## WHEAT RISES THREE CENTS

Advance Due to Alarming Reports from Spring Wheat Belt.

## RUMORS OF DAMAGE OVERDRAWN

Dispatches from Principal Cities in the Dakotas Indicate that Effect of Drouth Has Been Overestimated.

CHICAGO, June 20.—Private reports of weather conditions as affecting the spring wheat of the two Dakotas and Minnesota hinted at sensational developments today. A report by one of the best known experts said that the crop has dropped 15 per cent in North Dakota during the last week.

Should another week elapse without general rains in that section it is said the damage would be so severe as to verge on the sensational. The official weather forecast today promised "cloudy" or local showers in the spring wheat country, but it is said that the materialization of this prediction could do little to help the crop. Soaking rains are a crying necessity. The temperature at Fargo at 10 a. m. was 35 degrees.

On the Board of Trade today wheat for delivery in September opened actively higher, selling early at 92 1/2 cents, as compared with Saturday's close of 91 1/2 to 92 1/2 cents.

At the close September lacked but a shade of being 3 cents over Saturday's close. This showed a net gain of 2 1/2 cents.

MINNEAPOLIS, June 20.—Wheat went up 3 cents in three minutes when the Minneapolis market opened today, due to the fact of high temperatures and no rain. December wheat had closed Saturday at 92 1/2 cents; today it sold quickly at 95 1/2 cents. September wheat that closed Saturday at 94 cents went up to 96 1/2 cents.

Damage Reports Exaggerated

PIERRE, S. D., June 20.—Drilled wheat and corn, which got a start before the hot weather are reported to be all right yet. Late planted corn is coming up raggedly and broadcast wheat has been hard hit. Local showers have helped certain localities, but the central part of the state must have a soaking soon to prevent heavy crop damage.

YANKTON, S. D., June 20.—No damage has been done to crops in this section. Recent rain was of great benefit. Wheat, oats and corn are all doing fine.

STOUX FALLS, S. D., June 20.—Thus far no serious damage to crops has resulted from the excessive heat, but rain is badly needed and should it not come within a few days damage will result.

WATERTOWN, S. D., June 20.—Crops in this section promise better than at any other time since seeding. Corn is looking fine and there has been plenty of moisture.

SIoux CITY, Ia., June 20.—Wheat in this section is in need of rain, but grain men say the situation is improving. Corn, which had been retarded by the cold weather, is now making good progress.

NORFOLK, Neb., June 20.—Corn is growing splendidly in northeastern Nebraska, and while rain is needed for wheat, no serious damage is reported.

Annual Crop Scare.

ST. PAUL, Minn., June 20.—The annual crop scare has arrived about a month earlier this year owing to an unusual hot and dry spell in Minnesota and North and South Dakota. While the conditions are not desperate, unless a soaking rain comes soon, wheat, barley and flax will suffer. Reports received here:

Winona, Minn.—Barley crop will suffer a loss of 25 per cent and others in proportion.

Redwood, Minn.—Crops looking well, particularly corn.

Aberdeen, S. D.—Conditions discouraging. Oats and barley are heading out well. Wheat and corn land in good condition, but some grain land is poor.

Whitman, N. D.—Heavy rain during the last week; conditions good.

Bismarck, N. D.—Crop conditions poor, but not a failure.

Grand Forks, N. D.—Showers in various sections helped some, but soaking rains badly needed.

MASON CITY, Ia., June 20.—(Special.)—The people of Mason City feel highly jubilant tonight over the announcement that the Lehigh-Portland Cement company will erect at once here the creation of a \$2,000,000-cement plant here. Two years ago they made purchase of some thousand acres of land in this vicinity but there was a reported consolidation of cement plants of the country about that time and the continued delay of the Lehigh people to build led many to believe that it never would come. It is now, however, all the work to do in securing the lands, and President Trexler have been in the city, and they left with the above announcement. Upon the heels of this, President W. E. Bryce of the Mason City & Clear Lake Electric line announces that he will extend his line to the north to the North-west Portland cement plant, and thence west a mile to the location of the new site of the Lehigh company.
