

GRAIN AND PRODUCE MARKET

Little Change in the Wheat Market

—Traders Waiting.

CORN MARKET IS NOW STEADY

Wheat Has a Better Tone After the Opening, Which Was a Shade Lower Because of the Soft Cables.

OMAHA, June 8, 1910.

There was very little change in the wheat market, early traders being inclined to wait for the government figures to be issued at noon. Values opened a shade lower, firming up again toward mid-session and an advance is predicted from these levels.

The corn market was steady, but rather a dull affair. Soft cables supported the market, but prices were only a trifle higher for the day.

Wheat had a better tone after the opening, which was a shade lower, caused by soft cables. Damage reports are not numerous and are inclined to favor a higher market until more definite harvest returns are made.

Corn held firm and showed good tone, advancing at the close, showing some gain for the day. Cash offerings were very moderate and were well taken at 3c over yesterday.

Primary wheat receipts were 34,000 bushels and shipments of 12,000 bushels, against receipts last year of 122,000 bushels and shipments of 124,000 bushels.

Clearances were 1,170,000 bushels, against receipts last year of 714,000 bushels and shipments of 780,000 bushels.

Clearances were 21,000 bushels of corn, none of oats and wheat and flour equal to 34,000 bushels.

Liverpool closed 1/2c lower on wheat and 1/2c lower on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June 8.—Active spreading between July and September options received more attention than in the morning, while buying the earlier was the favorite form of speculation. Leading in the movement was the wheat market, which was higher, but the close was with July 5¢ to 6¢ higher and the other months a shade up to 1¢.

Corn finished at an advance of 1/2¢ to 3/4¢ and oats showed a similar advance. The wheat market was a shade up to 1¢. Final figures in provisions were 10¢ to 15¢ above last night's level.

As the government crop report was not due until after the end of the session, a disposition to indulge in speculation was not unusual. Operators in wheat were generally inclined to the idea of a moderately bullish outlook for the near future. This expectation was a factor in buying a reaction from an early break due to a sharp break in the wheat market.

Profit taking on the part of dealers who had bought during the first hours led to a sharp break in the wheat market, which was partly overcome by transactions before the expiration of the last fifteen minutes. It was a reaction from the wheat market, which was a factor in buying a reaction from an early break due to a sharp break in the wheat market.

General buying of corn was induced by large shipments of 100,000 bushels at the opening. September advanced to 50¢ and finished steady, 1/2¢ up to 50¢. The cash market was 1/2¢ to 3/4¢ above last night's level.

The range of futures was as follows:

Sept.	35 1/2	36 1/2	35 1/2	35 1/2	36 1/2	36 1/2
