the winter.

James Conzett, Superintendent of the Ruby Gold Mining Company, has been working a force of men preparing for the coming winter, and has just completed a large boarding house at the mine.

THE POWER OF STEAM.

Many May See, but It Takes Genius to Realize. When James Watt saw the steam causing the kettle lid to jump up and down he said: "There must be power in that steam that it can lift such a weight." There was. Millions prior to him had seen the same phenomenon and regarded it as an unexplained and regarded it as an unexplained phenomenon. Recent scientific research has put its finger on the "cause" of Dandurf, Falling Hair and consequent Baldness, and has unearthed a tiny germ which eats the life from the roots of human hair. Dr. Sapp, Harpich, destroys this germ and consequently restores the hair to its natural state.

Horsemesh Mill Nearly Ready.

DEADWOOD, S. D., Aug. 2.—(Special).—Work on the 500-ton mill of the Horsemesh company at Terry is about finished and a part of the mill will be started up by August 18. The company is now a better shape than at any time in its history and has more ore in sight and of as good grade as it ever had, in fact it has a phenomenal showing. Under its new management the company is working its mines for what there is in them. One-half of the stamps in the new mill will begin dropping on or about August 10, which will give it a capacity of 250 tons a day, and the rest will be in operation by the last of the month.

Hidden Fortune's Alterations.

Alterations in the Hidden Fortune mill on Deadwood creek are going ahead nicely and the company expects to have its stamps again dropping by the first of September. In the meantime work in the company's mines is going ahead and the ore bodies are being opened up so that there will be no difficulty in supplying the 300 tons a day necessary to keep the big plant in operation. Developments on the Columbus mine continue to improve that particular piece of property, and the magnificent showing of ore on the 300-foot level appears to be growing better all of the time. Sinking in the big three-compartment shaft continues and it has now reached a depth of almost 60 feet. It will be sunk to the 500-foot level when the workings will be established and the vein explored at that depth. The big Columbus vein, which shows in the workings on the 300-level has been opened up on another claim north of the Columbus, and where it is exposed is about 300 feet wide and carries the same character of ore as is found in the lower workings of the Columbus. It is said that the company will soon begin work on the foundations for its big 1,000-ton mill, which it proposes to build on Whitewood creek Deadwood.

Elect Teachers Tonight.

The regular monthly meeting of the Board of Education will be held tonight. It is understood that four or five new members will be selected. Already 108 teachers, including principals, have been elected, but more teachers are needed in order to fill out the quota. Secretary Laverty has a list of the teachers to be named tonight, so it is stated, and the intention of the majority is to put the slate through without comment.

Council Again Tonight.

A meeting of the city council is to be held tonight. There is very little business to be transacted and the chances are that nothing of importance will be done. A report from appraisers appointed to investigate the damages, if any, on account of the grading in improvement district No. 13 will be sent in. No claims of bills will be held tonight. There is very little business to be transacted and the chances are that nothing of importance will be done.

Range Cattle Coming.

Cattle from the western ranges are commencing to come to market, but the heavy runs are not expected for fifteen days yet. The cattle that are being shipped are cows and beef steers. As for feeders, dealers here say that these will be held back until later in the season, on account of there being no demand now for feeder stock. Several shipments of western cows and beef steers arrived at the yards last night, and as the market appears favorable the shippers expect to realize good prices.

Charge Murder to Woman

Mrs. Middleton has returned from a visit with relatives at St. Joseph, Mo., but the Fire and Police board will meet in the council chamber on Tuesday evening. Dr. W. H. White will perform the duties of city physician during the absence of Dr. Sapp. Dr. Sapp, city physician, left last night for Alexandria, Minn., to be gone about two weeks. Rev. Dr. Lorimer of Lincoln preached an interesting sermon at the First Presbyterian church. Complaint is made about the accumulation of mud on the east side of Twenty-fourth street just north of F street. Mrs. J. B. Ashe is still at Salt Lake City, Utah, and sends word that her health is improving rapidly. A long-felt want, a reasonable-priced table d'hotel dinner. At the Blue Ribbon one may be had for 40 cents.

CHARGE MURDER TO WOMAN

Almost Collapses When Told by Officer She Would Have to Go to Jail. ST. LOUIS, Aug. 2.—A special to the Globe-Democrat from Bunker Hill, Ill., says the coroner's jury that has been investigating the death of Ewart Mears Checkfield arrived at a verdict tonight, accusing Mrs. Ida Cutler, wife of Albert Cutler, already under arrest on a state warrant sworn to by the boy's father, James Checkfield, with being guilty of the crime. Coroner Robinson at once issued a mittimus, upon which the prisoner was turned over to Deputy Sheriff Higgins. The latter relieved the city marshal of his charge and stated that he would take Mrs. Cutler to the jail at Carlinville tomorrow morning if she is held to travel. Mrs. Cutler is held for the grand jury. When the deputy announced to her that the verdict of the jury accused her of the crime, and that she would have to go to prison, she appeared to be about to collapse for a while, and then, recovering, began weeping and moaning in a hysterical manner.

THREE KILLED BY LIGHTNING

Strikes Small Pleasure Yacht While Lying Near Wharf in Mobile. MOBILE, Ala., Aug. 2.—The pleasure yacht Florodora was struck by lightning this afternoon off the wharf at Point Clear, on Mobile bay, killing three men. The dead are: LEDYARD SCOTT, formerly professor in the imperial university at Kogakima, Japan. BRUCE GRANVILLE LINCOLN, a wealthy young Englishman, visiting Mobile in connection with some investments. WILLIAM BRERSTON, pilot of the yacht. Mr. Scott's daughter and Charles Baldwin were burned by the bolt, but were not fatally injured.

Tailors' Union in Session.

PAY OF RAILROAD PRESIDENTS

Salaries of the Men Who Are at the Head of the Country's Great Systems.

Why Pay as Much for an inferior beer?

Schlitz beer costs twice what common beer costs in the brewing. One-half pays for the product; the other half for its purity.

One-half is spent in cleanliness, in filtering even the air that touches it, in filtering the beer, in sterilizing every bottle. And it pays the
