THOMAS WRITES A LETTER

Attorney for Civic Federation Makes Reply to Dennison's Statement.

GIVES HIS OWN VERSION OF EXPLOSION

Answers Questions Put to Him and Returns Charge that He is Victim of Criminals Who Seek His Life.

OMAHA, Dec. 2.—To the Editor of The Bee: The newspapers of Omaha have printed a letter signed by Tom Dennison, written by his attorney, in which he asks me questions which insinuate and are intended to convey the idea to the unthinking that I placed the bomb which blew up my house. Every statement of fact and every question asked, of which I have knowledge, contains a falsehood insofar as these statements and questions refer to me or to the Civic Federation.

of Mr. Thomas against Chief Donahue were exploded? The dynamites and their accomplices can answer why the bomb was exploded at this time better than I. As to the second part of the question, the charges against the chief were not exploded. On the contrary, Chief Donahue expressly admitted them and they are still pending undecided before the board.

Some Explanations. 2. "How does it happen that the man who placed the bomb containing a high explosive did so with so much noise as to be heard by Mrs. Thomas and others when the windows and doors were shut?" The bedroom window fronting on this porch was open and the blinds were up at the time. The bomb was placed about one foot from the wall of the bedroom in which my wife and baby and myself were sleeping, and the dynamite made enough noise in doing so to arouse my wife's attention. She thought it was a young lady upstairs moving about her room.

believed to be a bomb, about the size of a salmon can, he did not kick it off the porch where it could not harm his wife and children? Was it because he feared it might burn his toes?" I did not believe it to be a bomb. I thought it was an incendiary fire, and had no thought it was a bomb. The object was apparently in paper wrapping, was cylindrical in shape, about six inches in diameter and less than three inch high. There was no fuse extending away from the object to give me a hint that it was a bomb. A blaze arose out of the center of this object and it looked like a burning chemical. My wife made the remark, "They are trying to burn us out."

intimate knowledge of his connection with the Pollock diamond robbery than any other man. The person or persons which the report that I am guilty has been circulated from the very instant of the crime indicates that this feature was thought out in advance and that these men thought they could divert suspicion from themselves because of the story that it would injure them.

had the sympathy of the good people of this community in my efforts at the enforcement of the law in my great measure. Everything the Civic Federation has attempted up to this point it has been successful in accomplishing, and I have at all times enjoyed the confidence of the executive committee. I had no motive for this crime, but there are men in Omaha whose business and whose liberties have been placed in jeopardy because of the work of the Civic Federation. Such men have a motive for this crime.

dogs, but the animals would have little chance in the city streets with their man's outcries. Also Ford did not leave any article of clothing or other effect by being struck with a stone that was accidentally swung from a wall by the huge derrick in use on the construction work. Molen had a narrow escape from death as it was only by chance he was not standing directly under the falling stone. While severe, his injuries are not declared serious by the attending surgeons. Moler was removed to his home at 2509 St. Mary's avenue in the police ambulance.
