Money Asked for Aeroplanes. Secretary Moyer speaks with pride of the workings of the reorganization scheme inaugurated by himself and points to a saving of about \$4,000,000 in the estimates for the next fiscal year. Referring to the success of Aviator Eugene Ely in his flight from the cruiser Birmingham the secretary says that it appears to be practicable also for an aeroplane to board a ship. But even if an aerial scout could not land on a ship from his aeroplane he could be taken aboard from the water to make his report and the loss of the zero plane would be of no moment. So he requests an appropriation of \$25,000 to continue the aeroplane experiments. Accounts Consolidated.

Secretary Meyer refers to the establish ment of the naval supply account, by which seven or more accounts were consolidated into one, with great decrease in bookkeeping and knowledge of stores on hand. From being over obligated on March Il. the condition now is that the whole value of the naval supply fund is liquidated and available and the secretary recommends that its value-\$2,700,000-be turned into the freasury. This represents a saving of that amount and in the future the department will work along on the regular
