GOVERNMENT NOTICES.

PROPOSALS FOR INDIAN SUPPLIES,—
Department of the Interior, Office of Indian Affairs, Washington, D. C., March IS, 1966. Sealed preposals; indorsed "Proposals for blankets, woolen and cotton goods, clothing, etc.," as the case may be, and directed to the Commissioner of Indian Affairs, Nos. 119-121. Wooster street, New York City, will be received until 1 o'clock p. m., of Tuesday, May 16, 1966, for furnishing for the Indian service blankets, woolen and cotton goods, clothing, notions, hats and caps. Bids must be made out on government blanks. Schedules giving all necessary information for bidders will be furnished on application to the Indian warehouses, IIS-121 Wooster street, New York City; 285-267 South Canal street, Chicago, III.; 815 Howard street, Omaha, Neb.; 802 Washington street, Ean Francisco, Cal.; the Commissaries of Subsistence, U. S. A. at Cheyenne, Wyo., and St. Paul, Minn. the Quartermaster, U. S. A., Beattle, Wash., and the postmasters at Sloux City, Tueson, Portland, Spokane and Tacoma. Bids will be opened at the hour and days above stated, and bidders are invited to be present at the opening. The department reserves the right to determine the point of delivery and to reject any and all bids, or any part of any bid. F. E. LEUPP, Commissioner.

PROPOSALS FOR MULES AND CAV-PROPOSALS FOR INDIAN SUPPLIES.

PROPOSALS FOR MULES AND CAV-PROPOSALS FOR MULES AND CAVALRY and artillery horses, Depot Quartermyster's Office, Omaha, Nebraska, April
25, 1986. Sealed proposals, in triplicate, will
be received here until 12 o'clock noon May
25, 1996, and then opened, for furnishing 26s
mules and 225 cavalry and artillery horses.
U. S. reserves the right to reject any or all
bids, or parts thereof. Information and
specifications furnished on application. Envelopes containing bids to be marked
"Proposals for Mules and Cavalry and Artillery Horses" and addressed to Captain
Thos. Swebe, Quartermaster.

Branch Mint Company's Stamp Mill is Nearing Completion.

GOLDSTAKE'S ELECTRIC DRILLS SUCCEED Stockholders of Lucky Baldwin Com-

pany from Denver Hold Meeting and Discuss Future Management of Concern.

It is now stated that the 120-stamp mill of the Branch Mint company will be in operation by September 1 at the very latest and that in the mines a large force of men will be employed. This company's ground is located in the Bare Butte district, at and near the town of Galena, and had been perated several years ago under a different management, but poor methods and a desire to sell quickly and put little money into the ground killed the proposition at that time. The Branch Mint company, however, is a new concern, and while t includes within its holdings much of the ground covered by the old Union Hill conern, it has added to it and is the possessor of about 1,000 acres of good mining ground. The mill is being creeted in the town of Galena and has progressed so far that the power plant has been set up, part of the stamps are in position and the rest are expected to arrive within a few days. Attached to the stamp mill will be a complete cyanide plant for the retreatment about completed. Mining will be done from be drawn as wanted into cars for trans- workings showing up well. portation to the mill, the company having built and equipped three miles of narrow gauge road just for this purpose. Since Hardin, the general manager, and it is his opinion that the mine, even at the present time, has been opened up sufficiently to supply the mill and by the time it is in the Wasp 2, vast quantities ready to run will be in splendid condi-

Trial Run of Electric Drills. During the latter part of the week a trial run was made by the Goldstake company with the electric drills whick it has lately installed, and from all accounts they give the best satisfaction, and by their use the work of drifting which has been started in the long tunnel which the company is driving has been greatly facilitated. The power plant consists of a ten-horse power special electric gasoline engine, connected with which is a generator capable of running four drills, all of which is located at the portal to the tunnel in a neat frame lding. From the portal of the tunnel to face of the working it is a distance 500 feet, and while running that distance well defined veins of ore have been both showing good values. Developat work will continue for several months the verticals and in the quartzite ore oots, and by that time it is believed that ficient ore will have been blocked out warrant the erection of a stamp mill or ne other form of treatment plant. Owto the topography of the country the

Lucky Baldwin Company Meets. P. Wilson of Denver, accompanied by ldwin Gold Mining company, was in ad, the headquarters of the company, of extensive operations. week for the purpose of attending cknolders' meeting, at which plans were scussed for the future management of concern. This company owns a large reage of land in the vicinity of Hill City, which it has had a force of men workg for some time, developing a strong rtical of ore, carrying free gold and acentrating values. Work on these verticals will be continued and the company also proposes to work the surface ground on a part of its claims for the placer gold which it contains, and will shortly construct a dam to impound the waters of Sunday guich and use it to sluice the gravel and surface dirt, all of which carry good values, it not being a difficult matter

to pan out good wages on many parts of the ground. Preparations for the installation of an mportant addition to the milling plant on the Extreme Mining company's ground two miles northeast of Custer City continue and the management hopes to have it in operation before the summer is over. This will consist of a cyanide plant for the retreatment of the tailings and include a power hoist and air compressor, drill and improved machinery. Besides this, it is the intention to connect the milling plant with the mine with a tramway for the better and quicker handling of the ore. Reports from a test run on 1,900 tons of ore taken from the mine show that it gave returns of \$5,000 net and it is estimated that much of the values in the ore were lost which would have been saved had a cyanide plant been operated in connection with the mill.

Victoria is Prospering.

A switch is being built to the milling plant of the Victoria Mining company on Spearfish river at the mouth of Squaw creek and it is expected that it will be ready for the delivery of heavy machinery, building material and other supplies within a few days. At the last meeting of the directors of this company its affairs were placed in the hands of a managing director, who has been made responsible to the stockholders of the company, and as his authority has been made absolute all contracts are referred to him for approval. William M. Glass of Omaha holds this position, and under his direction the affairs of the Victoria have prospered. Preliminary work on the big 240-ton mill has already made a good'start, and the walls of the building will soon be raising. Development work continues upon the splendid ore bodies which have been opened up on this property, and they are looking better than ever. This particular section of the Ragged Top district had been long neglected until the Victoria entered it, but the developments made by the company have been such that it has prospected a great deal of the surrounding ground and many owners of properties have done great deal of work, and on most of the good ore has been found, in fact, it has been responsible for disclosing in the district more siliciore than in any of the districts of the northern hills. Besides the work which is being done by the Victoria there is a great deal-going on and all of it is of a most promising character.

One of the new tanks is in use in th Imperial company's mill in Deadwood, and it is expected that within a day or so the others will be. When all of the tanks are employed the company's mill will have an output of 4,500 tons monthly. This mill is doing some of the finest work of any of the plants in the Hills, and its extraction is increasing right along, the last gold bars which resulted from its semi-monthly cleanup being much finer

running on higher grade ore than usual

bood of \$15,000.

Experiments which have been under way company's mines have proven very satis-

DEADWOOD, S. D., April 30,-(Special.)-

Superintendent Allen of the Lucky Strike Mining company says that it is the intention of that corporation to build a large stamp mill on its property on Elk Creek the coming summer. At present there is no work doing at the mines, and will not be until the weather settles and of the tailings, the building for which is the roads dry up, for as they are, it is impossible to haul supplies over them. the Hoodon shaft, at which point there has been placed five Gates crushers, and the soen as the roads get good again, and ore will be dumped into the crushers as it the development of the property proceeded is hoisted and from there into storage with. It is at present in good condition, bins of large capacity, from which it will and the various ore bodies exposed in the

There has been some talk lately of building a cyanide plant on the Richmond-Sitting Bull property in the Galena disthe Branch Mint has taken this property trict, and C. B. Harris, who had the a great deal of development work has been superintendency of the property for a numdone upon it under the direction of James ber of years, has gone to New York City to confer with Henry Earle, the owner. When the property was gutted of its rich smelting ores years ago there was, as medium grade ores left standing, and it is this material it is now proposed to run through the cyanide process. It is asserted that should a mill be built on the ground it will be a large one, and one that will have capacity sufficient to handle a great deal of custom ores besides the material taken from the company's ground. On last Saturday final payment was made by the Reliance company on the Johnquist property in the Ragged Top district, and the deeds, which have been in escrow in the American National bank of

Deadwood, have been taken out and warranty deeds conveying the property to the Reliance company filed with the county register of deeds. This ground contains sixty acres, and includes the site for the proposed cyanide plant which the company will erect this summer. With this payment the company has secured title to all the ground upon which it has held options that has developed any considerable quantities of ore. It holds a number of options on some adjoining ground upon which fair prospects have been obtained, but on which continuous ore bodies have not been found. It is said that the company is in a good financial condition, and

cure possession of the property. It is further said that if this end is attained number of people interested in the Lucky that the company's properties in the vicinity of Hill City will again be the scene

> CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing

Prices on Board of Trade.

CHICAGO, April 29.—Brilliant weather wilted prices in the wheat market here today. Other enervaling influences were large primary receipts and lower cables. At the close May wheat was off 1½c. July is down 1½67½c. Corn shows a loss of ½6%c. Oats are down ½6½c. Provissions are 2½c lower to 10c higher.

Weakness was in evidence in the wheat market at the outset. Initial quotations on May were off ½c to 2½c, at 85½c to 83c. July was down ½c to 2½c, at 85½c to 83c. July was down ½c to 1½c, at 85½c to 83c. July was down ½c to 1½c, at 85½c to 83c. Continuation of weather conditions excellent; growth of fall-sown wheat was the chief reason for the sharp declines. Another bearish factor was unexpected weakness at Liverpool, notwithstanding the strength exhibited here yesterday. Liberal movement in the northwest was a further depressing influence, receipts today at Minneapolis and Duluth being 132 cars, compared with 90 cars a year ago. The market failed to rally from the opening break. As trading advanced distant deliveries became weaker. July decilining to 81½681½c. May held within the opening range. The market closed weak, with May at 87½c. Final quotations on July were at 32c. Clearances of wheat and flour were equal to 56,600 bu. Primary receipts were 273,000 bu., compared wit. 165,100 bu, a year ago. Minneapolis, D.: 10th and Chicago reported receipts of 205 cars, against 365 cars last week and 106 cars a year ago.

Lower cables and weakness of wheat started active selling of corn by prominent pit traders. The result was a weak market the entire session. The market lacked any outside support. Demand coming mostly from shorts. July opened 4,60½c to 45½c and closed at the lowest point. Local receipts were 62 cars, with one of contract grade.

The outs market was affected by weakness of wheat and corn. Commission houses and the pit traders were the principal sellers. Cash houses were fair buyers of May. July opened a shade to 4,60½c lower at 25½c. Local receipts were 60 cars.

The leading f Prices on Board of Trade.

for some time on the ore from the Globe Quotations of the Day on Various Both Beef Steers and Cows Thirty to Forty company's mines have proven very satisfactory, it is said, to the management, which has concluded to hasten the work of building a plant. Chillean mills will be installed, this method of crushing the ore from that property proving to be the best of the many that had been experimented with. Between 3,000 and 4,000 feet of tunnel has been done on the property, and the ore bodies have been sufficiently de-Commodities.

nel has been done on the property, and the ore bodies have been sufficiently developed, it is said, to keep the plant which will be built running at full capacity for a long time, and to insure a steady supply of ore.

Harris Franklin, general manager of the Golden Reward Mining company, has returned from a protracted visit in the east. It is stated that Mr. Franklin will shortly resign his position as general manager of the company, his health being such that he will be unable to give it the attention which its importance warrants. It was to Mr. Franklin's individual efforts and good management that the Golden Reward company has attained the position it has a mong the mining companies of the Black Hills, being, next to the Homestake, the largest producer of gold in the state of South Dakota.

The disposition of the day's receipts was as follows, each buyer purchasing the number of head indicated: Cattle. Hogs. Sheep.

Total 8 5,835

CATTLE-There were no fresh receipts of cattle here today with which to make a test of the market. For the week receipts show a loss of about 2,000 head as com-pared with last week and a loss of about week of last year. Supplies at other points have also been light, so that the decrease as compared with last week at six of the leading markets amounts to about 25,000 head. This, of course, makes quite a difference in the amount of dressed meat available to meet the requirements of the trade.

trade.

In spite of that fact the fat cattle market this week has been the most unsatisfactory from the sellers' standpoint of any that has been experienced in some little time. Packers claim that the dressed meat trade from the sellers standpoint of any that has been experienced in some little time. Packers claim that the dressed meat trade in the east is in bad shape and consequently they have been very bearish and have broke the market on beef steers about 30 to 40 cents at all points. This decline is not confined to the commoner grades, as the good to choice cattle have suffered about as much as the common cattle. The condition of the market next week, operators say, depends almost entirely upon the size of the receipts, as they think the dressed beef market needs a little breathing spell. Good to choice beef steers are quotable from \$5.75 to \$6.16, fair to good \$5.00g5.75 and common to fair \$4.00g5.00.

The market on cows and helfers has suffered the same as the trade on steers. The decline on the bulk of the cattle, including the better grades, is around 30 to 40 cents. A few cows are beginning to arrive that show signs of grass, and the loss on that class is a trifle more than on the others. It has been a slow, mean market all the week. Good to choice grades are quotable from \$4.35g5.00; fair to good, \$3.60g4.25; common to fair, \$2.36g3.50. Good veal calves have held about steady, best grades selling up to \$5.00. The common kinds, though, are a little lower.

The supply of steckers and feeders was rather limited last week, and as there was rather limited last week and the common to fair grades go mostly from \$3.00 to \$3.75.

Hogs.—The common to fair grades go mostly from \$3.00 to \$3.75.

Hogs.—The was about a norm

go mostly from \$3.00 to \$3.75.

HOGS—There was about a normal run of hogs here this morning and the market showed very little change from yesterday. At the opening prices were just about steady with yesterday's best time and trade was active, the ruling prices being \$5.10 and \$5.124. Most of the hogs changed hands on that basis at an early hour, but, the same as was the case yesterday, buyers beared the market on the extreme close and tried to buy the last hogs under \$5.10. Salesmen held on for the morning prices, so that it was rather late before a complete clearance was made. The bulk of the hogs could be placed at \$6.0% to \$5.124, with the choicest loads selling up to \$5.124, with the choicest loads selling up to \$5.124, with the same week of last year here is a decrease of about 2,000 head, but as compared with the same week of last year there is a decrease of about 2,000 head. Packers have been bearish all the week at all of the markets and have succeeded in breaking the market a little over 20 cents. This decline carries the market to the market is about 44 cents higher. Representative sales:

tative sales:

Av. Sh. Pr.

through, so that not much of a test of the market was made. As a matter of fact, however, buyers did not seem to be very anxious for supplies. anxious for aupplies.

For the week receipts show a loss as compared with last week of about 6,000 head, but as compared with the same week of last year there is an increase of about 16,000 head. The mutton market in the east has been in bad shape this week and Chicago reports a big drop in prices for fat cago reports a big drop in prices for fat stuff. At this point, however, the supply of sheep has been rather limited and with a fair demand desirable grades have held about steady. Common and part fat kinds, though, have been slow safe and a trifle

though, have been slow sale and a trifle lower.

The bulk of the receipts all the week consisted of lambs and as a result packers have been able to break the market Just about 25 con both the good and medium grades. At most of the other markets the decline is considerably more than that, so that prices here are well in line with those being paid at other markets.
