When the Normans conquered England they found the country provided with a judicial system in which in criminal trials various ordeals were prominent features, the ordeal of carrying hot iron and of putting the hand into boiling water being customary diversions applied to the accused person.  Jurors came into being under the Plantagenets receiving their first statutory recognition in the twelfth century. The twelve were not independent individuals qualified as now by their ignorance of the merits of the case, but were neighbors who knew something of the facts and could therefore supplement the testimony of the witnesses. For a long time it was ground for objection to a juror that he was not possessed of private knowledge and information, and as late as the reign of Charles II it was held that "juries are called from the neighborhood because they should not be wholly strangers to the fact."  When the twelve men of the jury of today are discharged unable to agree there is no penalty for lack of unity, though in a flagrant case the judge may give them a scoring from the bench. In other times in England it was different, and where one held out against the eleven he was com-   | promised to give to the Ostermann company the work of making 2,000 grain doors if he got the stock, testified Reuther. Wilson, formerly of Indianapolis, who for several years has been connected with the Royal Ophthalmic hospital, that the jury system would be greatly improved if it took form in a body of trained professional jurymen, has moved the London Daily Telegram to give an interesting history of the jury of twelve as it is known in Great Britain and in America.  When the Normans conquered England they found the country provided with a judicial system in which in criminal trials various ordeals were prominent features, the ordeal of carrying hot iron and of putting the hand into boiling water being customary diversions applied to the accused person.  Jurors came into being under the Plantagenets receiving their first statutory recognition in the twelfth century. The twelve were not independent individuals qualified as now by their ignorance of the merits of the case, but were neighbors who knew something of the facts and could therefore supplement the testimony of the witnesses. For a long time it was ground for objection to a juror that he was not possessed of private knowledge and information, and as late as the reign of Charles II it was held that "juries are called from the neighborhood because they should not be wholly strangers to the fact."  When the twelve men of the jury of today are discharged unable to agree there is no penalty for lack of unity, though in a flagrant case the judge may give them a scoring from the bench. In other times in England it was different, and where one held out against the eleven he was committed to prison and the verdict of his fellows was taken. In the reign of King Edward III the judges decided that a verdict given by a majority was a nullity and it was recommended that the judges of assize should carry the jurymen about with them in a cart until they should agree. During the reign of Queen Elizabeth the successful party in a suit usually entertained the jury at a banquet after the verdict had  | promised to give to the Ostermann company the work of making 2,000 grain doors if he got the stock, testified Reuther.  "Did he get the shares?" asked Aecorney Rothert.  "I asked Ostermann that question subsequently, and he said he had given them the shares of stock," replied Reuther.  Ostermann Threatened to Kill, Previous to giving this evidence regarding, the alleged stock transaction, Reuther related a story of an encounter with Ostermann during which he declared that Ostermann threatened to kill him if he told of the transactions between the Illinois Central railroad and the Ostermann company. Reuther stated that he went to Ostermann's offices to protest because he had not received dividends upon his stock in the repair company.  "Ostermann said no dividends had been paid," testified Reuther, "and I told him that I had seen a check sent to a man named Tomski. He said it was a lie.  "You have done more harm than good with this company," Ostermann shouted, and I replied that I had done a whole lot toward organizing the concern and said: 'It will all come out how the Illinois Central was robbed.' He grew angry, selzed a paperweight and struck me on the head. I fell to the floor and some men carried me out and placed me on my back. Ostermann said he would kill me if I told about the Illinois Central business. I got home and had to go to bed. August Diedrich, foreman in the Burnside shops, called at my home and told me I should not say anything about what happened. 'Don't mix up John M. Taylor,' Diedrich asked me. Mr. Milligan also called and told me not to say anything about the Ostermann affair, but I told them I was going to tell the Illinois Central just as soon as I got out of bed.
