STANDARD INVADES WYOMING Expert Makes Favorable Report to Company on Bonance Field.

CHEYENNE, Wyo., Sept. 12.-It is learned from a reliable authority that the Standard Oil company has become interested in the Bonanza oll fields, in northern Wyoming, and will operate there next spring. G. H. Galey of the firm of Galey & Guthrie, an oil expert of considerable note, was recently sent to the Bonanza fields by the Rockefellers. He made an exhaustive examination of the fields and tests of the oils and has returned to Pittsburg with his report. Enroute home he stated in an interview that the Bonanra fields are second to none in the world. The product is the richest illuminating oil ever discovered in the world and the fields are bound to become heavy producers in a very short time.

Owners of claims in the fields are arranging to do their assessment work before January 1, 1904. A number of assess ment rigs will go to Bonanza and begin work at once. It is expected there will be a wild scramble on the night of December 31. and many claims will probably be jumped, but present holders will be on the ground and will do everything possible to retain their holdings, which appear destined to become very valuable soon.

Mr. Hunter's purpose is to give the east ern newspaper men a true idea of the wonderful prosperity of South Dakota and to contradict the harmful reports of damage by frost. Careful investigation reveals a corn crop estimated at about 60,000,000 bushels of corn and no damage anywhere from frost. The husk is green on the late corn and the stalk sound and healthy. Mr. Hunter is greatly pleased with conditions as he finds them and the newspaper men had never dreamed of such prosperity in any farming country.
