No. 5, 300 Feet Deep 600 ACRES OF PROVED

LOCATION

The Cherryvale Central Oil and Gas Company's home lease of 160 acres is one-half mile north of Cherryvale, in the very heart of the oil development of Eastern Montgomery county and Western Labette county. Kansas, and is surrounded by the holdings of the following companies, which com-

The Federal-Betterment Oil and Gas Company, 29 wells; the Floker City Oil and Gas Company, 11 weils; Illinois Valley Oil, Gas and Pipe Line Company, 19 weils; Cherryvale Oil, Gas and Manufacturing Company, 22 wells; the White Oil, Gas and Manufacturing Company, 2 wells; Hill Oil and Gas Company, 9 wells; the Farmers' Oil, Gas and Mineral Company, 17 wells; Publishers' Oil and Gas Company, 9 wells; Farrington Oil and Gas Company, 9 wells; Garnet Oil and Gas Company, 10 we'ls; American Oil Company, a wells; Denver-International Oil Company, 7 wells, and many other

The Standard Oil Company's pipe line follows the west and north lines of our lease, and is within 100 feet of our oiler No. 1, AND WE CAN SELL OIL THE DAY AFTER OUR FUMPS START.
Some of these companies which join our lease, especially the Federal-Betterment, on the north line,
have wells north in a few rods of ours, and have been marketing oil for three years, and are the
ploneers in Southeastern Kansas. They are now drilling day and night, using two to four strings of
tools and the stock is no longer offered at any price. tools, and the stock is no longer offered at any price,
'The stock in all other companies has raised from 5 cents to 30, 35 and 50 cents in the last year,

Our lease, located as it is, has been sought for years, but the price asked for it was considered prohibitive by companies of small resources, but finally the bankers, merchants and business men composing this company decided that a DEVELOPED PROPOSITION WAS SAFE AT ANY PRICE, and a perpetual lease was secured. Work commenced at once, and in less than two months we have four wells on the land, all of which not only make excellent oil showing, but the two wells on the south side of the lease developed an abundance of gas to furnish the company enough gas for operating our oil plant, and also sufficient to run a brick plant on the land.

The Frisco railroad crosses the land, giving us shipping facilities for our brick, should the company decide to construct a plant, which business is covered by our charter. The distance from the city is less than half a mile. We have abundance of running water for all purposes, including brick

440 ACRE LEASE

In addition to the 160 acres we are now developing, this company owns a perpetual lease on 440 acres west of the Cherryvale field, in what is known as the Neodesha-Elk City trend, and the developments already made in that location have proved it a very valuable field, and as soon as the pipe lines are assured we will have a big rush for the Elk City field.

The Standard Oil Company's refinery is at Neodesha, 14 miles northwest of our field, and the demand for oil near it is always greater than the supply. Its pipe line is within 100 feet of our oiler No. 1. Our oil is the very richest and highest grade, and reached \$1.35—the highest price ever paid for Western oil.

USING OUR OWN GAS

Our gas is now being used by the drillers, and brings in from \$150 to \$200 per month, which is a direct saving of that amount to the company.

WE WORK ON A CASH BASIS

The members of this company are every one financially responsible, and it is the fixed policy of the management that not a cent of liability shall be created until the cash is in the treasury to meet it, and this POLICY WILL BE MAINTAINED, for it "pays." We are today getting our drilling done at 80 cents per foot, while some companies within a mile of us are paying \$1.00, because the driller knows the money and the end of the hole meet, and that fact regulates the price in many instances. In this connection we respectfully call attention to comments on the personnel of the company by some of our home papers, which we copy:

(Cherryvale Daily News.)

OIL NOTES The Cherryvale Central Oil and Gas Company, of this city, is now drilling well No. 4 on the Hutter lease, just north of town. This company is remarkable for the personnel of its promoters. Among them are to be found many of our leading citizens. The president is E. S. McDonald, of the firm of Richart & McDonald—he is now serving his second term as mayor of this city; J. M. Courtney, vice president, is superintendent of the water works and a large property owner; C. O. Wright, the

treasurer, is president of the People's bank, of this city; Judge McClelland, the secretary and general manager, is an attorney and is among the pioneer off operators about Cherryvale and is an operator of extensive experience and has been remarkably successful; he is a large operator in the Peru field also, where he has some very profitable wells. Among the promoters are the president-cashler of the Montgomery County bank and president and cashier of the People's bank; A. R. Kvahs, manager of the Whitney Lumber and Grain Company; Dr. Seacat, a leading physician; S. T. Carl, M. D., a Kansas City capitalist; George J. Markley, the millienaire banker of Mineral City, O., G. M. Shanton, ex-mayor of this city, and a number of other leading business men of this city—an array of successful business men that will certainly inspire public confidence in the company and speaks well for the ability of Judge McCleiland as an organizer and the confidence they have in him as an oil man.

OUR FINANCIAL CONDITION AND POLICY

Up to this time the original organizers of the company have paid in full for the 600 acres of oil and gas leases, and completed four good wells and have ample means in the treasury to complete Nos. 5 and 6 before a dollar of the money for the sale of the stock now offered will be used, but we must rush development during the summer months, and commence the construction of our pumping plant at once, that it may be ready to commence operation as soon as ten or twelve wells are completed. This work requires the expenditure of \$15,600 or \$25,000 within the next few months; and it is to meet this expense that we now offer a small amount of our stock at the lowest price over offered the public on a proven oil proposition-better, by far, than any proposition ever offered before for less than 30 to 30 cents, and companies in this locality, with only a few more wells, are asking from 30 to 60 cents at this time.

The original members are taking the stock offered by this advertisement at the same prices the public pay for it, and believe it an excellent investment.

Every additional well will, of course, raise the price of our stock, and subscribers should send their subscriptions or come at once and verify the statements here made by personal observation.

OUR PROSPECTS

As to our No. 4 just completed, we have no hesitation in pronouncing it one of the finest wells ever drilled in the Cherryvale field, and the scores of our people who witnessed the shooting of they well, and who have continually visited it ever since it was brought in, are of this opinion.

The following local from one of our local papers, the Daily Republican, which doubted the reports brought in by the visitors, is but a moderate statement concerning the well and conditions surround-

(Daily Republican, IT IS A BIG OILER

A great deal has been said about the Cherryvale Central's well No. 4, which was completed Tuesday, and the Republican determined yesterday to investigate for itself. We found the well all that has been claimed for it, and more, and after visiting several other sections of the local field, in which are located fine producers, we feel safe in saying that it is the best of the lot.

It would seem from the amount of oil still in sight that at least seventy-five barrels were wasted

in cleaning out the well. It is decidedly the oiliest well in the vicinity of Cherryvale, and, in our opinion, this company has tapped the very center of the pool. So thoroughly are others convinced of this that some of our home people have doubled their subscriptions to stock since personally investigating the new find.

The Cherryvale field extends from the Farrington wells on the southeast to the Hill wells on the northwest, and the Cherryvale Central Company is between the two, and central in location as

The Republican is gratified with the development of the local field, and heartily co the Cherryvale Central people, who, by the way, are mostly home men, and Judge McCleffund on their latest strike and the leading position it gives them among the oil companies operating in this The reader will please remember that there are eight other locations within a radius of 400 feet

from this well, and there is no reason to believe any one of them will miss the pool tapped by No. 4, and our drilling forces will continue operations day and night, until the next eight wells surrounding

The future of this company is assured. The promoters have taken all of the rials (if any was sible in such a location), and now only ask such assistance as will enable us to bring the plant to the highest dividend paying basis ever reached in this field at the earliest possible moment.

This can easily be done during the summer months, as we have our own gas for operation and abundance of water.

Oil can be produced in the winter, but development is much slower and more expensive during

that season,

If possible, come and see us, if not, send draft, payable to the Cherryvale Central Oil and Gas Company, with your order for stock at once, and come later, for this stock will raise in price as the wells come in. The last two wells drilled on the lease joining us have been gushers, throwing oil over the standard rig in such abundance that the water in the creak was covered a great distance before the well could be closed, and some of the wells on the north line and west of our lease have been squally good "showers," but nearly all the wells in this field are desitute of gas and need to be pumped from the first, but the "still" wells are never behind their noisy sisters when the pipe line reports come in.

Our wells will certainly compare with those of our immediate ne shors, and with twenty wells we can safely count on a production of 200 to 200 barrels per day.

Our stock will then be worth 75 to 80 cents, which is now offered at 8 cents.

We have in all 600 acres of proved territory well developed, with four wells completed and cash enough in the treasury to complete two more before using one cent of the money raised by this advertisement, and we most cordially invite comparison with any oil proposition on the market today.

This one is safe, absolutely proved, and the price is reasonable; in fact, cheap, in comparison with other propositions.

Our only object for selling stock is to hasten development during the summer months, and our drilling is being pushed day and night.

100 shares, \$8; 500 shares, \$40; 1,000 shares, \$75; 2,000 shares, \$10; 2,000 shares and over \$45 per thousand. Help yourself and us by joining a company of business men operating on a cash basis. Send draft to order of our company. Any additional information cheerfully furnished.

G. W. McCLELLAND, Sec'y and Gen. Mgr. the Cherryvale Central Oll & Gas Co., Cherryvale, Kan.

LEASING PLAN IS FAVORED

KEITH COUNTY BONDS GO TO THE STATE

Governor Mickey Issues Proclamation Fixing Monday, September 5, as Labor Day-Woodmen In Have Pienie

(From a Staff Correspondent.) SANCOLN, Neb., August 18.—(Special. In response to an inquiry from Gifford Pinchot head of the United States Burean of Forestry, Land Commissioner Pollmer through H. M. Eaton, has recommended that the public lands in the western section of the state, not home-steaded under the terms of the Kinkaid law, be leased at not less than 3 cents an acre, or as much more as it will bring at a competitive bidding or auction. This, it is believed, would help the state in disposing of the leases to its school lands.

These auctions, which are recommended as the proper method of disposing of this public land, which is now a free range, would be advertised and conducted just as the state auctions are.

In addition to the above recommenda tions several interesting statements in regard to the state lands are made. Mr. Eston, who compiled the report, makes, the statement that the state owns 800,

Scarce Meat may be a Blessing

Giving one the chance to try the tremendous value of a complete change of diet.

TRY THIS FOR BREAKFAST:

A little Fruit.

A dish of Grape-Nuts and Cream, Two alices of hard Toast, A cup of hot, well-made

Postum Food Coffee.

That's all, and you feel clean and wellfed until lunch.

THEN REPEAT.

And for dinner at night have plenty if ment and vegetables and a Grape-Nuts pudding. Such a diet will make a change in your bealth and strength worth trial,

"There's a Resson."

009 acres of land belonging to the school fund which is of value for agriculture, out of an area of 2.368,623.22 still owned by the state. The total cession of school land to the state by the national congress was 2,973,402.53 acres, but the state has already deeded 614,733.81 acres, mostly agricul-tural land, to private individuals. None of the grazing land is sold, except

0

where it has access to a good water supply for irrigation purposes. Some of the agricultural land which was under lease contract was sold for \$70 an acre, and constitution provides that none of the land can be sold for less than \$7 an

The report states that the agricultural ands are in great demand at all times, but notwithstanding the unfertile character of much of the western land less than 1.000 acres of the total state domain is nonproductive to the schol fund. A large share of the agricultural lands and nearly all of the territory suitable for grazing is under twenty-five year leases. Brings in Big Revenue,

The lands belonging to the permanent school fund bring in a big income for the schools of the state, the entire amount being distributed from the temperary school fund for the benefit of all the schools in the state in proportion to the number of scholars of school age in each county. The ncome for the blennium ending November 20, 1902, the only available figures until the report for the present blennium, is compiled, show that the revenue from this ource was \$1,564,979.13.

Mr. Eaton concludes that the leasing sysinto before that date. About 1,520,000 acres one of the board of directors, delivered the yet remain absolutely in the hands of the address of the day. state, and a considerable area could be sold if the state legislature should repeal the law enacted in 1887. However, the commissioner favors the leasing system, and believes that the land should be held in perpetuity for the good of the state echool

"I am unable to see," he says, "where he state would receive any greater value by exchange or consolidation with the national government, other than co-operation regarding the leasing of public land." This last response was in answer to the

duery of the head of the forestry bureau as to the possibility of some kind of a joint management or national control of method of handling the problem is the leas- a goodly supply before the price goes be ing of the vacant United States domain youd reason at not to exceed I cents an acre. That is Mr. Eaton's view, but he believes that much of the vacant land will be taken up under the Kinkaid law, thus disposing of the problem presented heretofore. With the ands leased at public bidding, the cattlethen could exercise less control over the school lands, which they now, in some cases, feel they have the right to grass

The statute provides a penalty of from \$25 to \$1,000 for trespass on school lands, but the penulty has not been exacted so

Buya Kelth County Bonds. This afternoon the State Board of Educational Lands and Funds met for the consideration of an offer of \$15,000 Keith county bridge bonds, bearing 4 per cent. They were offered directly by the county officials without the intermediation of a broker, and the offer was accepted. The onds run without option for six years, and hereafter \$1,000 is to be paid each year until they are paid. The purchase leaves only \$22,000 in available cash in the per-

circles that the headquarters of the two parties will be located in this city. Some trouble has been met in securing the right kind of an offer from the Lincoln hotels, but the location is favored, and the majority of the committeemen are said to be willing to locate it in Lincoln. Some of the candidates from the northern section of the state favor Omaha.

Labor Day Proclamation. Governor Mickey has issued the following Labor day proclamation:

ing Labor day proclamation:

A nation's greatness may be measured by its capacity for labor. Other elements of power are supplemental to it and only become important when the genius of toll has given them direction. Nowhere is perfection attained without effort. Our own nation, greater than any other, has correspondingly dignified labor in many ways and has also set apart a special executive department which has to do with all questions pertaining to the great army of wage carners. Further than that nearly all the states, Nebraska included, have, by legislative enactment, designated a particular day in recognition of labor, as a public tribute to the importance of toil and the results achieved by it. In obedience, therefore, to the mandate of law and to and the results achieved by it. In obedience, therefore, to the mandate of law and to established custom, I. John H. Mickey, governor of the state of Nebraska, do hereby designate Monday, Beptember i, 1904, as Labor day, and earnestly request all who toil, whether with hand or brain, to take a brief respite from their ordinary avocations and pass the day in such a way as will best promots their social, intellectual and physical enjoyment.

Woodmen Go Picnicking. Five hundred Woodmen left Lincoln for Crete this morning to attend the annual district piculo and log-rolling. Hungry Men Soon Make a Hole in the Stock of the Commissary Department and Rush Orders

Go in for More. DAVID CITY, Neb., Aug. 18 .- (Special.)-The blowing of bugies and roar of cannon at Camp Victor Vifquain awakened citizens at an early hour this morning. The Nebraska National Guard is settled in camp and the regular routine of exercises is being carried out according to the orders issued Tuesday evening by General Culver, commanding officer. A large number of spectators witnessed the dress parade of the two regiments yesterday evening. That General Culver is raising the standard and standing of the National Guard is apparent, and he is receiving the commendation and compliments

of everyone for the effectiveness of his work. This forenoon the regimental drills on the Anderson ranch, one half mile west of the camp grounds, were witnessed by

large crowds of people. Colonel Evans, surgeon general, states that Friday afternoon, the hospital corps, with a detachment of artillery and troop of cavalry, will give an exhibition drill in taking care of wounded soldiers in the same way and manner as in actual service. This will occupy the whole of the drill grounds, and all methods of relieving and taking care of wounded soldiers as in the regular service will be exemplified. The drill will start about 1 o'clock, lasting about two hours.

Hundreds of visitors are on the camp greatly admire the grounds and the encampments for several years and this is the most ideal grounds for the purpose he had ever seen in the state,
