WEATHER IN THE GRAIN BELT

OMAHA, July 30, 1810. OMAHA, July 39, 1819.

The area of high pressure in the northwest, noted in the preceding report as
moving down over the central valleys, has
extended over the upper Missouri and upper
Missishippi valleys and caused a slight but
general fall in temperature from the northern Rocky mountain slope, east over the
upper valleys and the period.

is Prediction for Sunday.

OMAHA, July 36, 1918.

There were no cables, it being a holiday at Liverpool. European crop news is bulliaged and the expension of the country for the stimated Russian shipments are said to the movement of winter wheat devices and increased the movement of winter wheat devices the movement of winter wheat devices and increased the movement of the moving at the moving at the moving at the moving at the moving of the moving at the moving of the

Market in a Healthy Condition and

DIVIDENDS AHEAD OF LAST YEAR

Rumors of Another Transcontinental Railroad, with Missouri Pacific and Rock Island in the Deal.

Railroads lead in both dividend and interest disbursements next month, followed by industrial corporations.

These figures are eloquent. Despite the calamity, howlers in Wall street, these tremendous sums show the stability of business and the solidity of railroads and corporations. They show that more business is being done now than was being done at this time last year, and even at that 1969 was looked upon as a highly prosperous era.

Some Railroad Rumors.

The chief item of news this week with a beaging upon the stock market was the acquisition by kuhn, Loeb & Co. and an English group of bankers of the Rock Island, Lehigh Valley and Missouri Pacific stocks held by the Pearson-Farquhar syndicate. Wall street is full or rumors that a transcontinental railroad system is being planned with the foregoing mentioned roads as the nucleus. The holdings include a big interest in the Denver & Rio Grande and the Wabash, so that the system is already practically linked.

The possibility of a new transcontinental railroad system projected by Kuhn, Loeb & Co., British and Gould interests, has apparently had a good effect upon the market. The purchase of the securities in the lines mentioned has shed a great deal of light upon a subject which has been in the dark for a long while. Ever since the Rock Island flurry last winter, the holders of the bulk of Rock Island have been an unknown quantity, and quality, too, for that matter.

The Kuhn, Loeb & Co. deal has placed the Union Pacific railroad in a strategic position, for the banking company is closely allied with both Union and Southern Pacific interests. It is no wonder then that the Harriman shares have been gaining in strength and climbing in quotations for three days.

The Harriman issues have more than this to thank for their gains. The preliminary report for the fiscal year will see the previous of the week will be declared at the regular meetings for the week imminary report for the fiscal year will specific interests. It is no wonder then that the Harriman shares

Clearing House Bank Statement.

NEW YORK, July 30.—The statement of clearing house banks for the week shows that the Banks hold \$48,511,925 more than the requirements of the 25 per cent reserve rule. This is an increase of \$8,195,500 in the proportionate reserve as compared with last week.

Banks of the middle west are, in some/sections, at least, undertaking to put themselves into better condition before the coming of the fall demands. Most of the figures show a decided improvement over the conditions exhibited at the time of the last call.

Revival in Iron.

The statement follows:

Amount. Increase.

Loans \$1,191.40,200 \$8,940,000

Optimistic Wall Street Finds Buyers So Wary of Lure.

POSTAL SAVINGS IN ENGLAND

Some Figures on the Totals of the Government Bank in the United Kingdom-Why Silver is Going Righer.

BY PRESTON C. ADAMS.

NEW YORK, July 30.—(Special Dispatch to The Bee.)—Men are a suspicious crowd down in Wall street and prone to believe that men of high finance are experts in the

the amount withdrawn exceeded the amount deposited by \$19,785,838. The largest number of withdrawals on any one day was \$5,455, and of the entire number of withdrawals in 1998, 5,910,485 were made on demand. The total sum to the credit of the 11,018,251 depositors in the postoffice savings bank on December 31, 1998, was \$781,794,533, an increase of \$15,320,409 in the year. In the United States the capital subscribed by investors during the half year ending by investors during the half year ending June 30 exceeded the striking sum of \$1.048.000,000. In London the total was only \$100,000,000

In London the total was only \$100,000,000 smaller, amounting to \$188,000,000, or \$340,-000,000, a record breaking total.

Included in the English flotations are \$26,400,000 (\$182,000,000), representing American securities, largely bonds placed by American railroads with British investors. These bonds are necessarily duplicated in the figures of both countries. It is probable, however, that this country has a greater lead over England in capital creations than the comparisons suggest, as the list of financial applications does not take into consideration the many small companies on this side that have placed securities with investors. The system of public offerings of securities in London is in this respect more adaptable for exact compilation than a contribution than a contribution that the contribution this respect more adaptable for exact com-pliation than at home here. On the other hand, the English flotations are largely for

and expectations of government purchases, these native bankers have formed the conclusion that the demand for silver will be sufficiently extensive to carry the price much higher, and they have accordingly purchased some \$15,000,000 worth of the white metal in Bombay and London. For this sum they have received approximately. this sum they have received approximately and they have received approximately 30,000,000 ounces, which represents a very large percentage of the available supplies. The scarcity thus brought about in India has led to the shipment, according to private cables received here, of \$1,250,000 worth of the metal from Shanghai to Bombay. The Indian speculators have been encouraged in their operations by a belief that the at this time, after having been out of the market since 1907, but other authorities doubt whether such purchases will be necessary, at least for some time,

End of the Cotton War.

End of the Cotton War.

The fight between the old crop longs and the shorts in the cotton market, which has been on for months, will evidently not end before the end of the season.

The cotton year ends on August 21 and from September 1 it is another year. Not crop cotton begins to move before syptember 1, but not in sufficient quantities to make the new cotton the controlling element in the market. In some seasons the crop has been so late that new crop cotton has been of little weight on the market during September. There has never been a year in which it was possible to deliver new crop cotton on August contracts in New York at a profit; and the fact that the season is rather late this year, makes it out of the question to count upon the it out of the question to count upon the delivery on any new crop cotton next month.

In the history of the New York market

there has never been such a contest in real bales as has been fought since January 1. The future trading has not been in "paper cotton," but—thanks to the southern and western men who believed that cotton was cheap—it has been a real cotton market,
Information received by the currency
bureau in the Treasury department and
made public by the comptroller of the currency, has rendered it evident that the
banks of the middle west are, in some

There are signs of revival in inquiry for

production of pig iron during the present quarter.

Producers and consumers seemingly have accepted the price levels prevailing at the close of June as the absolute minimum of the market. There has been no attempt to shade these figures. Foundry iron has moved in small lots on the basis of \$14.50 furnace for No. 2, and some small tomages of hade have changed hands at \$14.75 valleys, though it is possible this price could be shaded oft a substantial inquiry for second quarter.
