### Looked More Like a Piece of Raw Beef Than a Human Being. Doctors Useless.

## CURED BY CUTICURA

### Blessed Relief After First Application and First Real Sleep in Weeks—Facts of This Wonderful Cure by Cuticura Vouched for by Mrs. Hunt's Neighbors.

"Words cannot describe the terrible Eczema I suffered with. It broke out on my head and kept spreading, until it covered my whole body. I was almost a solid mass of sores from head to foot. I looked more like a piece of raw beef than a human being. The pain and agony I endured seemed more than I could bear.

"Blood and pus oozed from the great sores on my scalp, and under my finger nails, and nearly all over my body. My ears were so crusted and swollen I was afraid they would break off. Every hair in my head fell out. I could not sit down, for my clothes would stick to the raw and bleeding flesh, making me cry out from the pain. "My family doctor did all he could, but I got worse and worse. My condition was awful. I did not think I could live, and wanted death to come and end my frightful sufferings.

"In this condition my mother-in-law begged me to try Cuticura Remedies. I said I would, but had no hope of recovery. But oh, what blessed relief I experienced after applying Cuticura Ointment. It cooled the bleeding and itching flesh and brought me the first real sleep I had in weeks. It was as grateful as ice to a burning tongue. I would bathe with warm water and Cuticura Soap, then apply the Ointment freely. I also took the Resolvent for the blood. In a short time the sores stopped running, the flesh began to heal, and I knew I was to get well again. Then the hair on my head began to grow, and in a short time I was completely cured. But I kept on taking the Cuticura Remedies, as they did me so much good I did not want to stop them.

"My cure was so wonderful I thought I would write you about it. I cannot praise Cuticura enough. I wish I could tell everybody who has Eczema to use Cuticura. My condition was so terrible that what cured me cannot fail to cure anybody of this awful disease. If any one doubts the truth of this letter, tell them to write to me.

### SODA IN STANFORD HOME

Police Find Two Bottles in Medicine Chest and Will Have Them Analyzed.

### MRS. STANFORD'S WILL IS PROBATED

She Leaves Three Million Dollars to Relatives and Makes Bequests to Servants and to Charitable Institutions.

SAN FRANCISCO, March 4.—The only new feature to the story connected with the mysterious death of Mrs. Jane Lathrop Stanford was the discovery by the police today of two tins of bicarbonate of soda, the medium through which the cause of death was administered. One of these tins was found in the Palo Alto home and the other in the San Francisco residence of the late Mrs. Stanford. The soda was immediately turned over to chemists to be analyzed.

The steamer Alameda, which sailed for Honolulu today, carried as passengers Dr. David S. Jordan, president of the Leland Stanford, Jr., university; Timothy Hopkins, a trustee of that institution; Detective Reynolds of the local police force and Captain Callaghan of a detective agency, the man who has in charge the investigation of the cases surrounding the first attempt to poison Mrs. Stanford in this city. The latter officer refused to state what, if any, special mission had been undertaken. Mrs. Stanford's former butler, E. Beverly, refused to make any statement, simply saying that he was not on trial by the newspapers.

The will of the late Jane Lathrop Stanford was filed with the county clerk of Santa Clara county, in the city of San Jose, today.

She bequeaths \$3,000,000 to her two brothers and children of a deceased brother, most of the money to be held in trust. Miss Bertha Bonner, her secretary, is given \$5,000 and five servants are given \$1,000 each. There are a number of gifts to charitable institutions in the east. To local charitable institutions Mrs. Stanford bequeaths the sum of \$38,000. All her plate and articles of art are bequeathed to the Stanford university museum. The residue of her estate is bequeathed to Stanford university.

**STANFORD UNIVERSITY, Cal., March 4.**—The handsome residence of Mrs. Stanford continues to be carefully guarded and no one is allowed to enter or leave the mansion. In it are two servants who are kept there like prisoners. They are Miss Nora Hopkins and Miss Helen Hopkins. Miss Hopkins has been housemaid at the campus residence for some time. Since the first alleged attempt to poison Mrs. Stanford was made she has refused to discuss the matter with any one.

The report that the strychnine found in the bicarbonate of soda which Mrs. Stanford took to Honolulu could have come from the Stanford stock farm seemed incredible. The foreman of the farm stated today that the last strychnine on the place was in September, 1904, and that the poisoned barley had been used to kill squirrels.

### HONOLULU, March 4.

High Sheriff Henry made a positive denial this afternoon of the story recalled here from San Francisco to the effect that strychnine had actually been found in the stomach of the late Mrs. Jane L. Stanford. He says that it is yet a matter of uncertainty. The chemists report that it is extremely unlikely they will be able to announce their findings before tomorrow evening.

### SALE OF "PARSIFAL" SEATS

Box Office to Be Removed to Store of Piano Player Company on Harnsey Street.

The sale of seats for the appearance here in "Parsifal" and "Lucia" of the Metropolitan Opera company of New York City will be removed tomorrow from the Excelsior office, where it has been conducted, to the store of the Piano Player company, 130 Harnsey street, near the Regille building. The sale of seats will continue here from day to day until the date of the opera. All those who have had seats reserved are asked to take them up now as soon as possible, as the demand is growing very heavy on the box office and it must be known exactly what seats are unsold. The demand for seats from out-of-town is steadily growing and the liveliest interest is manifested in both attractions; about as many bookings are made for "Lucia" as for "Parsifal," and inquiries are coming in from points as remote as North Loup, Pierce, Hastings, Red Cloud, Nebraska City, Norfolk and all over western Iowa.

The work of preparing the Auditorium for grand opera has already begun. Stage carpenters next week will be working on transforming the stage, extending it forward to the line at the proscenium arch, which is to be filled in with proper material and the curtain hung. This curtain is a great find on the part of the Auditorium directors, having originally cost the Metropolitan opera house something like \$4,000 and being purchased by the Auditorium company for that many hundred dollars. It is of the heaviest material, terra cotta in color and embroidered in gold. A complete electrical equipment will also be added to the Auditorium stage and dressing rooms upstairs for the stars, and below the stage for the chorus. Miniature working models of the drums necessary for the panoramic fixtures have been sent out by Mr. Castell Bert, scenic director of the Metropolitan opera house, from which the local stage carpenters will construct the required fittings. The main body of the house will also be decorated in colors to harmonize with the big curtain, and attention will be paid to the boxes also, which will be draped and carpeted and supplied with comfortable chairs. Extra stage hands, scene shifters, property men, calcium light men and electric light experts have been engaged in the city to the number of seventy-five or 100 and extra ushers and door men will be put in in anticipation of the very large attendance.

Mr. Schlotterbeck, the general manager of the transcontinental tour, passed through Omaha again this week, having gone as far as Los Angeles, and reports that the greatest sale ever known has been had for the engagement in the big cities of the Conrelid company.

**Abbott-Cowan Co. Moves.**

The Abbott-Cowan company, who have been located in the First National Bank building, have taken quarters on the second floor of the new Neville building. They have just moved into their new quarters. The party necessary on account of their increasing business, and also for the purpose of getting offices that were more accessible to the public.

This firm has been one of the most progressive in the city and they have rapidly grown from a small estate firm in Omaha to the largest real estate firm in Omaha. As an evidence of the volume of business done by them, their March 1 settlements on properties that they had sold throughout the state, amounted to over \$30,000.
