All Spring Lines Going Into Consumption at Satisfactory Rate.

MARKETS IN GOOD HEALTHY CONDITION

Owing to Bright Prospects for Good Crops Jobbers Expect to Sell More Goods for Fall Delivery Than Ever Before.

The distribution of spring and summer lines in Omaha and surrounding territory was very satisfactory last week. Retailers in both the smaller and larger towns engloyed a liberal patronage, particularly for medium weight dry goods and for all such lines as groceries, hardware, furniture, farm implements and in fact for nearly all staple and seasonable lines. Very few complaints regarding the condition of trade were heard from any quarter. Prospects for good crops were never better at this season of the year and that seems to have given both merchants and farmers confidence in the future to such an extent that they are willing to spend their money, the former for more goods to tempt their customers and the latter for such articles as they need or want.

With wholesalers immediate business in most lines is rather limited, the same as usual at this time of the year, as this is one of the between season periods. As compared with a year ago, however, they find no cause for complaint. Those who have their traveling salesmen out with fall samples report better success than a year ago which is a good indication that merchants have considerable confidence in future business. Unless something happens to change the situation materially in the next lew weeks the impression is that local jobbers will land more advance orders for fall delivery than ever before.

The markets on nearly all lines are in good, healthy condition, prices being well maintained all along the line. As compared with a week ago there have been very few changes.

Coffee Steadily Advancing.

Wholesale grocers report the demand for

Coffee Steadily Advancing.

Coffee Steadily Advancing.

Coffee Steadily Advancing.

Wholesale grocers report the demand for their line of goods as being fully up to expectations. The market is also in good shape, prices on nearly all lines being firmly held. In the case of coffee the market has been steadily advancing. The option market has advanced \(\frac{1}{2}\) \(\frac{1}{2}\) \(\frac{1}{2}\) cas compared with prices ruling a week or ten days ago. Receipts have been falling off and there was a decrease in the world's visible supply for April amounting to over \$20.000 bags. Not only that, but the present cost of importing from Brazil is fully \(\frac{1}{2}\) cas contested to some other work parity, taking cost of transportation into consideration. From these facts it is readily seen that present indications are favorable for still higher prices. All brands of package coffees were advanced \(\frac{1}{2}\) cell cell yin the week.

The market on refined sugar is in practically the same situation it was a week ago. Raws, however, advanced 1-16c early in the week, but the European market is now a trifle weaker. The demand for refined grades is improving and particularly is that the case farther south where the season is considerably earlier. Jobbers say it is difficult to tell at this time what the market will do. There is nothing at this time, however, to indicate higher prices in the immediate future, but the demand will probably show quite an increase within the next two or three weeks in this section of the country, at which time an advance may take place.

The cheese market is a trifle higher than it was a week ago, both Twins and Young Americas having been marked up. The reason for this, as given by the factory men, is that the demand exceeds the supply, it will probably be two or three weeks before all the factories are in operation and until some surplus stock is accumulated a reduction in prices is hardly to be expected.

There have been no important changes in the canned goods market during the week und Coffee Steadily Advancing.

to be affected to some extent.

Dried fruit shippers who are of a speculative turn of mind are not only offering apricots for future delivery, but peaches as well. The quotations named on apricots are found to be nearly Mc lower than those quoted a week ago, and there is no certainty that the bottom has yet been reached. All reports indicate that the apricot crop will be a large one and some say very large. Prices on peaches are about the same as those at the opening of the season a year ago. Reports regarding the peach crop are somewhat conflicting. Some state that the crop will be larger than last season at the roop will be larger than last season; others that it will only be two-thirds of last year's output. From the most reliable sources, however, it is learned that the crop will be slightly larger than it was last season and that the increase will come mostly in sections where canners do not operate the heaviest. From this it is reasonable to suppose that the increase in the output will appear largely in the evaporated state.

The prune situation is not so encouraging. Reports indicate that the crop will not exceed 50 per cout of last year in California.

The prune situation is not so encouraging. Reports indicate that the crop will not exceed 60 per cent of last year in California. In Oregon and Washington the Italian varieties will make about 25 per cent of last year and the French 80 per cent. These reports, which jobbers consider authentic, indicate that much higher prices will rule on prunes for fall delivery.

The present movement of dried fruit is quite satisfactory for the time of year, but it is of rather a hand-to-mouth character, owing to the high prices ruling on peaches and apricots.

Fancy groceries, such as olives, imported

Fancy groceries, such as olives, imported sardines and that class of goods, are selling freely, but no change in prices has taken place.

Dry Goods Fairly Active.

Dry Goods Fairly Active.

Local dry goods jobbers report the demand for their line of goods as being as good as could be expected at this time of year. Immediate business is of course limited owing to the fact that stocks in the country have not been sufficiently broken to necessitate any great amount of filling in orders. Future business for fall delivery, however, is coming in very freely and so far traveling men have met with much better success than they did a year ago.

According to reports received from the country retailers have been doing a very fair business in medium weight goods. Strictly summer lines are still in limited demand, but every warm day quite a call is noted for them. Merchants are very confident that a little later in the season there will be a rush for lightweight goods such as is seldom seen. That is doubtless the reason why the majority of merchants have been keeping their stocks of that class of goods so complete.

There have been no new developments in the dry goods market. Prices on practically all lines seem to be good and firm, with prospects of their remaining that way for some time to come.

No Change in Hardware.

No Change in Hardware.

There has been no change in the hardware market during the week under review worthy of mention. Prices are firm all along the line and as far as can be told at the present time there is nothing to indicate anything but a firm market for many months to come.

The local demand is still very heavy for all seasonable and staple lines. An immense amount of building is being done all over the country and it looks now as shough that would be the case throughout the season, which, of course, means that the demand for builders' hardware and all that class of material will be exceptionally

demand for builders' hardware and all that class of material will be exceptionally heavy. All seasonable goods are moving out very freely, the same as they have all the season, and jobbers say that the volume of their business is running far ahead of last year or of any former year. Jobbers of farm implements have also been doing a good business on all seasonable goods. The buggy trade has been particularly good, which shows that people must have money to spend or they would not be buying so many buggles, runsbouts and other vehicles.

Leather Goods a Little Quiet. Leather Goods a Little Quiet. The demand for shoes is not as brisk as it might be owing to the fact that not much good shoe weather has been experienced so far this spring. It takes warm weather to make a brisk demand for shoes, but retailers say that as soon as the weather does come off warm everybody will want new shoes, with the result that lost time will be made up in a very short time. As a result merchants are not doing any complaining, nor are they getting nervous.

any complianing, nor are they getting nervous.

Immediate business with wholesalers is necessarily quiet, the same as usual at this time. Traveling men are doing fairly well in their campaign for future business, but they expect to do atili better as soon as the retail trade shows signs of improvement.

Movements of Merchandise.

WEATHER IN THE GRAIN BELT

Temperatures Generally Higher-Temperatures are generally higher in all sections this morning except in the lake region and over Oklahoma, western Texas and New Mexico, where the weather is cooler. Killing frosts were general in the Dakotas, along the eastern slope of the Rocky mountains and the southwest. Showers were general in the central valleys during the night and rains continue this morning from the Missouri river east over the central valleys to the lakes, being very heavy in the lower Ohio and middle Mississippi valleys.

Omaha record of temperature and predipitation compared with the corresponding day of the past three years:

1906, 1904, 1903, 1902.

Minimum temperature ... 45 55 50 51 Showers and Frost.

GRAIN AND PRODUCE MARKET

Traders Look for Scalping in Wheat for a Few Days.

WEATHER CAUSES CONDITION

Relative Position of May and July Wheat Change a Little, Former Advancing and Latter Falling.

OMAHA, May 6, 1905. Traders look for a scalping wheat mar-tet for a few days, at least as long as weather reports continue favorable and he bulls hold their own as well as at pres-

weather reports continue favorable and the bulls hold their own as well as at present. Although showers and cool weather are predicted for almost the whole wheat area over Sunday, just what the growing crop needs, any tendency to a decline which might obtain is offset by the strength of the bulls.

The relative position of May and July wheat changed a little, the former advancing slightly, to 224c, the highest point it has held for some time, while the latter fell off to 87%c. The general opinion is that as long as prospects hold out for a crop of 750,090,000 bushels July around 85c is rather high, especially since there is still a considerable amount of the old crop on hand.

Corn was steady and finished 4c to 4c higher. May stood at 48%c and July at 47c. Statistics tavor the bulls, and the bears are uneasy on account of the report that the bull interests in Chicago have bought for May more corn than there is in all the elevators, while at the same time stocks are being reduced by shipments. The advance in oats is steady and the market firmly maintained. May closed at 30%c and July at 29%. In the last few days, since the price began to approach the export basis, there has been a large movement eastward.

Cables were a triffe weaker on wheat.

days, since the price began to approach the export basis, there has been a large movement eastward.

Cables were a triffe weaker on wheat, Liverpool closing \(\frac{1}{2} \) cover. May corn was unchanged in the European markets. July a little off. Broomhali estimates the world's shipments of wheat for this week at \(\frac{1}{2} \) showers as which is but little higher than the last week. The Australian shipments this week are \(48,000 \) bushels. A Duluth message says that the trade is having inquirtes for wheat from Minneapolls, but Thompson owns it all and will not sell. Van Dusen-Harrington have been large buyers of July wheat for three days. They are said to be covering shorts for Valentine.

A large reduction in corn stocks at Chicago is predicted for the next week. Valentine has sold 100,000 bushels of July corn at \(470 \) and is offering 258,000 bushels more at the same figures. There was a good demand yesterday at Chicago for corn for export and eastern shipment, with sales of 275,000 bushels. Bids at Louisville and points on the Big Four are equivalent to about 50c in Chicago. Kansas reports that in many sections planting has been delayed by low temperatures.

In the last week May oats have gone from a discount of \(\frac{1}{2} \) to a premium of it over July. This is attributed to an increased demand for oats for shipment, seaboard dealers buying up large quantities in anticipation of a better export demand. Hedges are covering their short May oats at Chicago as fast as cash sales are closed east.

The sales at Chicago yesterday were

east.
The sales at Chicago yesterday were 275,000 bushels white clipped and standard and in the northwest 400,000 bushels were sold for export and shipment.

KANSAS OIL

MUST WIN OUT BECAUSE IT RANKS WITH PENNSYLVANIA OIL

AND THE PENNSYLVANIA FIELD IS GIVING OUT

 $\mathbf{W} \mathbf{H} \mathbf{Y}$

Did the Standard Oil Company build its Mammoth Refinery and its great Pipe Line for the Kansas field?

Because Kansas Holds. The Gream of the World's Oil The superior quality of Kansas Oil is bound to work its way to markets, and if any oil sells it will be Kansas Oil. No power on earth can stop it. Like Niagara, it will break any human dam set up against it. It holds the Trump Card in the game—Nature's own monopoly—QUALITY.

The Constant Oil Co. plant at Chanute, Kan., consists of five producing wells and full equipment for pumping twenty wells.

The last well came in February 21 and is estimated to run 20 to 25

The oil has since been tested, grading above 32 degrees, which guarantees for it the top market prices. The plant is now pumping, and will soon have a steady market for all it can produce.

Constant Oil Co. was incorporated last fall and holds leases covering about 800 acres in the Chanute, Kan., Oll field, sufficient for more than

This is a home Company. The officers of the Company are: J. M. Hendrie, President; M. I. Moakler, Vice President; E. C. Wolcott, Secretary, and Frank Rosewater, Treasurer. Mr. Hendrie, the president of the Company, has for more than twenty years been identified with the oil business, and the remaining officers are all residents of Omaha of

known character and ability.

A limited amount of stock is still offered at 10c per share, and every one desiring a profitable investment will do well to buy AT ONCE, as this figure will very soon be advanced.

Order stock at once if you wish to secure it, or write for further particulars

GOLDFIELD CHIEF MINING CO.

Treasury stock is being offered by the Commercial Bank at 10c per share. \$10.00 BUYS 100 SHARES, PAR VALUE \$100.00. \$50.00 BUYS 500 SHARES, PAR VALUE \$500.00. \$100.00 BUYS 1,000 SHARES, PAR VALUE \$1,000.00. These mines are located in the famous Goldfield District in the same locality of other mines that have jumped from as low as 10c per share

to a profit for their owners of from 100 to 500 per cent, and some of them have made much more in less than one year.

GOLDFIELD CHIEF should advance rapidly and investors should make money by buying early on the ground floor.

Goldfield beats the world in the production of gold. Over \$6,000,000 have already been taken from the Goldfield Country and over \$100,000,000 is now blocked out and in sight in one mine alone, in the Tonopah north of Goldfield. It is not unusual for investors to make from 100 to 500 per cent on

money invested. Millions are yet to be taken and only await development, Seven mills and railroads are rapidly nearing completion. A little money invested now on the Ground Floor before the mills and railroads are completed will be well spent and may make 100 for 1.

Correspondence solicited relative to listed or unlisted stock on Goldfield, Tonopah, Bullfrog or Rhyolite properties. Address,

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, May 6,-The Kentucky crop re

Duluth and Chicago reported receipts of 161 cars, against 206 cars last week and 125 cars a year ago.

Small receipts were again the dominating influence in the corn pit, the market showing considerable firmness, notwithstanding the weakness of wheat. Trading was extremely dull, shorts being the principal buyers. Delay to planting on account of the wet weather was a bullish factor. July opened a shade to 46 higher at 4724746. Local receipts were 70 cars, with 4 of contract grade.

In sympathy with corn, the oats market had a firm undertone. Business was very quiet. July opened a shade higher at 2946, sold between 2962346 and 2946 and closed at the highest point. Local receipts were 79 cars.

Provisions were easter as a result of lower prices for live hogs. An increase in stocks of lard also had a depressing effect. At the close July pork was off 246 at \$12.20. Lard was also down 246 at \$7.234. Ribs were a shade lower at \$7.235. Estimated receipts for Monday. Wheat, 10 cars; corn, 58 cars; oats, 84 cars; hogs, 28,000 head.

The leading futures ranged as follows:
