While Omaha paid a little attention to March oats, practically all of the speculation in grain for future delivery was on corn, May and July. Wheat, seemed to be too fancy an article and the chances of a break or advance on war news and manipulation too great for the local pit. The strength shown in Chicago July wheat, which gained i point, did not encourage Omaha, which had opened up 'sc weaker than the close and continued without much strength. Chicago May wheat broke 1%c shortly after the opening, probably on selling by the big boys, and did not recover to the opening price of \$3%c, which was 'sc higher than the close of Wednesday. In both Chicago and Omaha May corn opened up a little weaker than the close of Wednesday, and in the early hour showed much weakness, breaking, it was thought, under large Cudahy and Armour sellings. Chicago absorbed a great deal of this liquidation, unknown shorts taking it. Under this influence Chicago rallied and from 15%c, the low point, 'sc below the opening, it rallied to 14%-954%c above the opening, it rallied to 14%-954%c above the opening, it rallied to 14%-954%c above the opening. Later more selling brought the market down a little Omaha followed Chicago, with a demand at 43%c and 4tc, with little offered.

CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing

Prices on Board of Trade. CHICAGO, Feb. 11.—Profit taking caused a less of 1% of in the price of May wheat today. A large part of the loss was regained, however, on buying influenced by war rumors. Compared with last night's quotations, the final figures today for May wheat were % lower. Course grains were firm, May corn closing % higher and oats % higher. Provisions were 1% 6 lower to 7% o higher. firm, May corn closing he higher and oats he higher. Provisions were Thuse lower to The higher. Initial sales of May wheat were made at the figher, prices a shade higher to higher to 50½c, prices a shade higher to higher to 50½c, prices a shade higher to higher to 50½c, prices a shade higher to higher to the higher to high the lower than yesterday's closing quotations. July was unchanged to like lower at 57½g3f2c. Several large commission houses and many local holders were liberal sellers at the start, influenced largely by the fact that there would be no session of the board tomorrow, Lincoln's birthday. Fears of serious developments before the resumption of trading Saturday caused much evening up of sales. Within the first half hour May declined to 91½c, while July sold off to 81½c. Buying on the break, however, was of equally as good a character as the previous selling. Commission houses had plenty of orders to purchase July, and the price of that option soon started upward again. May followed in sympathy. News from the northwest continued of a builish nature had the demand for cash wheat here and at the seaboard was much improved. Toward the end of the assion there was considerable selling of both May and July by the leading bull operator. As a result, many local traders took the selling side of the market. An easier tone developed, lasting until the close, May leaving off at 81½g965c. July closed unchanged at 87%c, after reaching 85%c. Clearances of wheat and flour were equal to 222,300 bu. Primary receipts were 42.141 bu. Exports of wheat and flour for the week, according to Bradstreet's, were equal to 1,746,000 bu.

NEW YORK STOCKS AND BONDS Trading Lifeless and Speculative Position Limited to Small Deals.

STURDY RESISTANCE TO WAR INFLUENCE

Issuing Notes for Continuing Betterment Plans Results In Persistent Selling.

NEW YORK, Feb. 11.—Only three or four stocks of the least importance got only as much as a point away from last night's level at any time today. This serves to illustrate the lifelessness of the trading and the sluggishness of the tock market. The imminence of a holiday was in part the cause of this stagnation. The smallness of the speculative position was thus clearly indicated, the approach of a holiday usually prompting speculators to close up their accounts. This would be especially true with the extra uncertainties of a time of war. The uncertain wavering of the market during the week has discouraged speculative ventures entirely and the news of the day was practically ignored, whether of a favorable or unfavorable character. The market again offered sturdy resistance to the depressing influence of the war situation abroad, making an effective rally from the opening declines. But there was no disposition to follow the advance. While the readiness of effective support to appear in face of any attack on values leaves no opportunity open for profitable operations on the short side, there is an inclination to sell stocks on advances which makes the long side equally unattractive.

The stock market feeling toward railroad borrowings is expressed today in the persistent selling of New York Central, owing to the prevalent rumors that the company was issuing notes for continuing its plans of betterment. The admission that orders for some 53,000 tons of steel rails had been pinced on behalf of the Harriman tines was accepted as a favorable factor, the more so as it was believed that the schedule price was to be paid. But the stocks affected responded but slightly to the news. The rise in Brooklyn Transit was considered as a continuation of the speculation in that stock and was of little effect in the general market. Amalgamated Copper was diffed over a point in the late dealing and was nominally due to trade conditions and it is argued that the outbreak of war will cut off the Japanese product from the market close

Foreign Financial.

Foreign Financial.

LONDON, Feb. 11.—Money was much wanted today for Stock exchange payments and the market was compelled to borrow from the Bank of England. Dis punts were hard. Business on the Stock exchange was generally flat, though there was a settling down after the war outbreak excitement. Trading was mainly restricted to the completion of the accounts. The markets closed with a better tone. Consols opened dull, hardened later and closed below the best quotations of the day. Americans opened weak, afterwards steadled to a fraction above parity, became neglected, improved during the last hour on New York support and closed steady. Grand Trunks hardened on dividend anticipations. Foreigners were irregular, being swayed by the war news. Russians were lower at first, but recovered. Japanese were weak. Argentines were strong, Kaffirs were heavy on Paris offerings, partly on account of the Bremen failure yesterday and parity because of the protracted discussion of the South African labor question. The strength of silver was due to the eastern demand. The amount of builton taken into the Hank of England on balance today was £19,000. The sum of £55,000 was withdrawn for shipment to South America. The weekly statement of the Bank of England shows the following changes: Total reserve, increased £287,000: notes reserve; increased £287,000: notes reserve; lucreased £376,000; builton, increased £251,000; other deposits, increased £287,000: notes reserve; lucreased £50,000; Envernment securities, decreased £50,000; fine proportion of the Bank of England's reserve to liability this week is 48.95 per cent. Last week it was 48.02 per cent. Bar gold, 775 9/4d; American eagles, 764 4/4d.

* Dry Goods Market. NEW YORK, Febr 11.—DRY GOODS—The reaction in the cotton market has reflected the views of a good many sellers of dry goods, who were disposed to take a pessimistic view of the situation and who were in certain instances were inclined to offer concessions. Now, however, the outlook for business of a moderate size is regarded as bright next week, with the need of jobbers coming into the market for reassortments.
