At sight of him the people broke forth in cheers equal to the day the horse broke the world's record for a half mile track. N. J. Ronin finally restored quiet and in a short little talk told of the accomplishment of Cresceus and his due at the hands of the people of Nebraska. He then stepped forth with a beautiful floral wreath with which to crown the animal. But Cresceus would have none of it. He backed quietly but determinedly away from the flowers and repeated this each time Mr. Ronin advanced, evidently being too modeat to accept such honors.

When this was completed the crowd went wild again for a speech from the horse's owner. Mr. Ketchem responded, telling the people of Nebraska that nowhere had he and his party received more courteous treatment than at the hands of the people of this state. He claimed that all honor should be given the horse and not him and that on behalf of them both he thanked everybody in the state.

Little Talk of Campaign.

Now that Lee Herdman has returned from his trip north and the republican state committee has appointed an executive committee to look after its affairs, it is sarnest in the near future. So far there is little talk of orstors and very few places seem arying for them.

The action of the democratic judicial convention at Nebraska City yesterday in endorsing Judge Paul Jessen, the repub-Hoan candidate for that district, has caused much favorable comment here.

A little plan of the democrats to work in the present judicial campaign is just coming out. It is the belief now that in this district, where there is no show for the fusionists, they will just endorse the republican candidates, giving them a glad hand and stepping clear out of the way. They will do this claiming that they are in favor of a non-partican judiciary. They then expect to be able to get republicans to vote for Judge Sullivan on the 'same ples, referring to the fact that they have no ticket nominated to show their sincerity for the non-partisan judiciary. The real reason for the endorsement of the republican candidates by the democrats is said to be because the democrats and populists can find no timber from which to make candidate
