### TEACH FILIPINOS TO PRINT

Natives Are Said to Take Beadily to the Linotype.

EARN FOUR TIMES FORMER WAGE

John S, Leech, Public Printer for Islands, Says Present Policy is Having Wholesome Effect.

(From a Staff Correspondent.) WASHINGTON, Sept. 11. - (Special.) John S. Leech, public printer for the Philippine islands, is in Washington on matters connected with his office. Mr. Leech has just made his estimate for 1965, amounting to 239,362 peace, or \$199,681 in gold. The government printing plant in the Philippines is in some particulars even better equipped than the government's own printery at the national capital. To a large degree type is set by machinery, Morganthaiers being in use and outside of the instructors on the machines, who are Americans, the labor employed is entirely native In addition to a perfect machine plant the office is equipped with the latest improved machinery for binding, electrotyping and stereotyping, together with a complete photo-engraving outfit. All the machines have independent motors, electric power being used. All the branches connected with a printing office are taught the na tives, \$40 sons of the far east being employed, and their adaptability is the subject of sincere congratulation on the part of the government printer, for the Philippines, who has before him a daily report of what each native employe has done the previous day and the matter upon which he was engaged. The native is paid about one-half what the American mechanic gets.

Taft Policy Bears Fruit. "The policy of the administration to-

ward the Filipino," said Mr. Leach, "cannot be too highly praised. The policy which Secretary Taft mangurated when he BUTCHERS was at the head of the Philippine commission of training the people is bearing New Yorkers Say They Withdrew splendid fruit. The printers we get from from National Body Because of the states go out as experts, one clause of their contract stipulating that they must teach the native workmen the art of composition, the manner in which the lmotype machine is operated, together with such other information as will make the native a practical compositor. The Filipino takes kindly to instruction and is acquiring a knowledge of the language rapidly. In fact, the manner in which the commission has conducted affairs is the wonder of the island. Where there was doubt and hesitation with the first coming of the Americans to the Philippines, there is now a warm-hearted acceptance of our way of doing things, and the contrasts between Spanish and American rule are freely talked of and still more commented on by the Filipinos. Before the adlooked upon by the native as something that if it was touched he would be hurt, ex-Our government of the islands has been to feel a personal interest in the development of American rule in the Philippines. He feels a safety that he never felt before While confidence in our manner of govern-

as brave as a lion and looks to the future of the Philippines with the highest hope. Of course I do not know whether the Fil pine is or is not born who can govern him-Superintendent of Education Burrows testified before a senate committee that the Filipino was not yet born for selfgovernment. That, of course, is the judg-ment of the scientist. I am only a plain printer, and could hardly be expected to g've an intelligent judgment in that par-ticular. I do know, however, that those employed in the government printing office in the island show a very great advance and that we are bound to get intelligent workmen through the course that is being pursued by the Philippine commission. Living is somewhat higher than it is in Washfugton and there are needs in tropical countries that are not required in temperate climates like that of the national capital. I am going back to the Philippines to help wherever I can to bring about a better understanding between the natives and the government we have established."

Church is Heavy Loser. The failure of Thomas E. Weggaman, ington because of his large holdings of funds belonging to the Catholic church, is very likely to result in the establishment of a financial department of the Catholic church. Mr. Waggaman, who was regarded as strong as the rock of Gibraltar and who was blindly entrusted with hundreds of thousands of dollars by the offi- SIOUX CITY STRIKE TO GO ON cials of the Catholic church, is almost ments. He still has faith in the character of the investments and says that time will prove his judgment to have been correct. But Mr. Waggaman is a bankrupt, and the Catholic church, through its representatives here, has gone about to protect itself leader of the packing house strike here, wherever possible. Sentiment plays no has ordered the strike to go on. A compart in the financial affairs of the Church mittee of the union called on the super-of Rome. Its investments must be sur- intendent of the Cudahy Packing company rounded by gilt-edge securities. In order, therefore, that the Waggaman failure may not have a repetition it is understood that Cardinal Gibbons looks with favor upon the ignore Donnelly's order. scheme of a financial department in connection with the church. The African Methodist church has pursued this policy for a number of years, all the bishops of that church in the United States, together with the bishops of Australia, New Zealand, Liberia and other countries doing their financial business through the financial office of that church in this city. They pay a man \$4,000 per year as the active head of a board of directors, who pass upon church loans and other transactions of a financial character in which the church may be interested. Just what form of management will be recommended for the care of the finances of the Catholic church is not known, but the idea is general among leading Catholics that no one man should have the handling of the vast sums which come to the Catholic church throughout the United States, particularly sums designated for its educational institutions. It shortly of the several heads of the Catholic university, as well as of Georgetown university, with Cardinal Gibbons. Attorney Charles Bonaparte of Baltimore and financiers holding to the Catholic faith, when is expected that a meeting will be held some general plan of handling the finances of the church will be agreed upon.

Many New Men in Congress. The list of hominees for congress as pre pared by the congressional committees of the two leading parties show a larger numper of new men for congress than has ec-

curred for many years. Members of prominent house committees are faring badly in this campaign. Generally when a man gets an appointment to the appropriations committee, the ways and means committee or the judiciary committee his constituents have enough pride in his success to return him to congress. While few members of the present house committee on appropriations have fallen by the wayside, yet that committee will present a number of new faces in the Fifty-ninth congress. Representative Vanvorhis of Zanesville, O., who has been in the house for almost twelve years and who would have stood a good chance of becoming chairman of the appropriations committee should the present chairman, Mr. Hemenway, be elected to the senate this winter in Indiana, has been

which is 300 per cent more than he ever got

NEW YORK, Sapt, 11 .- At a meeting of the central body of the new Union Butcher Workmen of this city, formed after the butchers of New York decided to ignore the Amalgamated Association of Butcher Workmen and Meat Cutters of North America, a letter was given out, which, it was announced, had been sent to the Butcher Workmen and organized labor in general in the west, explaining the action of the men in returning to work while the western butchers were on strike.

The letter, after referring to the incl. dents leading up to the second strike order says, in part:

"After obeying the call the second time and finding the agreement between Donvent of the Americans the government was nelly and the packers, which we here consider the worst, most stupid and unfaires settlement ever signed by a representative cept, of course, by those holding official of organized labor, and a blunder of call-positions and getting a part of the 'swag.' ment which he had signed the day pre open and above board. The native has come vious, we then, the butcher workmen of New York, seeing that our interests were in danger in the hands of such people as Donnelly, Sterling and Floersch, and because we could not see our way clear to continue under their radical dictation any

strike effected and adds:

"In New York and vicinity we are a good dead wiser, but somewhat poorer by following blindly the unreasonable methods and the high-handed dictation of our officers in the west and never in the future that it is a follow that the strike in th shall we follow the reckless leadership of a national organization until we are first assured that our interests will be managed by sober and intelligent officers. We therefore ask our brothers in the west not to get discouraged by the crushing defeat they have received, but build up your organization on a more solid basis and some day in the future when your action will be wiser and your officers sane, we will be only too giad to again grasp your hand and offer to you our hearty co-operation."

## RIPRAPPING SAID TO BE BAD

Work Along Missouri on Opposite Side Viewed by Expert Cooley.

Expert Engineer Cooley, member of the water board, and City Attorney Wright composed the party that visited the water works at Florence and viewed the ripwhich continues to be the talk of Wash- rapping along the river on the Iowa side of the Missouri river yesterday. Mr. Cooley made a careful inspection of the riprapping in his work of arriving at a basis of appraisal of the water works and pronounced the riprapping in bad condition.

chairman, Mr. Hernhway, be elected to the senate this winter in Indiana, has been defeated for renomination and a republican by the name of S. G. Dawes, a brother of the former comproller of the currency. Charles G. Dawes, named in his stead.

Almost the same thing has happened to a democratic member of the committee, who, should the house go democratic would have been next to the chair and infuential in shaping the money bil. Representative Rice A. Pierce of Tennessee, who has been in the house for fourteen years, was overwhelmingly defeated for renomination by Finis Garrert. A democratic member of the ways and means committee, Representative Sam B. Cooper of Texas, has failed of a renomination after serving twelve years in the popular branchfof congress. A majority of all the democrats in his district were for nominating film again, but by a convention system he lost control of a majority of the delegates and thus went down to defeat. It is expected that a new man will take the place of Eimer J. Burkett of the First Nebroska district on the appropriations committee, should Mr. Burkett be elected to the senate, as now seems likely. Mr. Burkett has been an exceedingly valuable member of the committee, probably participated in by all the republican members from Nebraska, who will make every effort to save the place for the state.

BUTCHERS ISSUE LETTER

New Yorkers Say They Withdrew from Xational Body Because of Incompetent Leadership.

New Yorkers Say They Withdrew from Xational Body Because of Incompetent Leadership. OMAHA, Scpt. 10, 1904.

Corn was weak early in the session, and Corn was weak early in the session, and declines of about % point were sustained in September corn, with December a full point off and May % lower. The bears operated on the theory that the government report would be decidedly bearish, but they were not willing to stay short until the close, and the result was an advance that practically recovered the greater part of the earlier losses.

OMAHA LIVE STOCK MAKKEI

| SHEEP-There were practically no fresh receipts of cattle this morning and consequently there was no market. For the week supplies have also been light, there heing a decrease as dompared with last week amounting to about 2,000 head, and as compared with the same week of last year the falling off amounts to about 12,000 head.

year the failing off amousts to about 12,000 pend.

The demand from this point has been in good shape from packers, and as a result the market on most days has been reasonably active and no great change in ruling prices for sheep has been noted. On some days the feeling was a little stronger than on others, but at the close of the week there is very little change from the close of last week. Packers seemed to be anxious for supplies so that in reality the market may be quoted as closing strong.

Good lambs have also held steady for the week with the demand active. In the case of the fair to good grades, however, receipts have been rather liberal and, owing to severe breaks at ather points, the market here on that class has eased off as much as 1525c. Good stuff, however, has sold well all the week.

The same as has been the case for some little time there have been more feeder buyers on the market this week than sellers. Everything in the way of both sheep and lambs that was at all desirable met. There has also been a big demand for breeding ewes at what looked to be strong prices.

Quotations for grass sheep and lambs:

Kansas City Live Stock Market.

KANSAS CITY. Sept. 10.—CATTLE—Refectelys. 1,200 head, including 400 southerns; market steady; choice export and dressed beef steers, \$2,0066.00; fair to good, \$3.750 5.60; western fed steers, \$2,7500.50; stockers and feeders, \$2,5064.25; southern steers, \$2.50 673.75; southern cows, \$2,0063.00; native cows. \$1,5064.25; native helfers, \$2,5064.50; bulls, \$2,0063.50; caives, \$2,5066.00.
