Gentile Democrats, Favored the Elec-

WASHINGTON, April 25 .- Judge O. W. Powers was on the stand today at the ppening of the Smoot investigation before the senate committee on privileges and elections today and Attorney Van Cott resumed cross-examination. He questioned the witness in regard to the Mermon interest in educational affairs. Judge Powers praised the people highly for their application to trades, professions, art and the sciences. Mining schools and other scientific sections were praised by the witness, who said that Mormon schools easily rank with the best institutions of learning in the country. In regard to the disinclina tion of Mormons to inform on polygamists, Judge Powers said that no person likes to be called or considered an informer, Reference was made to the attitude of democrats who were gentiles in nominating Brigham H. While Judge Powers commended much o the educational policy in Utah, he said the admirable system was inaugurated before statehood. In answer to a question by Senator Bailey the witness said he understood that in some sections the public schools were dismissed early for religious instructions. The Mormons found much to complain of in regard to that, said the witness.

Chairman Burrows ascertained from th witness that he knew Apostle Heber J. Grant, who is now in Germany attending an international kindergarten convention. "Apostic Grant is a great

"Oh, yes," was the answer. "I don't mean that he went to Germany on account of the warrant, but that he left town in the night on that account." Moses Thatcher was then called to the stand. He was an apostle at the time of his candidacy for political offices, and a great deal of ceremony has been given in regard to his differences with the church on account of politices. Mr. Thatcher said the controversy with the church was in 1886 and 1896, and gave an explanation of his study of politics before he became active in any campaign. He also spoke of his

duties as an apostle of the church. The witness minimised his trouble with the church and said he always recognized the power of a majority. The first friction, according to his story, followed a speech which he made in 1882 in which he criticised the republicans, and a letter was issued by Joseph F. Smith and John Henry Smith, protesting against his remarks. Mr. Thatcher read from letters and speeches

"Can the senator give the name of the company?' asked Mr. Aldrich. "He has said he would give concrete cases." "I can give the name, and later will do

so," replied Mr. Bacon, who then read a letter from Charles M. Schwab to H. C. Frick, giving the cost of manufacturing steel rails, by which Mr. Bacon showed that the "trust" needed the protection against English steel manufacturers. The letter said rails could be sold at a profit of \$16 per ton.

"It would be very difficult to convince pig fron producers of Alabama and surrounding states who have been receiving \$18 and \$20 for their iron," said Mr. Aldrich, "that the statement is correct." "That is information given by Mr. Schwab in a private letter," said Mr. "I don't care how private it is." ex-
