

GRAIN AND PRODUCE MARKET

Wheat is Inclined to Work Lower on Soft Cables. CORN TRADES ARE LOWER After the First Break in Wheat Corn Firmly Up and Later to Narrow and Unchanged-Features of the Trading.

OMAHA, Aug. 10, 1910. The wheat market was inclined to work lower early on soft cables and earlier northwest markets. Export business is denied, and advices from France are more favorable.

Early trading in corn was at slightly lower levels, owing to the slump in wheat and the favorable cable news. Fall of receipts is a strengthening factor, and traders are favoring the bull side.

Wheat market was quiet, with weak cables and lower northwest markets. Hedging sales in the nearby market keeps volume on the domestic side. A few small purchases are holding the distant future.

Both wheat and corn are showing a firm up after the first break with wheat later in the market. The market is unchanged. Crop news throughout the belt is favorable.

NEW YORK STOCKS AND BONDS

Spirit of Caution Exhibited by Speculators on Market. NO INTERRUPTION TO RECOVERY Average Stocks Sell Over Five Points Higher Than Two Weeks Ago.

NEW YORK, Aug. 10.-A spirit of caution on the part of those who have been operating in the stock market for an advance in prices began to manifest itself in the action of the market today. The feeling was based as much on the duration and extent of the recovery as on any positive developments.

The low price of the year were touched two weeks ago and no important interruption to the recovery has occurred since that time. The average gain of the market was usually selected as most representative of the market.

As the recovery has proceeded the demand to borrow stocks for delivery has diminished and today there was reported in the loan department a surplus of stocks which have been borrowed for delivery.
