NEW YORK STOCKS AND BONDS

Day's Feature is the Sudden Revival of Animation in Union Pacific. CLOSE IS IRREGULAR AND VERY ACTIVE

NEW YORK, Jan. 14.—The sudden revival of an animation in Union Pacific which stirred the late stock market yesterday was continued today. The market was characterized by a sharp decline in the price of the stock to 12 1/2. Northern Securities on the other hand was a new high record in company. There were floods of rumors of supposed plans for a new high record in company. The day a sharp decline occurred on falling prices of the Northern Securities company. The market was the up-circulated from uptown speculative quarters that Union Pacific was to be bought by the company. A strong sympathetic movement in Southern Pacific and St. Paul was also noted. The buying of United States Steel preferred and Amalgamated Copper also. Elsewhere in the list there was moderate activity and there was some pressure to realize on the advance. This was especially manifest after the appearance of the very strong bank statement. Not only was the large inflow of currency from the exterior, but the week's statement, but also that of last week, which failed to show in last week's statement, was a consequence of this week's statement showing a growth of over 100,000,000 in the last account, which was a surprise. The surplus over legal reserve requirements by \$2,850,000. This accumulation, consisting of cash, bonds, and other assets, is likely to enhance the value of the stock, which is now at a high level. The following were the quotations on the New York Stock exchange.
