"It's a shame," was Clarke Powell's comment as he gaged at the swarming crowds dotting the creating street beyond the canves," walls. Prom housetops, wagon tops and the tops of the hills and high streats of the unduisting country round the field the deadheads looked on... Clarks Powell's bright idea was that two widths of added fence at points where the deadheads were finding a range of vision would be an effective piece of laudable spitewors. Thus there will not McPhergon range of vision would be an effective piece Madison of laudable spitework: Thus there will not McPherson be so many deadheads today.

CURTISS IS. ALWAYS QUIET Comparative Sizes of the Three Ms-chines Seen at the Meet. Curtiss is the suave, quiet mannered fig-ure of the aviation meet. By habit he stands in the background while the avi-ators are the cynosure of eyes, and he spakks briefly when he has something to say. In point of build he can look over say. In point of build he can look over say. In point of build he can look over the heads of the others and yet he weighs no more than any of them. His machine, likewise, is the big one of Scottabluff the outfit. But unlike its driver, the plane is proportionate; it weighs just twice what either of the other two machines weigh. The machines compare as follows: Curtiss' Stanton Valley Washington horse-power and 400 lbs.
