Big Area Irrigated.

'About 12,000 acres are now irrigated by the storage water from the reservoir. In farm before it is too late. "The main canal, nearly ten miles long, conveying this water there is a large gun. Funds to the extent of \$10,000 were \$10 to \$12 per ton. A sugar best factory joss of water and by far the most costly from \$11 to \$15 a share and each share of pure air and water, dairyman.

Enlarging the reservoir so as to provide 6,000 or more additional shares, the annual rental value of these shares would be from \$72,000 to \$90,000. It is evident that if the cost of the additional storage will not much exceed \$110,000, the rent value of the water thus obtained would pay for the

total outlay in less than two years. A revenue of \$125,000 a year is assured on the 5.000-horse power of electric energy to be generated. This, with water rentals, makes the farmers' irrigation system an undertaking that compares favorably with any other large enterprise in the west.

FREE LAND GOES VERY RAPIDLY

Land Men Say Homestenda Soon to Be All Taken.

OGDEN, Utah, March 4 - (Special.) - The west is within sight of the last of the free homes to be obtained through homesteading. It is predicted by land dealers and others familiar with the conditions that the next five years will witness the taking up of all tracts available under the

homestead and Smoot acts. Thousands of acres have been acquired in Utah during the last year, under the enlarged homestead entry and the filing on dry farm areas continues at a surprising
