As compared with last Thursday, which was the low day of the year, the advance amounts to about 15025c, and as compared with the close of last week prices are now about 10915c higher. A 1 graces have joined in the advance. The same as has been the case for some time past, corn feas have been very searce this week. Anything de-cent would sell from \$3.75 down. Good to choice western grass cows could be quoted from \$2.69 to \$315, fair to good from \$2.49 to \$2.53, and canners and cutters from \$1.59 to \$2.5. Buils, yeal calves and suags have been selling in just about the same notches they did last week.

but a triffe heavier than for the same week of fast year. The exact ligures will be found in the table at the head of the column. The week opened with a strong market, but from that time until the close of the market on Thursday there was a succession of sensational breaks in the market. The decline for the week to date on Thursday amounted to close to foe, but the last two days the market has been a little stronger, so that closing prices are do: to ffe lower than a week ago. This has been the most radical change in prices that has gone into effect in some time past. Representative sales: Ns. Av. Sh. Fr. No. Av. En. Fr.
