DARING HARRY RUSSELL

The Intreptd Bicycle High Diver Se cured for Courtland Beach. Manager Griffith of Courtland Beach has secured one of the, if not the strongest and most sensational act that was ever exhibited in Omaha. It is know as the bicycle high dive and is performed by Harry Russell, a daring one-legged cyclist. In brief, Russell starts his ride at the top of an incline 100 feet long. At the highest point it is 75 feet from the ground; at the lower end it terminates 30 feet above

the ground. Seventy-five feet beyond incline is a tank containing but 2 feet of water. With terrific speed Russell, mounted on a bloyale, rushes down the incline. At the low end he dives over the handle bars of his wheel, allowing it to drop into a net, while he projects himself through the air, the intervening space between incline and tank, and into the latter. The rush down the incline and the flight of the body through the air is terrifying to the spectators. Russell courts death every time he mounts his wheel. The act will be opened Sunday afternoon and will be seen every afternoon and night. No act of kindred nature demands so much money.

Throughout the east it was the reigning ensation, she loop-the-loop and similar acts being placed in the background. The papers everywhere dubbed it the "deliberate suicide.
