This block was ordered improved by the former council at the instance, it is alleged, of one property owner. Be that an It may, the taxoayers are now called upon to pay over \$5,000 for the paving, curbing, sewering and grading of this single block, for the reason that the property on the south side is occupied by a huge bluff made famous by the warring classes of the high school prior to the close of the school year as "Gibraltar." On the north side the lots with but one exception, are unimproved and their assessment valuation is low. The consensus of opinion is that this block should not have been improved until such time as the property owners had brought their lots to grade, when they would be valuable as residence sites, whereas in

that present condition they are almost valualess. The improvement of this block at the beheat, as it is alleged, of one property owner, who built a house on the single loi he owned, has cost the taxpayers of the city upward of \$5,000.

Speaking of this yesterday several of the justice to the taxpayers of this city to order this single block improved, as it must have been realised at that time that the expense of such improvements and that the burden would, fall upon the city. Two or three years hence, when the big

All the Year Around Offices

some offnes are hot in summer and cold in winter. Offices that are always wurm in winter and cool in summer are in The fiee Buflding. That is because the building was built by an architect who kept these matters in mind and because the building is situated an that there is no west sun beating down upon it and there is plenty of air on all aides, and through the court on the inside. We have a few very desirable offices at very reasonable prices,

Lot us abow them to you."
